JOINT OPERATIONAL MEDICINE INFORMATION SYSTEMS MEDICAL COMMON OPERATING PICTURE

The Medical Common Operating Picture (MedCOP) is an interactive decision-support platform arming command surgeons and medical commanders with real-time health surveillance and medical operations visibility to enable more-informed decisions.

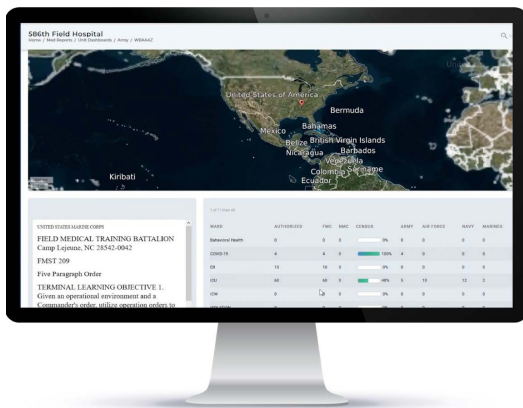

PRODUCT OVERVIEW

MedCOP is the Joint Health Services' mission command platform, providing real-time visibility of unit health, equipment and supplies to enable informed decisions. The web-based capability, managed by the Joint Operational Medicine Information Systems (JOMIS) program office, facilitates real-time operational medicine

information sharing and collaboration inside and outside the medical community. MedCOP consolidates data from multiple disparate data sources and supports data synchronization across multiple network domains to provide a universally accessible, situationally relevant and globally integrated medical common operating picture.

MedCOP is deployed to combatant command and service medical command, control, communications, computers, and intelligence users at multiple echelons.

DATA SOURCES

- Global Control and Command System-Joint
- Joint Medical Asset Repository
- Health Surveillance Explorer
- CarePoint
- Travax[®]
- Air Force Weather System

CAPABILITIES

- Provides intuitive, customizable and shareable dashboards for strategic, operational and tactical level operations
- Enables collaboration across domains and enclaves through chat, file sharing and other tools
- Leverages secure continuous update pipeline to rapidly add new and emerging capabilities
- Supports health services synchronization through an intuitive user interface for real-time medical operational readiness information sharing and global visibility
- Replicates global data across combatant commands (CCMDs), providing access closer to the tactical edge
- Allows for Annex Q reporting (beds, equipment, supplies, personnel and labs), facility management and global awareness, providing enhanced situational awareness across the Department of Defense
- Provides fully accredited integration with joint command and control mission systems, including Army and CCMD service staff, operations and intelligence systems
- Automates data entry
