DHMSM JTE is a web based software solution that enables agile development, project management, software development and collaboration within teams. DHMSM JTE provides a Software as a service (SaaS) services model that offers authorized users a place to design, capture, view, and collaborate throughout the project life cycle. PEO DHMS JTE provides a standardized software environment, services, and resources to facilitate the effective development and testing of healthcare management systems, applications, and their capabilities. PEO DHMS JTE is capable of providing inheritance at higher sensitivity levels to run production workloads. All test data managed and maintained to support development within the PEO DHMS JTE is synthetic data. The PEO DHMS JTE is not interconnected to any production healthcare systems.

Personally Identifiable Information (PII) collected includes DOD ID Number, Position/Title, Rank/Grade, Security Information, Citizenship and Work E-mail Address. The categories of individuals about whom PII and PHI are collected include Federal employees and contractors.

The PII is collected for user identification and authorization.

e. Do individuals have the opportunity to object to the collection of their PII? Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

PEO DHMS JTE receives PII from system-to-system interface; therefore, the opportunity to object is only available at the source system.
