WTU P-MART

The Pharmacoeconomic Center and Pharmacy Operations Center developed the WTU report in order to support the “Warriors in Transition High-Risk medication Review and the Sole Provider Program.” The objective is to identify individuals who may require a more intensive medical review, to identify potential at-risk patients or to monitor adherence to a sole provider program.

The WTU reports uses the provided roster of service members and pulls all anti-depressants, anti-psychotics, sedative hypnotics, and controlled substances. The results are three specific reports listing all corresponding medications and those service members on those medications.

WTU P-MART | Warrion in Transition Prescription Medication Analysis

The Pharmacoeconomic Center (PEC) developed the WTU report in order to support the "Warriors in Transition High-Risk Medication Review and the Sole Provider Program."

High Risk Medications are defined here as those medications, alone or in combination, which have the potential to cause significant adverse effects that may be lethal. Included are medications used in psychiatric conditions, insomnia, epilepsy, smoking cessation, and others that have a narrow therapeutic index.

Controlled substances are those medications categorized by the federal government as having a higher potential for abuse or addiction. The included drugs are designated as Schedule II - V according to their medical use, potential for abuse, and safety or dependence liability.

Chronic medications, often referred to as maintenance medications, are those drugs taken on a routine bases and when not provided, have the potential for therapeutic failure.

This database contains Privacy Act information and is subject to criminal, civil and/or administrative penalties to those who willfully misuse this information and violate a person's rights under the Privacy Act. Reasonable and necessary security should be in place to protect this data from unauthorized users.

This program was developed by the TMA Pharmacoeconomic Center, Ft. Sam Houston, Texas. Please send any comments or suggestions to us at P-MART@amedd.army.mil or call 866-275-4732 and press option 8.
