Athens Login   June 17, 2013

The Defense Medical Virtual Library (DMVL) uses the Athens identity authentication system.

- When you need to login to access a resource, always look for the Athens login option.
- If it isn't the main login, it is typically placed either in the upper right hand corner or below the database vendor's login.
- If you try logging in and you are not in an Athens login, your login will be unsuccessful.
