

Program Executive Office

# DoD HEALTHCARE MANAGEMENT SYSTEM MODERNIZATION

The mission of the DoD Healthcare Management System Modernization program office is to competitively acquire, test, deliver, integrate and successfully transition to a state-of-the-market electronic health record system.

## PROGRAM MANAGEMENT OFFICE OVERVIEW

The DoD Healthcare Management System Modernization (DHMSM®) program office oversees the deployment of MHS GENESIS as well as the operations and sustainment of the Joint Longitudinal Viewer (JLV). In partnership with the Defense Health Agency (DHA), the military services and industry, DHMSM continually refines a deployment and sustainment plan to optimize the delivery of the Department of Defense’s (DOD) electronic health record (EHR), MHS GENESIS.

Select Military Health System (MHS) legacy clinical systems including AHLTA, Composite Health Care System (CHCS), inpatient and clinical components of the Theater Medical Information Program-Joint (TMIP-J) will be replaced during the implementation of MHS GENESIS. During MHS GENESIS deployment, personnel will maintain their connections to these legacy systems via JLV.

DHMSM effectively manages business operations, testing, systems engineering, future requirements, deployment, change management, communications, training and legacy operations. This will ensure a successful deployment of MHS GENESIS to a complex and globally dispersed enterprise with minimal disruption to the military health care community and beneficiaries.

### BENEFITS OF MHS GENESIS

-  Facilitates the safe transition of care across the spectrum of military operations including garrison, operational and en route care, through a proven commercial EHR
-  Supports our medical and dental communities in providing world-class health care delivery for service members, their families, and our allies across the globe by integrating, testing, and deploying a modernized EHR
-  Provides our health care communities with the ability to monitor a beneficiary’s health status through greater population health data, tracking and alerting capabilities
-  Provides healthcare professionals and patients with the latest advancements in technology

### BENEFITS OF JLV

-  Faster and more complete understanding of patient health status
-  Supports DOD, Veterans Health Administration, Veterans Benefits Administration, U.S. Coast Guard and Military Entrance Processing Command
-  Easy to learn, easy to use, graphical user interface
