

# DEFENSE HEALTHCARE MANAGEMENT SYSTEMS

## MHS GENESIS

### WHAT IS MHS GENESIS?

MHS GENESIS is the Military Health System’s Federal Electronic Health Record for service members and their families. It integrates inpatient and outpatient best-of-suite medical and dental solutions, supporting more than 9.5 million beneficiaries at home and abroad. With approximately 194,000 provisioned users globally, MHS GENESIS enables the application of standardized workflows as well as integrated health care delivery and data standards

for the improved and secure electronic exchange of medical and patient data. The Department of Defense deployed MHS GENESIS to all its garrison hospitals and clinics throughout the world. Other federal partners who completed deployment include the U.S. Coast Guard, National Oceanic and Atmospheric Administration, and U.S. Military Entrance Processing Command.

### FEATURES

Connects the provider to the patient by providing the ability to exchange secure messages and plays an integral role in the provision and coordination of safe, quality care

Provides a single integrated system that brings together inpatient and outpatient solutions that connect medical and dental information at any military treatment facility, regardless of branch

Provides 24/7 access through the Patient Portal to health care information, appointment management, message exchange, and prescription refill requests

Interoperability with other systems strengthens the continuum of care for service members as they transition between different phases of their career, including active duty and veteran status

### BENEFITS

Supports mission readiness from initial processing at military entrance processing stations to annual readiness assessments

Protects beneficiary information using the latest advancements in security and cyber technology

Provides a seamless care experience, saving providers time through the use of standard workflows

Supports medical and dental communities in providing world-class health care for beneficiaries

Real-time system analytics support identification, alert, and rapid response to public health emergencies that could impact readiness

Empowers patients to stay informed of their personal health information, exchange secure messages with their care team, view lab and test results, update their profile, and manage appointments

Enhances clinical decision-making and patient safety by providing the right data to the right people at the right time

**“I LIKE THE REAL-TIME DOCUMENTATION OF IMMUNIZATIONS. PREVIOUSLY, WE WOULD HAVE TO SPEND HOURS DOCUMENTING AFTER THE EVENT.”**

— MHS GENESIS SURVEY RESPONDENT

**“I AM EXCITED ABOUT THE OUTSIDE RECORDS CAPABILITY. THIS IS A GREAT WIN, AS WE DON’T HAVE TO DO EXTRANEIOUS TESTS FOR PATIENTS.”**

— MHS GENESIS END USER

*MHS GENESIS IS THE MODERNIZED ELECTRONIC HEALTH RECORD MANAGED BY THE DOD HEALTHCARE MANAGEMENT SYSTEM MODERNIZATION PROGRAM MANAGEMENT OFFICE UNDER THE PROGRAM EXECUTIVE OFFICE, DHMS.*

MHS GENESIS IS A REGISTERED TRADEMARK OF THE DEPARTMENT OF DEFENSE, DEFENSE HEALTH AGENCY. ALL RIGHTS RESERVED.
