- As measured by Standardized Infection Ratio (SIR)
- SIRS = Number of Observed Infections/Number of Predicted Infections
- Facilities where the SIR is not statistically different than one are categorized as "No Different Than The National Benchmark"
- Facilities where the SIR is statistically higher than one are categorized as "Worse Than The National Benchmark"
- Facilities where the SIR is statistically lower than one are categorized as "Better Than The National Benchmark"
- *Facilities with device days but no SIR are classified as "Too Small to Calculate"
- **Facilities with no device days; at least two quarters with no device days in 2014 and 2015, or with at least one quarter with no device days in 2016 are classified as "Data Unavailable"

Data as of 29 March 2017
