MEMORANDUM FOR UNDER SECRETARY OF DEFENSE (COMPTROLLER)

SUBJECT: Revised Fiscal Year 2013 Direct Care Inpatient Billing Rates Update

The attached document contains the Department of Defense Uniform Business Office Revised Fiscal Year (FY) 2013 Direct Care Inpatient Billing Rates. These rates are effective January 21, 2013. The TRICARE Management Activity (TMA) requests that this package be posted to the Comptroller’s Web site, (http://www.defenselink.mil/comptroller/rates/fy2013.html) as Revised FY 2013 rates, Medical and Dental Services.

The rates are used when billing for medical services furnished to inpatients at Military Treatment Facilities. The Adjusted Standardized Amounts (ASAs) are based on an indexing methodology to changes in TRICARE institutional and professional services rates. The revised direct care inpatient ASA rates, effective January 21, 2013, are being updated to maintain the percent increase in direct care ASA charges consistent with the final TRICARE percent increase in inpatient institutional payment for FY 2013. The earlier direct care ASA rates, effective October 1, 2012, were based on the information available at the time. The overall percent change from FY 2012 to FY 2013 is a 3.37 percent increase. This out of cycle update represents .07 percent of that increase.

The point of contact for this action is Ms. DeLisa Prater, Program Manager, TMA, Uniform Business Office. She may be reached at (703) 681-6757 or Delisa.Prater@tma.osd.mil.

Attachment:
As stated
Revised Fiscal Year 2013
Direct Care Inpatient Adjusted Standardized Amount Rates and Guidance

1.0 Revised Fiscal Year (FY) 2013 Direct Care Inpatient Adjusted Standard Amount Rates and Charges effective 21 January 2013.

Overview

This letter revises the Fiscal Year (FY) 2013 direct care inpatient Adjusted Standardized Amounts (ASA) rates that became effective 1 October 2012. The revised direct care inpatient ASA rates, effective 21 January 2013, are updated to maintain the percent increase in direct care ASA charges consistent with the final TRICARE percent increase in inpatient institutional payment for FY 2013. The earlier direct care ASA rates were based on the information available at the time.

The FY 2013 direct care inpatient ASA rates are computed based on the Military Health System direct care standardized cost to provide a single Medicare Severity Relative Weighted Product (MS-RWP). The MS-RWP is a Medicare Severity Diagnosis Related Group (MS-DRG) based measure of the relative costliness of a given discharge. The average standardized cost per MS-RWP for hospitals in locations with area wage rates greater than 1.0, less than or equal to 1.0, and overseas are published annually as inpatient ASAs shown in Table 1. This approach maintains compatibility with both Medicare and TRICARE ASA policies. The ASA rates will be applied to the MS-RWP for each inpatient case, determined from the TRICARE MS-DRG weights, outlier thresholds, and payment rules to calculate the reimbursement charge. The Department of Defense (DoD) publishes these data annually for hospital reimbursement rates under TRICARE/Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) pursuant to 32 Code of Federal Regulations 199.14(a)(1). Due to data system limitations, for Military Treatment Facilities (MTFs), direct care adjustments are made for length of stay (LOS) outliers rather than high cost outliers.

Table 1 provides the average direct care inpatient ASA rates for third party billing, interagency billing and International Military Education and Training (IMET) billing for three core-based statistical areas (CBSA) (high area wage index, low area wage index, and overseas).

^ Hawaii and Alaska are not considered overseas for billing purposes.

The IMET program is a key funding component of U.S. security assistance that provides training on a grant basis to students from allied and friendly nations. Authority for the IMET program is found pursuant to Chapter 5, part II, Foreign Assistance Act 1961. Funding is appropriated from the International Affairs budget of the Department of State. Not all foreign national patients
participate in the IMET program. The IAR ASA rates are used to bill other federal agencies. The full/TPC ASA rates are used to bill insurance carriers, pay patients, and other payers.

Each MTF providing inpatient care has its own applied ASA rates (shown in Appendix A). The MTF-specific ASA rates are the average ASA rates adjusted for indirect medical education costs, if any, for the discharging hospital. The product of the discharge specific MS-RWP and the MTF-applied ASA rate is the charge submitted on the claim and is the amount payers will use for reimbursement purposes. The individual ASAs are published on the TRICARE Management Activity Management Control & Financial Studies Web site for the Uniform Business Office (http://www.tricare.mil/ocfo/mcfs/ubo/mhs_rates.cfm). Examples of how to calculate the reimbursement charge are shown in Section 2.0.

The ASA per MS-RWP used in the direct care system is comparable to procedures used by the Centers for Medicare and Medicaid Services (CMS) and TRICARE. The expenses represented by the ASAs include all direct care expenses associated with direct inpatient care. The inpatient ASAs include the cost of both inpatient professional and institutional services. The ASA rates apply to reimbursement from TPC, IMET and IAR payers. Pursuant to the provisions of 10 United States Code (U.S.c.) 1095, the breakdown of total inpatient charges is 93 percent for institutional charges and 7 percent for professional charges. When preparing bills for inpatient services, professional fees are based on the privileged provider services. The hospital institutional fees are based on the costs for support staff, facility costs, ancillary services, pharmacy, and supplies.

MTFs without inpatient services, whose providers perform inpatient care in a civilian facility for a DoD beneficiary, can bill payers the percentage of the ASA/MS-RWP based charge that represents professional services. In the absence of a MTF-applied ASA rate for the facility, the ASA rate used will be based on the average for the type of CBSA in which the MTF is located—areas with wage rate indices greater than 1.0, less than or equal to 1.0, or overseas. The MTF Business Office must receive documentation of care provided in order to produce an appropriate bill.

1.1 Family Member Rate (FMR)

The FY 2013 FMR is $17.35 per day. The FMR is established by authority of 10 U.S.C., Section 1078.

2.0 Examples Applying ASAs to Compute Inpatient Stay Charges

The cost to be recovered is the product of the MTF applied ASA rate and the MS-RWPs specific to the inpatient medical services provided. This includes the costs of both inpatient institutional and professional services. Billing in the examples below is at the full/TPC rate.

For each MS-DRG, TRICARE establishes short stay and long stay thresholds. An inlier is any discharge with a LOS greater than the short stay threshold, equal to or less than the long stay threshold. An outlier is any discharge with a LOS less than the short stay
threshold or greater than the long stay threshold. Example charge computations are provided below for both inlier and outlier discharges. The full list of TRICARE MS-DRGs with MS-DRG case weights, long stay thresholds, short stay thresholds and other information is provided at http://tricare.mil/ocfo/mcfs/ubo/mhs_rates/inpatient.cfm.

Table 2 provides the information used in the billing examples for a non-teaching hospital (DMIS ID 0098—Reynolds Army Community Hospital, Fort Sill, Oklahoma) in an Area Wage Index ≤1.00 location for a discharge in MS-DRG 765—Cesarean section with complications and comorbidities/major complications and comorbidities (CC/MCC).

<td>21 days</td>
<td>5</td>
<td>0.4024</td>
</tr>
</tbody>
</table>

Example #1 provides an example of the charge for an inlier LOS discharge in MS-DRG 765. The MS-RWP for an inlier case is the CHAMPUS MS-DRG weight of 0.8779. The MS-DRG weight used in these examples is the FY 2012 Version 29 TRICARE DRG weight. The charge is the product of the MS-RWPs and the MTF applied ASA rate.

a) The FY 13 MTF-Applied TPC ASA rate is $10,465.46 (Reynolds Army Community Hospital’s TPC rate as shown in Appendix A).

b) The MTF amount to be recovered is the MS-DRG weight (0.8779) multiplied by the MTF-Applied TPC ASA ($10,465.46).

c) The inlier cost to be recovered is computed below.

TPC Amount Billed: MTF-Applied TPC ASA rate multiplied by the
MS-DRG weight

\[ = \$10,465.46 \times 0.8779 = \$9,187.63 \]

Example #2 provides the example of the charge for an outlier LOS discharge in MS-DRG 765. The total MS-RWP for an outlier case is a combination of the CHAMPUS MS-DRG weight plus additional MS-RWP credit for each day that the LOS exceeds the Long Stay Threshold. The charge is determined by multiplying the total MS-RWPs by the MTF applied ASA rate.

a) For the outlier MS-RWP value calculation, 33 percent of the per diem weight is multiplied by the number of outlier days. The number of outlier days is computed as the actual LOS minus the Long Stay Threshold. Per diem weight is determined by dividing by the MS-DRG weight by the Geometric Mean LOS.

\[
\text{LOS Outlier MS-RWP value calculation} = .33 \times \left( \frac{\text{MS-DRG Weight/Geometric Mean LOS}}{\text{Geometric Mean LOS}} \right) \times (\text{Patient LOS} - \text{Long Stay Threshold})
\]

\[
= .33 \times \left( \frac{0.8779}{3.6} \right) \times (21 - 16)
\]

\[
= .33 \times .24386 \times (21 - 16)
\]
