

DoD Healthcare Management System Modernization Joint Legacy Viewer

The Joint Legacy Viewer (JLV) is managed within the Department of Defense (DoD) by the Defense Medical Information Exchange (DMIX) Program, under the Program Executive Office, Defense Healthcare Management Systems (PEO DHMS).

WHAT IS THE JOINT LEGACY VIEWER?

The Joint Legacy Viewer (JLV) is a clinical application that provides an integrated, read-only display of health data from the Department of Defense (DoD), Department of Veterans Affairs (VA), and private sector partners in a common data viewer. Thousands of DoD and VA clinicians use JLV daily to access real-time medical data in the treatment of their patients. The application also supports thousands of benefits administrators as they research patient medical histories to process claims.

DMIX worked with DoD and VA user communities to determine features most important to end users. The customizable display allows an individual to view patient data through any of JLV's health information widgets. Data displays chronologically and can easily be identified by the site of care. DoD data displays as an orange square, VA data displays as a blue circle, and private sector care displays as a purple hexagon.

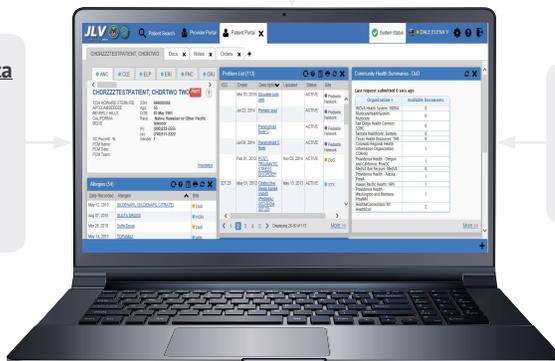

JLV Data Elements

Admissions | Allergies (multiple types) | Appointments | Clinical Reminders | Community Health Summaries | Consult Encounters | Demographics | Progress Notes | Discharge Summaries | DoD/HAIMS Documents | Immunizations | Inpatient Medications | Inpatient Summaries | Lab Panel Results | Lab Results | Outpatient Encounters | Outpatient Medications | Orders | Problem Lists | Procedures | Questionnaires and Deployment Assessments | Radiology Exams | Social, Family, and other Past Histories | Vitals

**Private Sector
External Partner Data**
(when available)

DoD Medical Data

- CDR/AHLTA
- CHCS
- HAIMS
- Essentris®
- DMSC (PDWS)

VA Medical Data

- VistA
- VistA Imaging
- MVI

KEY FEATURES

- DoD users can easily access JLV via AHLTA or via the web
- JLV users can access all their patients' available healthcare data, regardless of whether they previously received care from DoD, VA, or participating private providers
- Users experience an easy-to-learn, intuitive interface with 22 customizable widgets and a configurable layout to support user preferences and various workflows

KEY BENEFITS

- Faster and more complete understanding of patient health status
- Improved usability, latency, and system efficiency compared to existing viewers
- Supports DoD, Veterans Health Administration, and Veterans Benefits Administration users and workflows

JLV ACCESS

To apply for JLV access, contact your local AHLTA site administrator to be assigned a JLV key.
