This style guide applies to most products developed for diverse public audiences, such as news articles, or content written for MHS/DHA websites, presentations and marketing materials for conferences, and content intended for distribution to our workforce. When writing for professional journals targeting

specific medical or scientific audiences, defer to the style guide for those publications. If you are writing scientific or clinical content intended for distribution on public-facing MHS or DHA websites, confer with your public affairs office to determine how best to use this style guide for your particular content.

RULES ON READABILITY

Writers and editors should follow the most recent edition of the Associated Press Stylebook, except as noted in this Style Guide.

Where there are questions about branding or trademarks, please see the individual brand's branding guide.

You can enable readability statistics in Microsoft Word. Once enabled, Word will display these readability scores once it finishes checking the spelling and grammar.

Learn more about plain language at www.plainlanguage.gov.

When creating new or updating existing content, you must use these style elements. **You are not required to go back and update content for the sole purpose of aligning to these style elements.**

Write in second person when possible. examples below.

STYLE GUIDE

24/7

Should appear as above using numerals.

aboard

Aboard a ship, not on board, on-board, or onboard a ship.

academic degrees

Use an apostrophe for bachelor's degree, master's degree, etc. However, there is no possessive in Bachelor of Arts or Master of Science (also note initial cap of degree in this instance). It is redundant to use both a title and academic/medical degree.

For example: It is redundant to use Dr. John Jones, MD. Use either Dr. John Jones or John Jones, MD.

acronyms

In general, to keep writing clear and unambiguous, avoid acronyms. If used, use acronyms sparingly. Do not follow first use with the acronym in parentheses. If an acronym would not be clear on second reference without this arrangement, do not use it. Highly recognizable acronyms, as noted on page 16 of this guide, do not get spelled out or defined on first use. Punctuate acronyms according to AP style unless specified otherwise in this guide.

active voice vs. passive voice

Always strive to write in the active voice. 10% or less should be passive

active duty family member

Not capitalized unless at the beginning of a sentence, and in that scenario, only initial caps at the beginning of the sentence.

For example: Active duty service members are the sponsors.

active duty service member

Not capitalized unless at the beginning of a sentence, and in that scenario, only initial caps at the beginning of the sentence.

For example: Active duty service members are the sponsors.

addresses

Use the abbreviations Ave., Blvd., and St., and the two-letter state postal abbreviation when listing addresses. Use periods with P.O. Box. Spell out street and state names in the text when used without a specific address.

For example:

- The parade began on Elm Street in New Haven, Connecticut.
- Naval Hospital Jacksonville is located at 2080 Child St., Jacksonville, FL.

affect vs. effect vs. impact

Affect as a verb means “to influence.” *The game will affect the standings.*

Affect as a noun is occasionally used in psychology to describe an emotion, but there is no need for it in everyday language.

Effect as a verb means “to cause.” *He will effect many changes in the company.*

Effect as a noun means “result.” *He miscalculated the effect of his actions.*

Impact as a verb means “strike with a blow” or “to pack firmly together.” *The wisdom tooth impacted the molar.* Impact as a noun means “a collision.” *The constant impact of the two gear mechanisms on each other eventually produced metal fatigue in several sprockets.* Do not use **impact** as a verb in place of “to affect.” Do not use **impact** as a noun in place of “effect.”

ages

Always use numerals. When writing an age range, use an en dash (with no spaces) between the numbers. Do not use a hyphen or an em dash.

First example:

Second example:

- Flossing twice a day
- Brushing your teeth after every meal

Bulleted lists should be initial capped (first word only). Do not put periods after phrases or clauses—use periods after complete sentences only.

Note: It is OK if some items in a bulleted list have a period at the end and others do not.

bullets (sub)

Use solid square bullets for sub-bullets as screen readers don't recognize open circles as bullets. Indent so the bullet marker is directly beneath the first letter of the primary bullet above it.

For example:

- This is how you use a first tier bullet. See above for more information.
- This is an example of how to use sub-bullets correctly in

Word document drafts.

It should appear flush right at the bottom of the article or chart on the first page. Use “(Continued from page X)” on the continuing page, appearing flush left at the top of the article or chart.

CONUS

All uppercase. Generally refers to the 48 contiguous United States. With TRICARE, use CONUS only for TRICARE dental products. CONUS service area includes the 50 United States, the District of Columbia, Puerto Rico, Guam, and the U.S. Virgin Islands. Also, see *OCONUS* and *stateside*.

Never copy or co-payment.

costs

En dashes (–) for intervals of any kind (for example, ages, time): Use the en dash to indicate an interval or in place of “to” in periods of time, for example, 1999–2019, Monday–Friday, ages 18–64. The en dash should have no spaces

before or after it. Do not use the en dash when the words “from” or “between” are used.

Months with specific date: Follow AP style. When months are used with specific dates, abbreviate months with six or more letters (Jan., Feb., Aug., Sept., Oct., Nov., Dec.). Spell out when used alone, or with a year alone.

Days of the week: (per AP style guide) Capitalize them. Do not abbreviate, except when needed in a tabular format: Sun, Mon, Tue, Wed, Thu, Fri Sat (three letters without period, to facilitate tabular composition.)

Months with specific date and year: When a phrase refers to a month, day, and year, set off the year with commas.

For example: It's known that Feb. 8, 1964, was a great day in history.

Ranges: Insert an en dash between the dates with no spaces.

For example: Oct. 15–Nov. 28.

doctor

Use Dr. in first reference as a formal title before the name of an individual who holds a doctor of dental surgery, doctor of medicine, doctor of optometry, doctor of osteopathic medicine, doctor of pediatric medicine, or doctor of veterinary medicine: Dr. Jonas Salk. Do not continue the use of Dr. in subsequent references.

Do not use Dr. before the names of individuals who hold other types of doctoral degrees. Instead, when necessary or appropriate, for a specific audience: Cassandra Karoub, who has a doctorate in mathematics, was lead researcher. In a list: Stephanie D'Ercole, Ph.D.

drug categories

Use drug categories instead of drug tiers when referring to prescription drugs in the TRICARE Pharmacy Program. TRICARE groups prescription drugs into four categories: generic formulary drugs, brand-name formulary drugs, non-formulary drugs, and non-covered drugs. Describe drug categories by their name, not level.

For example: “non-covered drugs” instead of “tier four”

drug vs. medication

Preference is to use drug for plain language purposes, but medication is acceptable to avoid overly repetitious wording. Never use medicine to mean drug or medication, as it most commonly means “the science or practice of the diagnosis, treatment, and prevention of disease.”

Covered Services form (DD Form 1234). Note that the form number is not rendered in italics when used with the form title. However, when used without the form title, render stand-alone *DD Form 1234* in italics.

Note: Some form titles vary by region. Always verify by accessing the actual form and using the name on the form itself.

Always lowercase unless in direct reference to specific agencies

For example: Government Accountability Office.

DD Form numbers should follow the full name of the form in a non-italic parenthetical.

- Avoid splitting dates or separating numbers from their nouns across two lines.

For example: Jan. 31, 2009, 30 days, 115%.

- Avoid widows. A widow is typically a single word or the end of a hyphenated word at the end of a paragraph or column. A widow is poor typography because it leaves too much white space between the paragraph it ends and the start of the next paragraph. Fix by editing the paragraph or adjusting character spacing.
- Avoid separating an introduction to a bulleted list from the bullets it is introducing. This applies particularly for non-newsletter publications.
- Avoid using directionals (for example, listed above, shown to the right, outlined below). Instead use: the following list, the list provided, etc.
- When possible, avoid splitting a bullet across a non-spread. Never split a phone number across two lines.
- Avoid splitting a URL if it will fit on a single line. Flow it to the following line to avoid splitting. When it is necessary to

split a long URL, split it at an intuitive point (at a forward slash) rather than in the middle of a word or term. URLs in electronic documents should hyperlink to meaningful text that describes the link.

- Do not hyperlink qualified URLs as www.google.com
- Hyperlink to meaningful text, such as [search for anything](#), and not click [here](#) (where here is the hyperlink)
- This ensures your links are accessible for users of assistive technology.

use vs. utilize

The difference between *use* and *utilize* can be found in the purpose for which you are employing something.

To *use* something means to employ it for its given purpose:

- I use my garage to park my car.

To *utilize* something is to turn it to a practical use. When you utilize something, you give it a new use that it may not originally have had.

- You can utilize Microsoft Word to draw pictures.

To choose between *use* and *utilize*, you need to assess whether the item you are referring to is usually employed in the manner to which you are attributing it. Here's an example with a pencil:

- You can *use* my pencil for the sketch if yours is blunt.
- The airport security confiscated her pencil because they were concerned it may be *utilized* as a weapon.

Use in place of United States as a noun or an adjective, except in headlines. In headlines, use "US" without periods. Do not abbreviate in proper names where it is spelled out.

Note: Spell out United States when it appears with a quantifying number, for example, "50 United States and the District of Columbia."

ABOUT THE MILITARY HEALTH SYSTEM

The Military Health System is America's largest and most complex health care system and the world's preeminent military health care delivery operation. We save lives on the battlefield, combat infectious disease around the world, and care for 9.6 million TRICARE beneficiaries, the nation's largest health benefit plan.

The MHS is more than just combat medicine. We are a system that provides health care delivery at home, medical education, public health, and innovative medical research and development.

While our system is complex, our goals are clear:

- Ensure America's active duty and reserve component personnel are healthy so they can complete their national security missions
- Ensure that all active and reserve medical personnel in uniform are trained and ready to provide medical care in support of operational forces around the world
- Provide a medical benefit to uniformed service members, retirees, and their families that is equal to the service and sacrifice they give to our country.

Our unique patient needs related to combat readiness and recovery means the MHS has experience and conducts research others will not. Readiness goals—not profit margins—drive how we provide care and conduct research. Because of this, many MHS treatments and discoveries have been adapted for use in the private sector.
