How Do I “Mosquito-Proof” My Home?

1. Empty any standing water around your home.
2. Ensure window/door screening is in good repair.
3. Maintain your landscape through consistent mowing and trimming.
4. Avoid using electric “bug zappers” or other similar mosquito attraction devices.
5. Contact your local mosquito control district to schedule an area review or to report issues concerning mosquitoes.

Protect Yourself and Your Family

1. Remove any standing water in your yard.
2. Use a lotion or spray with an EPA approved insect repellent with at least 20% Picaridin or DEET and/or IR3535.
3. Wear clothing treated with a long-lasting insecticide such as Permethrin.
4. Avoid outdoor activities during peak mosquito activity.
5. Place mosquito netting over infant carriers.

Facts About Mosquitoes

Backyard mosquitoes can transmit diseases such as Chikungunya, Dengue Fever, and Zika.

Mosquitoes can develop in a spoon-full of water.

These mosquitoes do not fly far from where they’re breeding.

If you are being bitten, they’re breeding nearby!
