DEPARTMENT OF DEFENSE (AFHSC)

West Africa Ebola Surveillance Summary #85

12 FEB 2015 (next report 19 FEB 2015)

CASE REPORT: Since the previous summary (9 FEB), there has been an increase of 167 confirmed, suspected, and probable Ebola virus disease (EVD) cases (+91 deaths), bringing the total to 22,843 cases (9,177 deaths). These cases and deaths are reported from Guinea, Liberia, and Sierra Leone, where ongoing transmission continues; Senegal, Nigeria, United States, Spain, and Mali, where there have been no incident cases over at least the past 21 days; and the United Kingdom, which reported one travel-related case (Sierra Leone) on 29 DEC 2014.

In a 11 FEB 2015 [situation report](#), WHO said total weekly case incidence increased for the second consecutive week; there were 144 (+20) new confirmed cases reported between 2 FEB and 8 FEB: 65 (+26) in Guinea, 3 (-2) in Liberia, and 76 (-4) in Sierra Leone. The WHO attributed the increase to continued community resistance in Guinea, widespread transmission in Sierra Leone, and 75 unsafe burials in both countries. As of 2 FEB, Liberia is tracking a single chain of transmission in Monrovia, Montserrado County. Over the most recent three-week period with available data, total cases have increased 4% in Liberia (ending 7 FEB), 4% in Sierra Leone (ending 8 FEB), and 6% in Guinea (ending 8 FEB).

On 20 JAN 2015, WHO convened the fourth Emergency Committee meeting on the 2014 EVD outbreak. [The Committee unanimously agreed](#) that the outbreak continues to constitute a Public Health Emergency of International Concern (PHEIC). The committee also stated that all previous temporary recommendations remain in effect with some additional advice on exit screening and active surveillance in border areas.

DoD SURVEILLANCE GUIDELINES: On 31 OCT 2014, the Under Secretary of Defense (USD) for Personnel and Readiness [issued a memorandum](#) providing guidance for training, screening, and monitoring for DoD personnel deployed to Ebola outbreak areas. The USD also published electronic versions of the [Ebola risk evaluation form](#) (DD2990) and [redeployment risk assessment form](#) (DD2991). On 5 JAN 2015, the Armed Forces Health Surveillance Center published [updated guidelines](#) for the detection and reporting of DoD cases of EVD.

MEDICAL COUNTERMEASURES: There are no approved vaccines or specific treatments for EVD. NIH reports that a [Phase 2/3 clinical trial](#) called PREVAIL is testing the GSK and Merck vaccines in Liberia starting 2 FEB 2015. A vaccine produced by Johnson & Johnson with Bavarian Nordic [began safety trials](#) in Britain on 6 JAN 2015. On 12 FEB, Novavax Inc. [announced the start of their Ebola GP vaccine Phase 1 clinical trial in Australia](#). Of [four drug candidates](#), ZMAPP, TKM-Ebola, brincidofovir, and favipiravir, the latter two started [trials in West Africa](#) but trials of brincidofovir were halted on 31 JAN because there are too few patients available. On 2 JAN 2015, Aethlon Medical Inc. [reported FDA approval](#) of their request to test an anti-viral hemopurification device on EVD patients in the U.S. at the Nebraska Medical Center. The device was [successfully used](#) on a patient in Germany. Stada, a German pharmaceutical firm, [will launch a new test](#) for Ebola in MAR 2015; tests will be distributed to aid organizations in West Africa. WHO, with Guinea, Sierra Leone and Liberia, continue to develop capacity to collect and use convalescent sera from recovered Ebola patients to experimentally treat ill patients in West Africa. On 9 DEC 2014, [HHS offered liability protections](#) to drug makers developing Ebola vaccines.

DEPARTMENT OF DEFENSE (AFHSC)

West Africa Ebola Surveillance Summary #85

12 FEB 2015

DoD RESPONSE: About 1,300 DoD personnel are currently deployed in West Africa for the Ebola response. On 11 FEB, President Obama said that approximately 100 DoD personnel would remain as the response transitions to support provided mostly by civilian employees of government agencies and volunteers. In Liberia, one Ebola testing laboratory manned by personnel from the U.S. Naval Medical Research and four Army Area Medical Laboratories are fully operational. DoD has completed and transferred to USAID all ten planned ETUs. DoD plans to transfer two of the mobile Army labs to the Government of Liberia for their sustained use. On 23 JAN 2015, Press Secretary Admiral Kirby said, "OUA does not require several National Guard units that were initially considered for deployment," [confirming that U.S. forces](#) will leave West Africa.

On 8 JAN 2015, SECDEF signed a memo delegating authority to use DoD aircraft to transport Ebola symptomatic or exposed DoD personnel. On 17 DEC 2014, the CJCS issued an updated [CJCSI 4220.01A](#), implementing SECDEF's 21-day controlled monitoring policy. The updated policy lays out who is affected and how the monitoring will be conducted, including naming seven monitoring sites: Ft. Bliss, TX; JB Langley-Eustis, VA; Ft. Hood, TX; Ft. Bragg, NC; and JB Lewis-McCord, WA in CONUS, plus USAG Baumholder, Germany and Caserma Del Din, Vicenza, Italy, OCONUS. On 7 NOV 2014, [DoD issued guidance](#) on medical care of DoD civilians deployed to Ebola outbreak areas.

FDA has issued [Emergency Use Authorizations \(EUA\)](#) for several in vitro diagnostics for detection of Ebola virus. Under the EUAs, the DoD EZ1 real time RT-PCR Ebola Zaire virus detection assay developed by USAMRIID is approved for human diagnostic testing at the following DoD labs: USAMRIID, Landstuhl RMC, NIDDL at NMRC, NHRC, NAMRU-3, NAMRU-6, William Beaumont AMC, Carl R. Darnall AMC, Madigan AMC, Tripler AMC, and SAAMC. In Liberia, the Navy's mobile lab and the USAMRIID-supported Liberian Institute for Biological Research in Monrovia are qualified to perform Ebola diagnostic testing on U.S. personnel. Joint Base Langley-Eustis, Carl R. Darnall AMC, Wright-Patterson MC, WRNMMC, SAAMC, Madigan AMC, Womack AMC, Landstuhl RMC, and NIDDL have been approved as BioFire FilmArray NGDS BT-E Assay testing sites. The most recent assay approved under the EUA was the Roche [LightMix® Ebola Zaire rRT-PCR Test](#) for the presumptive detection of Ebola Zaire virus in individuals with signs and symptoms of Ebola disease, on 23 DEC 2014.

USG AND GLOBAL RESPONSE: Current information and guidance is available at the [CDC](#) and [WHO](#) Ebola web sites. On 5 FEB, CDC published a graphic on [preventing Ebola by screening travelers](#) and guidance on [influenza vaccination and treatment](#) for patients in active monitoring. On 11 FEB, the White House press office released a [fact sheet](#) outlining the international and domestic efforts made in response to Ebola in the U.S. and West Africa. On 10 FEB, WHO's Dr. Bruce Aylward [commented](#) on the upcoming challenges expected to affect response efforts including continued resource availability, sustained financing commitments, and logistical challenges that may be created by the upcoming rainy season.

TRAVEL ADVISORY: The U.S. announced on 21 OCT 2014 that [all flights carrying travelers from the affected West African nations](#) must enter the U.S. through one of the five designated airports that are conducting enhanced screening for EVD (JFK, Newark Liberty, Washington Dulles, Chicago O'Hare, and Atlanta Hartsfield-Jackson). On 5 JAN 2015, the U.S. ended the screening requirement for [travelers from Mali](#) and on 6 JAN, the CDC removed its [Alert – Level 2, Practice Enhanced Precautions](#) for Mali. The CDC is maintaining its [Warning - Level 3, Avoid Nonessential Travel](#) advisory for Guinea, Sierra Leone, and Liberia. On 2 NOV 2014, U.S. Customs and Border Protection (CBP) said U.S. military aircraft do not need to be re-routed to one of these airports, provided that CBP has ensured the established DoD screening protocols will take place at the arrival location. On 28 OCT 2014, the CDC recommended that state public health departments [begin direct active post-arrival monitoring for 21 days](#) along with other movement restrictions based on a traveler's exposure risk category using CDC definitions. On 20 JAN 2015, WHO reaffirmed the need to avoid unnecessary interference with international travel and trade.

West Africa Ebola Surveillance Summary #85

12 FEB 2015

Latest Available Ebola Case Counts in or Related to West Africa, 2014-2015

Country (as of date)	EVD Cases All / Lab Confirmed	Deaths All / Lab Confirmed	EVD Cases in HCW / Deaths	Contacts Being Followed
Guinea (8 FEB)	3,044 (+56) / 2,674 (+46)	1,995 (+38) / 1,643 (+35)	166 (+2) / 88	1,195
Liberia (7 FEB)	8,830 (+106) / 3,146 (+1)	3,823 (+46) / NA	371 / 179	271
Sierra Leone (8 FEB)	10,934 (+5) / 8,149 (+13)	3,344 (+7) / 2,978 (+7)	293 (+6) / 221	7,030
United Kingdom (22 JAN)	1 / 1 ***	0 / 0	1 / 0***	0
United States (4 DEC)	4 / 4* **	1 / 1	3 / 0	0
Mali (21 DEC)	8 / 7	6 / 5	2 / 2	0
Nigeria (17 SEP)	20 / 19	8 / 7	11 / 5	0
Senegal (20 SEP)	1 / 1*	0 / 0	0 / 0	0
Spain (2 DEC)	1 / 1	0 / 0	1 / 0	0
Total	22,843 (+167) / 14,002 (+60)	9,177 (+91) / 4,634 (+42)†	848 (+8) / 495	8,496

Case Fatality Proportion: As of 11 FEB 2015, the WHO said the case fatality rate in the three intense-transmission countries among cases for whom a definitive outcome is recorded is between 53% and 60%. For hospitalized patients, the case fatality rate is 55% in Guinea, 59% in Liberia, and 61% in Sierra Leone.

†Excluding Liberia / *Imported from Liberia / **1 imported from Guinea / ***Imported from Sierra Leone / NA = Not Available

Shaded countries have been declared Ebola transmission-free by WHO.

The total number of cases is subject to change due to reclassification, retrospective investigation, consolidation of cases and laboratory data, and enhanced surveillance.

Text updated from the previous report will be printed in red; items in (+xx) represent the change in number from the previous AFHSC summary (9 FEB 2015).
