## PRIVACY IMPACT ASSESSMENT (PIA)

PRESCRIBING AUTHORITY: DoD Instruction 5400.16, "DoD Privacy Impact Assessment (PIA) Guidance". Complete this form for Department of Defense (DoD) information systems or electronic collections of information (referred to as an "electronic collection" for the purpose of this form) that collect, maintain, use, and/or disseminate personally identifiable information (PII) about members of the public, Federal employees, contractors, or foreign nationals employed at U.S. military facilities internationally. In the case where no PII is collected, the PIA will serve as a conclusive determination that privacy requirements do not apply to system.

c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

Heidelberg Eye Explorer HEYEX 2 is an enterprise wide DoD information technology. A non-contact ophthalmic diagnostic imaging device, it is intended for viewing the posterior segment of the eye, including two- and three-dimensional imaging, cross-sectional imaging, fundus imaging, fluorescence imaging, autofluorescence imaging, and performing measurements of ocular anatomy and ocular lesions. The device is indicated as an aid in the detection and management of various ocular diseases, including: age-related macular degeneration, macular edema, diabetic retinopathy, retinal and choroidal vascular diseases, and glaucoma. Heidelberg Eye Explorer HEYEX 2 communicates with a primary ophthalmic imaging management system, Zeiss FORUM, via Digital Imaging and Communications in Medicine (DICOM) communication protocols.

These DICOM protocols integrate the Military Health System's (MHS) Electronic Medical Record (MHS GENESIS) with Heidelberg Eye Explorer HEYEX 2. Patient PII is sent to Heidelberg Eye Explorer HEYEX 2 from DoD information system Composite Health Care System (CHCS)/MHS GENESIS via a Modality Worklist (MWL). Before study completion, data is verified based on the patient's DoD identification card. Next, eye scans are accomplished. Medical data is then acquired and sent to the FORUM utilizing DICOM protocols. CHCS/MHS GENESIS/Defense Manpower Data Center (DMDC) provide Health Level 7 (HL7) feed of data to populate patient demographics. Legacy medical devices in Military Treatment Facility (MTF) clinics which existed prior to implementation of Ophthalmic Imaging Integration will be connected to archive medical information, including Personally Identifiable Information (PII).

Heidelberg Eye Explorer HEYEX 2 interfaces with electronic medical record systems and third-party devices to allow the exchange, storage, and dynamic review of diagnostic images. With Heidelberg Eye Explorer HEYEX 2, users can access image sharing with satellite locations and referring physicians. The collected PII includes demographic information, personal contact information, medical information, and Protected Health Information (PHI). The categories of individuals on whom PII is collected include active duty military personnel, military retirees, dependents, and other individuals eligible for care within the MHS.

CyberLOG is responsible for the Risk Management Framework (RMF) process, and gaining an approval from the DHA J6 Risk Management Executive Division (DHA J6 RMED). Local sites are responsible for day to day operations, maintenance, and management of the device. Sites are responsible for ensuring the device is configured to meet CyberLOG and RMED approved configurations.

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

The PII collected is for verification and mission-related purposes. The intended use of the PII is for verifying the identities of patients, data collection, treatment plans, and for patient care throughout the MHS.

e. Do individuals have the opportunity to object to the collection of their PII?

Yes X No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

Individuals do not have the opportunity to object to the collection of their PII because Heidelberg Eye Explorer HEYEX 2 is not the initial point of collection.

- f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes X No
  - (1) If "Yes," describe the method by which individuals can give or withhold their consent.
  - (2) If "No," state the reason why individuals cannot give or withhold their consent.

Individuals do not have the opportunity to consent to the use of their PII because Heidelberg Eye Explorer HEYEX 2 is not the initial point of collection.

n. Does this DoD information system or electronic collection have an active and approved Office of Management and Budget (OMB) Control Number?

Contact the Component Information Management Control Officer or DoD Clearance Officer for this information. This number indicates OMB approval to collect data from 10 or more members of the public in a 12-month period regardless of form or format.

Yes X No Pending

<ul> <li>(1) If "Yes," list all applicable OMB Control Numbers, collection titles, and expiration dates.</li> <li>(2) If "No," explain why OMB approval is not required in accordance with DoD Manual 8910.01, Volume 2, "DoD Information Collections Manual: Procedures for DoD Public Information Collections."</li> <li>(3) If "Pending," provide the date for the 60 and/or 30 day notice and the Federal Register citation.</li> </ul>
OMB approval is not required. The OMB Control Number controls approval of the SORN which in turn controls approval of the PIA. Heidelberg Eye Explorer HEYEX 2 does not solicit responses from members of the general public as the system does not collect PII directly
from individuals.
