

FACT SHEET

SNPMIS

SPECIAL NEEDS PROGRAM MANAGEMENT INFORMATION SYSTEM

SNPMIS documents and reports on services provided to TRICARE Beneficiaries with special needs. SNPMIS manages data regarding early intervention services provided to eligible infants and toddlers and the related services provided to school-aged children enrolled in the DoD Dependents Schools (DoDDS)

SNPMIS operates at program sites worldwide providing Early Intervention Services and Related Services for disabled children who are entitled to enroll in a DoD Education Activity (DoDEA) school in accordance with sections 921-932 of Title 20 of U.S. Code. SNPMIS manages data regarding early intervention services for toddlers with disabilities where the DoD is responsible for providing educational services and supports the delivery of related services to school aged children enrolled in a DoDEA school. This data supports readiness decisions for service member relocation and deployment actions that impact the health of special needs family members.

Background:

SNPMIS is a legacy client-server application used at program sites worldwide for special needs children of active duty military families. There are approximately 43 Educational and Developmental Interventions Services sites operated by the U.S. Navy, Air Force, and Army. The application facilitates meeting the requirements of the individuals with Disabilities Education Act (IDEA) for the Services

Key Benefits

- ▶ Tracks services provided to children with special needs under IDEA
- ▶ Provides accountability to ensure compliance with timelines and program metrics mandated by the IDEA
- ▶ Generates reports that are the basis for the Services' annual compliance report submitted to the DoD Office of Special Needs
- ▶ Supplies data used in program monitoring activities at the Service and DoD levels

Key Features

- ▶ Collects and stores eligibility, referral, evaluation, and service plan data for children eligible for services from the Military Medical Departments' Educational and Developmental Intervention Services under the IDEA
- ▶ Collects family demographics, referrals, eligibility, and service plans data
- ▶ Collects and stores provider service provision data
- ▶ Manages data for the early intervention services provided to eligible infants and toddlers
- ▶ Manages data for the related services provided to school-aged children enrolled in the DoDDS Special Education Program
