

Solution Delivery Division

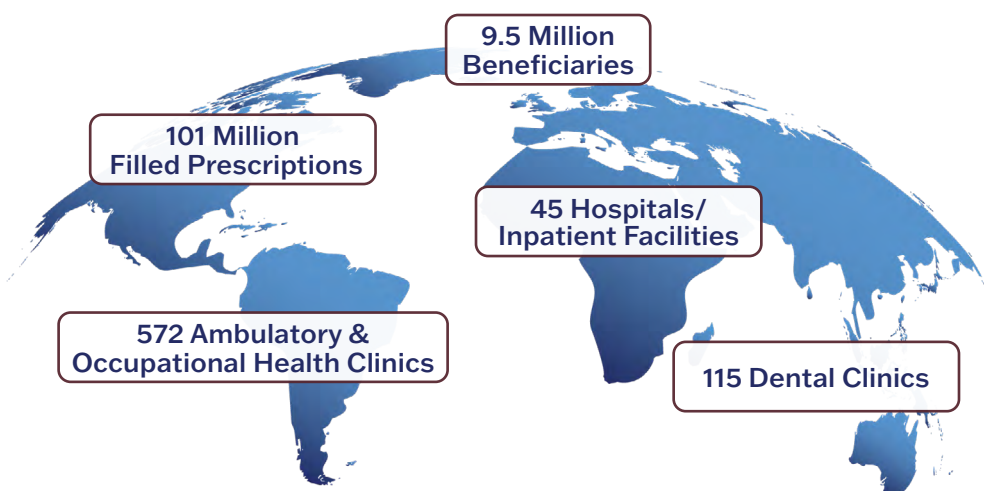

Delivering Solutions, Advancing Health Care

FACT SHEET

The Solution Delivery Division is a leading provider of information, technology, simulation, and acquisition program management for the Defense Health Agency. It supports the Agency's mission to improve health and build readiness by fostering innovation, applying proven business practices, and employing an acquisition-trained workforce to drive progress, reduce cost, and advance modernization.

As a division of the Program Executive Office for Medical Systems, SDD's program management offices and branches provide:

- Internal and external stakeholders and customers support for day-to-day operations and IT systems
- Military commanders medical logistical support, life cycle management, and IT infrastructure
- Health delivery applications to facilitate globally integrated health activities
- Project and program support — enterprise-wide master scheduling, standardized workflows, role-based training and implementation
- Organizational change and systems integration for military hospitals and clinics

SDD Portfolio Offerings (not all inclusive):

- **Defense Medical Accessions Computing Systems (DMACS)**
 - » enables processing of medical components for officer accession programs including the United States Service Academies, Reserve Officer Training Corps, and Uniformed Services University
- **Individual Longitudinal Exposure Record (ILER)**
 - » web-based application that allows the DOD and the VA to link individuals to known exposure events
- **Legacy Clinical Systems**
 - » support for AHLTA and Clinical Information System (CIS)
 - » ensures data is available via Health Information Archive and Legacy Data Consolidation Solution as sites decommission and transition to MHS GENESIS
- **Medical Simulation and Training**
 - » center of excellence for acquisition management of medical simulation, training, and education solutions
- **Mobile and Progressive Web Applications**
 - » provides user-friendly apps for medical teams and beneficiaries (medication, access to care, mental health, contraceptive counseling, etc.) available for free download
- **Veterinary Service Information Management System (VSIMS)**
 - » application supporting the DOD's food safety operations and inspections, veterinary public health, and operational missions
