

## **How to Find a Full Text Article – Revised July 13, 2015**

Access the Defense Medical Virtual Library (DMVL) at [www.health.mil/dmvl](http://www.health.mil/dmvl) and enter the DMVL portal.

You will enter the portal on the e-Journals tab. Select “**Citation Matcher**” located on the top of the page.

The most efficient search is to enter the PubMed ID (PMID) or the DOI. If you don't have the PubMed ID/DOI, enter the article title.

***If Citation Matcher does not recognize the article title, input all the bibliographic elements, i.e., journal title, first author's name, volume, issue, date of publication, and pagination.***

Then click on “**Match**”. If the article is available in full text, click on the database link. The link will take you to the full text. ***Many databases will require you to enter your Athens ID/Password again. Be sure to select the “Athens” login.***

If the article is not available in full text you will receive the message, “**Sorry, no full text sources have been identified for this citation**”, you may request the document thru “**Document Delivery**”.

Click on “**Document Delivery**”. Citation Matcher will paste your bibliographic citation into the request form. Fill in your name and email address, and click “**Send**”. Your request will be relayed to the DMVL staff.

**\*\*\*Incomplete citations will delay the receipt of your article.\*\*\***

**\*\*\*Document Delivery is for articles NOT available to you on the DMVL.\*\*\***
