

James E. Lockey, MD

Dr. Lockey received a BA degree from Kenyon College (1968), MD from Temple University (1972), and a MS from the University of Cincinnati (1985). Dr. Lockey conducted his residency in Internal Medicine at the University of Minnesota Hospital, and fellowships in Pulmonary Medicine at the University of Minnesota and in Occupational Medicine at the University of Cincinnati. Dr. Lockey is certified by the American Board of Internal Medicine, subspecialty in Pulmonary Disease, and the American Board of Preventive Medicine, subspecialty in Occupational Medicine. He holds medical licenses in both Ohio and Kentucky, and specializes in occupational pulmonary disorders. Dr. Lockey is currently a Professor, Department of Environmental Health, Division of Occupational and Environmental Medicine and Department of Internal Medicine, Pulmonary Division, University of Cincinnati College of Medicine. Dr. Lockey is currently principal or co-principal investigator of numerous research studies including a respiratory morbidity and mortality study of workers exposed to refractory ceramic fiber, a study investigating the relationship of diesel exhaust exposure and the risk in young children for developing allergic rhinitis and asthma, a follow up study of workers exposed to asbestiform contaminated vermiculite ore, and the development of environmental sensors for personal exposure assessment of PM1.0 in collaboration with Mechanical, Industrial and Nuclear Engineering at the University of Cincinnati. Dr. Lockey received presidential appointment to the National Advisory Board on Radiation and Worker Health, and is a member of the UAW-GM Occupational Health Advisory Board. Dr. Lockey is a member of the Center for Asbestos Related Diseases, a scientific advisory board involved in investigating the community effects of asbestiform fiber exposure in Libby, Montana.

Dr. Lockey is a member of numerous professional organizations, including the American Thoracic Society; the American Academy of Allergy, Asthma and Immunology; and the American College of Occupational and Environmental Medicine. Dr. Lockey has authored more than 150 scientific articles, review articles and book chapters, in addition to numerous professional presentations at national and international conferences. Dr. Lockey's occupational and environmental respiratory disorder clinic provides a teaching setting for occupational and environmental medicine residents, internal and family practice residents and pulmonary fellows and medical students, as well as other allied health students at the University of Cincinnati College of Medicine.
