# 2010 Health Care Survey of DoD Beneficiaries: 

## Adult Codebook and User's Guide

May 2010
Quarter II
Survey Fielded: J anuary 2010

Submitted to:
TRICARE Management Activity
5111 Leesburg Pike, Suite 510
Falls Church, VA 22041
(703) 681-3636

Task Order Officer:
Richard R. Bannick, Ph. D., FACHE

Submitted by:
Mathematica Policy Research, Inc.
600 Maryland Ave., SW, Suite 550
Washington, DC 20024-2512
(202) 484-9220

Project Director:
Eric Schone, Ph. D.

## TABLE OF VARIABLES

|  |  | Page |
| :---: | :---: | :---: |
| Sampling Variables |  |  |
| MPRID | - Unique MPR identifier | 103 |
| SVCSMPL | - Branch of service sampling variable. | 103 |
| SEXSMPL | - Sex sampling variable | 103 |
| STRATUM | - Sampling stratum ...... | 103 |
| ENBGSMPL | - Enrollment by beneficiary category | 110 |
| MPCSMPL | - Military personnel category | 110 |
| NHFF | - Stratum sample size | 110 |
| QUARTER | - Survey quarter | 110 |
| D_HEALTH | - Health service region | 111 |
| TNEXREG | - TRICARE next generation of contracts region grouping | 111 |
| SERVAFF | - Service affiliation | 111 |
| BWT | - Basic sampling weight | 112 |
| DEERS VARIABLES |  |  |
| RACEETHN | - Race/Ethnic code | 112 |
| PNSEXCD | - Person gender | 112 |
| RDAGEQY | - Age at time of data collection-Capped(18 and below, 86 and above) | 113 |
| RFLDAGE | - Age at start of fielding period-Capped(18 and below, 86 and above) | 113 |
| PCM | - Primary manager code (civilian or military) | 113 |
| ACV | - Alternate care value. | 114 |
| DBENCAT | - Beneficiary category | 114 |
| DSPONSVC | - Derived sponsor branch of service | 115 |
| PATCAT | - Aggregated beneficiary category... | 115 |
| PNTYPCD | - Person type code.. | 115 |
| Questionnaire Responses |  |  |
| H10001 | - Are you the person listed on envelope | 115 |
| H10002A | - Health plan(s) covered: TRICARE Prime | 116 |
| H10002C | - Health plan(s) covered: TRICARE Ext/Stnd | 116 |
| H10002N | - Health plan(s) covered: TRICARE Plus ....... | 116 |
| H10002O | - Health plan(s) covered: TRICARE For Life | 116 |
| H10002P | - Health plan(s) covered: TRICARE Supplemental Insurance | 116 |
| H10002Q | - Health plan(s) covered: TRICARE Reserve Select | 117 |
| H10002F | - Health plan(s) covered: Medicare. | 117 |
| H10002G | - Health plan(s) covered: FEHBP | 117 |
| H10002H | - Health plan(s) covered: Medicaid | 117 |
| H10002I | - Health plan(s) covered: Civilian HMO | 117 |
| H10002J | - Health plan(s) covered: Other civilian. | 118 |
| H10002K | - Health plan(s) covered: USFHP | 118 |
| H10002M | - Health plan(s) covered: Veterans | 118 |
| H10002R | - Health plan(s) covered: Other Non-US government health insurance | 118 |
| H10002L | - Health plan(s) covered: Not sure................................................... | 118 |
| H10003 | - Which health plan did you use most in the past 12 months? | 119 |
| H10004 | - Months or years in a row with health plan | 119 |
| H10005 | - In last year: facility used most for health care | 120 |
| H10006 | - In last year: have illness/injury/condition that needed care right away | 120 |
| H10007 | - In last year: how often got care as soon as you believed you need it | 120 |
| H10008 | - In last year: wait between trying to get care and actually seeing a provider for an illness or injury. | 121 |
| H10009 | - In last year: made appointments for non-urgent health care......................... | 121 |
| H10010 | - In last year: how often got appointments for non-urgent health care as soon as you wanted | . 121 |
| H10011 | - In last year: days between making an appointment for regular or routine care and actually seeing a provider | 122 |

H10012 - In last year: times went to an emergency room for own care ..... 122
H10013 - In last year: times went to a doctors office or clinic for yourself (not counting times went to an emergency room) ..... 122
H10014 - In last year: how often talk to doctor or other health care provider about illness prevention ..... 123
H10015 - In last year: doctor or other health care provider talked about more than 1 choice for treatment ..... 123
H10016 - In last year: doctor talked about pros/cons of each treatment/health care choice ..... 123
H10017 - In last year: doctor/health care provider asked which treatment option you thought was best for you when there was more than one choice of treatment ..... 124
H10018 - Rating of all health care in last year ..... 124
H10019 - Have one person you think of as your personal doctor ..... 124
H10020 - In last year: number of times visited personal doctor for care for self. ..... 125
H10021 - In last year: how often personal doctor listened carefully to you ..... 125
H10022 - In last year: how often personal doctor explained things in a way that was easy to understand ..... 125
H10023 - In last year: how often your personal doctor showed respect for what you have to say ..... 126
H10024 - In last year: how often your personal doctor spent enough time with you ..... 126
H10025 - In last year: got care from doctor or other health provider other than personal doctor ..... 126
H10026 - In last year: how often personal doctor seemed informed and up-to-date about care received from other doctors ..... 127
H10027 - Rating of your personal doctor ..... 127
H10028 - In last year: tried to make appointment to see a specialist. ..... 127H10029
128H10030- In last year: how often it was easy to get appointments with specialists
H10031

- In last year: how many specialists seen ..... 128
- Rating of specialist seen most often in last year ..... 128H10032
- In last year: tried to get care, tests, or treatment through health plan ..... 129
H10033
,
- In last year: how often easy to get care, tests, or treatment you thought you needed through health plan ..... 129
H10034B - In last year: looked for information in written material or on the Internet about how health plan works ..... 129
H10034 - In last year: how often written material/Internet provide information you needed about how your plan works ..... 130
H10035 - In last year: looked for information from health plan on cost of health care service or equipment ..... 130
H10036 - In last year: how often able to find out cost of health care service or equipment from health plan ..... 130
H10037 - In last year: looked for information from health plan on cost of prescription medications ..... 131
H10038 - In last year: how often able to find out cost of prescription medications ..... 131
H10039 - In last year: tried to get information or help from health plan's customer service ..... 131
H10040 - In last year: how often did customer service give needed information or help ..... 131
H10041 - In last year: how often did customer service treat with courtesy and respect ..... 132
H10042 - In last year: health plan gave forms to fill out ..... 132
H10043 - In last year: how often forms from health plan were easy to fill out. ..... 132
H10044 - In last year: sent in any claims to your health plan ..... 133
H10045 - In last year: how often health plan handled claims quickly ..... 133
H10046 - In last year: how often health plan handled claims correctly ..... 133
H10047 - Rating of all experience with health plan ..... 134
H10048 - Blood pressure: when last reading ..... 134
H10049 - Blood pressure: know if blood pressure is too high or not ..... 134
H10050 - When did you last have a flu shot ..... 135
H10051 - Smoked at least 100 cigarettes in life. ..... 135
H10052 - Smoke everyday, some days, or not at all. ..... 135
H10053 - Last year: number of visits advised to quit smoking ..... 136
H10054 Last year: number of visits n
assist with quitting smoking ..... 136
H10055 - Last year: number of visits recommended or discussed methods and strategies to assist quitting smoking ..... 136
H10056 - Are you male or female ..... 137
H10057 - Female: last have a Pap smear test. ..... 137
H10058 - Female: are you under age 40 ..... 137- Female: last time breasts checked mammography138
- Female: been pregnant in last year or pregnant now ..... 138H10061
138H10062- Female: in what trimester is your pregnancy
139H10063- Female: trimester first received prenatal care
139H10064- In general how would you rate your overall health
- Limited in any way in any activities because of any impairment or health problem ..... 139
H10065 - In last year: seen doctor or other health provider 3 or more times for same condition or problem ..... 139
H10066 - Condition lasted for at least 3 months ..... 140
H10067 - Need to take medicine prescribed by a doctor ..... 140
H10068 - Medicine to treat condition that has lasted for at least 3 months ..... 140
H10069F - Feet portion of height without shoes. ..... 140
H10069 - Inches portion of height without shoes ..... 141
H10070 - Weight without shoes in pounds ..... 141
SREDA - Highest grade completed ..... 146
H10071 - Are you Spanish, Hispanic, or Latino ..... 146
H10071A - No, not Spanish, Hispanic, or Latino ..... 146
H10071B - Yes, Mexican, Mexican American, Chicano ..... 147
H10071C - Yes, Puerto Rican ..... 147
H10071D - Yes, Cuban ..... 147
H10071E - Yes, other Spanish, Hispanic, or Latino ..... 147
SRRACEA - Race: White ..... 147
SRRACEB - Race: Black or African American. ..... 148
SRRACEC - Race: American Indian or Alaska native ..... 148
SRRACED - Race: Asian ..... 148
SRRACEE - Race: Native Hawaiian/other Pacific Islanders. ..... 148
SRAGE - What is your age now? ..... 149
H10072 - Currently covered Medicare part A ..... 149
H10073 - Currently covered Medicare part B ..... 149
H10074 - Currently covered Medicare supplemental ..... 150
S10009 - Had the same personal doctor or nurse before joining this health plan ..... 150
S10010 - Since joined health plan, how much of a problem, if any, was it to get apersonal doctor or nurse you are happy with?150
S10V19 - Is prsnl doctor/nurse a civilian ..... 150
S10V20 - Last year: how much problem to find prsnl doctor to accept TRICARE ..... 151
S10V21A - Problem finding Dr to accept TRICARE: travel distance too long ..... 151
S10V21B - Problem finding Dr to accept TRICARE: communicating with doctor(s) ..... 151
S10V21C - Problem finding Dr to accept TRICARE: doctor(s) not taking new patients ..... 151
S10V21D - Problem finding Dr to accept TRICARE: doctor(s) not taking new TRICARE patients ..... 152
S10V21E - Problem finding Dr to accept TRICARE: doctor(s) not accepting TRICARE payment ..... 152
S10V21F - Problem finding Dr to accept TRICARE: could not find the specialty I wanted ..... 152
S10V21G - Problem finding Dr to accept TRICARE: did not like doctor(s) ..... 152
S10V21H - Problem finding Dr to accept TRICARE: wait for an appointment was too long ..... 153
S10V21 - Problem finding Dr to accept TRICARE: could not find information about doctors ..... 153
S10V21J - Problem finding Dr to accept TRICARE: other ..... 153
S10V22 ..... 153

N22 - Coding scheme note 22 ..... 177
N23 - Coding scheme note 23 ..... 177
N24 Coding scheme note 24 ..... 178
MISS_1 - Count of: violates skip pattern ..... 178
MISS_4 - Count of: incomplete grid error ..... 178
MISS 5 - Count of: scalable response of don't know ..... 178
MISS_6 - Count of: not applicable - valid skip ..... 179
MISS_7 - Count of: out-of-range error ..... 179
MISS_8 - Count of: multiple response error ..... 179
MISS_9 - Count of: no response - invalid skip ..... 180
MISS_TOT - Total number of missing responses ..... 181
CONSTRUCTED VARIABLES
XENRLLMT - Enrollment in TRICARE prime. ..... 182
XENR_PCM - Enrollment by PCM type ..... 182
XINS_COV - Insurance coverage ..... 182
XBENCAT - Beneficiary category ..... 183
XENR_RSV - Enrollment by PCM type - reservist ..... 183
XINS_RSV - Insurance coverage - reservist ..... 184
XREGION - Region ..... 184
XTNEXREG - TRICARE next generation of contracts region grouping ..... 185
USA CONUS/OCONUS indicator ..... 185
XOCONUS - Overseas Europe/Pacific/Latin indicator ..... 185
OUTCATCH - Out of catchment area indicator ..... 185
XSEXA - Male or female (recode) ..... 186
XBMI - Body mass index ..... 186
XBMICAT - Body mass index category ..... 186
XBNFGRP - Constructed beneficiary group ..... 186
XSERVAFF - Service affiliation ..... 187
KMILOPQY - Outpatient visits to military facility ..... 187
KCIVOPQY - Outpatient visits to civilian facility ..... 187
KCIVINS - Beneficiary covered by civilian insurance ..... 187
HP_PRNTL - Pregnant in last year received care in 1st trimester ..... 188
HP_MAMOG - Women age 40 and over mammography in past 2 years ..... 188
HP_MAM50 - Women age 50 and over mammography in past 2 years ..... 188
HP_PAP - All women pap smear in last 3 years ..... 188
HP_BP - Blood pressure check in last 2 years know results ..... 189
HP_FLU - Age 65 and older flu shot in last 12 months ..... 189
HP_OBESE - Obese or morbidly obese ..... 189
HP_SMOKE - Advised to quit smoking in last 12 months ..... 189
HP_SMKH2 - Smoker under HEDIS definition (modified) ..... 190
HP_CESH2 - Had smoking cessation counseling - HEDIS (modified) ..... 190
XCATCH - XCATCH - Catchment area (reporting) ..... 190
POSTCELL - Poststratification cell for new weights ..... 193
WEIGHTS
FWRWT1 - Replicated/Jackknife quarterly weight 1 ..... 195
FWRWT2 - Replicated/Jackknife quarterly weight 2 ..... 195
FWRWT3 - Replicated/Jackknife quarterly weight 3 ..... 196
FWRWT4 - Replicated/Jackknife quarterly weight 4 ..... 196

H10001 - Are you the person listed on envelope ..... 115
H10002A - Health plan(s) covered: TRICARE Prime ..... 116
H10002C - Health plan(s) covered: TRICARE Ext/Stnd ..... 116
H10002F - Health plan(s) covered: Medicare ..... 117
H10002G - Health plan(s) covered: FEHBP ..... 117
H10002H - Health plan(s) covered: Medicaid ..... 117
H10002I - Health plan(s) covered: Civilian HMO ..... 117
H10002J - Health plan(s) covered: Other civilian. ..... 118
H10002K - Health plan(s) covered: USFHP ..... 118
H10002L - Health plan(s) covered: Not sure ..... 118
H10002M - Health plan(s) covered: Veterans ..... 118
H10002N - Health plan(s) covered: TRICARE Plus ..... 116
H10002O - Health plan(s) covered: TRICARE For Life ..... 116
H10002P - Health plan(s) covered: TRICARE Supplemental Insurance ..... 116
H10002Q - Health plan(s) covered: TRICARE Reserve Select ..... 117
H10002R - Health plan(s) covered: Other Non-US government health insurance ..... 118
H10003 - Which health plan did you use most in the past 12 months? ..... 119
H10004 - Months or years in a row with health plan ..... 119
H10005 - In last year: facility used most for health care ..... 120H10006
120H10007- In last year: have illness/injury/condition that needed care right away
H10008- In last year: how often got care as soon as you believed you need it120

- In last year: wait between trying to get care and actually seeing a provider for an illness or injury ..... 121
H10009 - In last year: made appointments for non-urgent health care ..... 121
H10010 - In last year: how often got appointments for non-urgent health care as soon as you wanted ..... 121
H10011 - In last year: days between making an appointment for regular or routine care and actually seeing a provider. ..... 122
H10012 - In last year: times went to an emergency room for own care ..... 122
H10013 - In last year: times went to a doctors office or clinic for yourself (not counting times went to an emergency room) ..... 122
H10014 - In last year: how often talk to doctor or other health care provider about illness prevention ..... 123
H10015 - In last year: doctor or other health care provider talked about more than 1 choice for treatment ..... 123
H10016 - In last year: doctor talked about pros/cons of each treatment/health care choice ..... 123
H10017 In last year: doctor/health care provider asked which treatment option you thought was best for you when there was more than one choice of treatment ..... 124
H10018 - Rating of all health care in last year ..... 124
H10019 - Have one person you think of as your personal doctor ..... 124
H10020 ..... 125
- In last year: how often personal doctor listened carefully to you125
H10022 - In last year: how often personal doctor explained things in a way that was easy to understand ..... 125
H10023 - In last year: how often your personal doctor showed respect for what you have to say ..... 126
H10024 - In last year: how often your personal doctor spent enough time with you ..... 126
H10025- In last126
H10026 - In last year: how often personal doctor seemed informed and up-to-date about care received from other doctors ..... 127
H10027 - Rating of your personal doctor ..... 127
H10028 - In last year: tried to make appointment to see a specialist. ..... 127
H10029 - In last year: how often it was easy to get appointments with specialists ..... 128
H10030 - In last year: how many specialists seen ..... 128
H10031 - Rating of specialist seen most often in last year ..... 128
H10032 - In last year: tried to get care, tests, or treatment through health plan ..... 129
H10033 - In last year: how often easy to get care, tests, or treatment you thought you needed through health plan ..... 129
H10034 - In last year: how often written material/Internet provide information you needed about how your plan works ..... 130
H10034B - In last year: looked for information in written material or on the Internet about how health plan works ..... 129
H10035 - In last year: looked for information from health plan on cost of health care service or equipment ..... 130
H10036 - In last year: how often able to find out cost of health care service or equipment from health plan ..... 130
H10037 - In last year: looked for information from health plan on cost of prescription medications ..... 131
H10038 - In last year: how often able to find out cost of prescription medications ..... 131
H10039 - In last year: tried to get information or help from health plan's customer service ..... 131
H10040 - In last year: how often did customer service give needed information or help ..... 131
H10041 - In last year: how often did customer service treat with courtesy and respect ..... 132
H10042 - In last year: health plan gave forms to fill out ..... 132
H10043 - In last year: how often forms from health plan were easy to fill out ..... 132
H10044 - In last year: sent in any claims to your health plan ..... 133
H10045 - In last year: how often health plan handled claims quickly ..... 133
H10046 - In last year: how often health plan handled claims correctly ..... 133
H10047 - Rating of all experience with health plan ..... 134
H10048 - Blood pressure: when last reading ..... 134
H10049 - Blood pressure: know if blood pressure is too high or not ..... 134
H10050 - When did you last have a flu shot ..... 135
H10051 - Smoked at least 100 cigarettes in life. ..... 135
H10052 - Smoke everyday, some days, or not at all. ..... 135
H10053 - Last year: number of visits advised to quit smoking ..... 136
H10054 - Last year: number of visits medication was recommended or discussed to assist with quitting smoking ..... 136
H10055 - Last year: number of visits recommended or discussed methods and strategies to assist quitting smoking ..... 136
H10056 - Are you male or female ..... 137
H10057 - Female: last have a Pap smear test ..... 137
H10058 - Female: are you under age 40 ..... 137
H10059 - Female: last time breasts checked mammography ..... 138
H10060 - Female: been pregnant in last year or pregnant now ..... 138
H10061 - Female: in what trimester is your pregnancy ..... 138
H10062 - Female: trimester first received prenatal care ..... 139
H10063 - In general how would you rate your overall health ..... 139
H10064 - Limited in any way in any activities because of any impairment or health problem ..... 139
H10065 In last year: seen doctor or other health provider 3 or more times for same condition or problem ..... 139
H10066 - Condition lasted for at least 3 months ..... 140
H10067 - Need to take medicine prescribed by a doctor ..... 140
H10068 - Medicine to treat condition that has lasted for at least 3 months ..... 140
H10069F - Feet portion of height without shoes. ..... 140
H10069| - Inches portion of height without shoes ..... 141
H10070 - Weight without shoes in pounds ..... 141
- Are you Spanish, Hispanic, or Latino ..... 146
H10071A - No, not Spanish, Hispanic, or Latino ..... 146
H10071B - Yes, Mexican, Mexican American, Chicano ..... 147
H10071C - Yes, Puerto Rican ..... 147
H10071D - Yes, Cuban ..... 147
H10071E - Yes, other Spanish, Hispanic, or Latino ..... 147
H10072 - Currently covered Medicare part A ..... 149
H10073 Currently covered Medicare part B ..... 149
H10074 - Currently covered Medicare supplemental ..... 150
HP_BP Blood pressure check in last 2 years know results ..... 189

## Chapter

## Introduction

This Codebook and Users' Guide provides a tool for programmers and analysts to assist them in creating cross-tabulations and basic statistical estimates from the Quarter II, 2010 Adult Health Care Survey of DoD Beneficiaries (HCSDB). It is intended to assist users in creating tables and generating analyses above and beyond those associated with this project.

Beginning with 2006, reporting and documentation of the HCSDB is performed on a fiscal year basis. In previous years, reporting and documentation were based on calendar years. Thus, the current codebook describes the Quarter II, 2010 dataset for fiscal year 2010. Throughout, 2010 Quarter II dataset refers to the fiscal year 2010.

This version of the Codebook and User's Guide describes the Quarter II data set. It contains frequency counts of all variables in the second quarter of fiscal year 2010.

This chapter explains how to use this guide, reviews the survey, briefly describes the sample design, and concludes with a list of other documents on the HCSDB data that may be useful for policymakers, administrators, and other users.

## HOW TO USE THIS GUIDE

Chapter 2 describes the survey fielding process.
Chapter 3 describes the database conventions and types of variables in the database. Furthermore, it explains the relationship between the raw survey data and the cleaned and constructed variables preferred for data analyses.

Chapter 4 provides table-making instructions in both SAS and SPSS and clearly demonstrates the basic computer programming code necessary to tabulate the data in SAS and the interactive steps involved in generating tables in SPSS (either statistical package may be used). While we assume that most users have some knowledge of computer systems and statistical processing, examples of how to create tables and the resulting output are provided in order to simplify the process of data tabulation. Due to the complexity of the sample design, we suggest that users interested in measuring the precision of their results use a statistical package capable of calculating standard errors for survey estimates, such as SUDAAN ${ }^{\text {TM }}$ or WesVar PC ${ }^{\circledR}$. Sample programming code is included to estimate standard errors using appropriate methods to accommodate the complex sample design.

The codebook is presented in Chapter 5, where we describe the quarterly counts for each variable in the database, including a list of all possible values of the variable, weighted and unweighted frequency counts and percent occurrences for each value, and the values' interpretation or formatting. The codebook helps users assess the availability of certain measures, specify variables of interest, and identify all possible values of a variable. The variables are listed in the order of their position on the data file, and they are grouped by source as follows:

- Sampling variables used to place beneficiaries in the appropriate strata
- Information from the Defense Enrollment Eligibility Reporting System (DEERS) at the time of sampling
- Questionnaire responses: cleaned and recoded
- Variables created during the fielding of the survey
- Coding Scheme flags and missing value counts
- Constructed variables for analysis
- Weights

In addition, users may refer to the Table of Variables, which follows directly after the Table of Contents, for an alphabetical quick-reference list intended to assist users in locating each variable.

Users interested in learning more about the technical aspects of the database creation, construction of new variables, or Mathematica's report production procedures may refer to "The 2010 Health Care Survey of DoD Beneficiaries: Adult Technical Manual," available in late 2010 from the TRICARE Management Activity Office.

## What is the HCSDB?

The HCSDB is a health care survey of Active Duty military personnel, retirees, and their adult family members. It is comprised of an adult and a child survey, both fielded to a representative sample of beneficiaries. The adult survey is fielded every quarter, whereas the child survey is fielded only in one quarter of each fiscal year. Results from each quarter of the adult survey are presented as a webbased report. The survey is sponsored by the Assistant Secretary of Defense (Health Affairs) [OASD (HA)], under authority of the National Defense Authorization Act for Fiscal Year 1993 (P.L. 102-484). The surveys collect data on beneficiaries' satisfaction with, and access to, health care; knowledge of the TRICARE system; and use of preventive and other health care services.

Fielded annually from 1994 to 2000, the HCSDB now is fielded quarterly and consists of a fixed core questionnaire complemented by quarterly supplements intended to address topics of emerging interest. Users should note that, prior to 2000, the title of the HCSDB corresponded to the reference year that respondents were asked to think about when responding to questions. For example, although the 2000 HCSDB was fielded in 2001, beneficiaries responded to questions according to the reference period 12 months prior. Under the current naming convention the survey title refers to the year the questionnaires are fielded, so, for example, this year's survey is the 2010 HSCDB. Users should further note that, due to this change, there is no survey with the title "2001" survey, even though the questionnaire has been administered continuously throughout each quarter of 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, and 2010. The annotated questionnaire appears in Appendix A. A crosswalk between the 2010 questions and the questions from the 1997, 1998, 1999, 2000, 2002, 2003, 2004, 2005, 2006, 2007, 2008 and 2009 surveys appears as Appendix C.

## CAHPS Questions

To make responses comparable to civilian surveys, the HCSDB core questions are similar in content and format to questions used in the Consumer Assessment of Healthcare Providers and Systems (CAHPS) Health Plan Survey. CAHPS is a survey program sponsored by the Agency for Health Care Research and Quality (AHRQ), U.S. Department of Health and Human Service, and the Picker Institute, which is designed to monitor beneficiaries' satisfaction with their civilian health care plan and access to health care services. In 2010, the questionnaire was based on CAHPS version 4.

Core questions are described below.

## Core questions

- Health Plan. This section collects data on TRICARE Prime enrollment and the use of supplemental insurance and/or other private insurance.
- Your Health Care in the Last 12 Months. This section collects information on where DoD beneficiaries received the majority of their care in the past 12 months, that is, from a military or civilian facility. It covers topics such as the availability of providers and their staff for both urgent and regular care. Respondents are asked to rate their health care on a scale from 0 to 10 , where 0 is the lowest rating and 10 is the highest rating. They are also asked if the health care providers informed them of the available treatment options.
- Your Personal Doctor. In this section, respondents are asked about their relationship with their personal doctor. They are asked to rate their personal doctor on a scale from 0 to 10 , where 0 is the lowest rating and 10 is the highest rating. It also covers topics like the ability of the personal doctor to listen carefully and respectfully, clearly explain things, and be informed about care received from another doctor.
- Getting Health Care from a Specialist. This section collects information about respondents' access to care from specialists. Respondents rate the specialist that they see most frequently on a scale from 0 to 10 , where 0 is the lowest rating and 10 is the highest rating.
- Your Health Plan. This section is designed to measure beneficiaries' satisfaction with their primary health plan. Respondents are asked to rate their health plan on a scale of 0 to 10 where 0 is the lowest rating and 10 is the highest rating. Additionally, respondents are asked questions about any problems they may have encountered with getting necessary care, claims processing, customer service, processing paperwork, and finding necessary information in written materials or from the Internet.
- Your Preventive Health Care. This section collects information on the use of preventive health care services, including blood pressure readings and flu shots. All women are asked about Pap smears; women that are or have been pregnant within the past 12 months are questioned about prenatal care. Women age 40 and over are asked about mammography. All respondents are asked whether they smoke. Smokers are asked whether, and how often, they have received smoking cessation counseling from a health care professional.
- About You. This section asks basic background and health status questions. Beneficiaries are asked how they view their general health. They are further asked to report their height, weight, education level, race, and age.

## Quarter II Supplements

- Mental or Emotional Health. Questions in this supplement concern overall mental or emotional health. Respondents are asked to rate their mental or emotional health. They are also asked questions about any mental or emotional treatment or counseling they may have received. Finally, respondents are questioned about post-traumatic stress due to an upsetting experience.
- Personal doctor and health provider. Question in this supplement ask about the respondent's personal doctor and about the visits to the respondent's healthcare provider. Respondents are asked whether they were happy with their personal doctor once they joined the health plan. Respondents are also asked to rate their experience making an appointment and on the overall healthcare they received on their last visit.
- Use of Tobacco Products. Questions in this supplement are about the use of tobacco products other than cigarettes. Respondents are asked questions on the frequency of use of smokeless tobacco products as well as other tobacco products, not including cigarettes.
- Civilian Providers. These supplemental questions provide information about respondents' experiences getting care from civilian doctors. Questions concern the amount of care received from doctors in TRICARE's civilian network, problems getting wanted care, convenience of care, and physician retention within the TRICARE civilian network.

## Sample Design Ovenview

The sample of beneficiaries for the HCSDB was drawn from an extract file of the DEERS database of military health system (MHS) beneficiaries with a specific reference date. The DEERS extract file includes all eligible MHS beneficiaries as follows:

- Everyone in the Uniformed Services and on Active Duty (Army, Air Force, Navy, Marine Corps, Coast Guard, the Commissioned Corps of the Public Health Service, National Oceanic and Atmospheric Administration, Guard/Reserve personnel who are activated for a period in excess of 30 days, and other special categories of people who qualify for benefits)
- Those who retired from military careers
- Immediate family members of people in the previous two categories
- Surviving family members of people in the first two categories.

A stratified sample design was used to select DoD health care beneficiaries for the Quarter II, 2010 Adult HCSDB. Specific information on the sample design appears in "Health Care Survey of DoD Beneficiaries: 2010 Adult Sampling Report", Mathematica Policy Research, Washington, D.C.

From a sample of 51,000 beneficiaries, 12,560 adult MHS beneficiaries completed and returned a 2010 Adult HCSDB questionnaire for the second quarter, yielding a response rate of 24.8 percent. Information on developing response rates can be found in the "2010 Health Care Survey of DoD Beneficiaries: Adult Technical Manual."

## Other Documents on the 2010 HCSDB

This document is intended for programmers and analysts using the 2010 Adult HCSDB data. The following is a list of other documents that may be requested from the TRICARE Management Activity Office:

- Health Care Survey of DoD Beneficiaries: 2010 Adult Sampling Report
- 2010 Health Care Survey of DoD Beneficiaries: Adult Technical Manual (Available late 2010)
- 2010 Health Care Survey of DoD Beneficiaries: TRICARE Annual Report (Available late 2010)

## Chapter

## Survey of Adults

This chapter presents information on the survey administration cycle for the Quarter II, 2010 Adult Health Care Survey of DoD Beneficiaries (HCSDB), with specific details on the survey mailing cycle and the number of surveys received.

## A. SURVEY OPERATIONS ACTIVITIES

Operational support for the Health Care Survey of DoD Beneficiaries (HCSDB) involved four mailings to beneficiaries between December 8, 2009 and February 1, 2010 in Quarter II.

The mailings include:

1. Pre-Notification Letter - Letter of explanation encouraging participation
2. Questionnaire 1 - The survey
3. Postcard - A reminder to complete the survey and a thank you for completion
4. Questionnaire 2-The survey, if necessary

The Pre-Notification Letter includes instructions on how to do the survey via the Internet. This change was initiated in Quarter I, 2007. Prior to that, the Internet survey option was first given to the beneficiaries in the letter accompanying the Questionnaire 1 mailing.

A change initiated in Quarter I, 2008 was to send the respondent a double postcard which can be closed with a wafer seal. This enabled Synovate to provide the respondent with their Internet password in order to complete the survey online.

A change initiated in Quarter I, 2009 was that Mathematica emailed Active Duty their prenotification information as well as their reminder postcard information. In addition, Synovate continues to send prenotification letters and reminder postcards. Starting Quarter II, 2010, the Active Duty also received an email reminder during the $2^{\text {nd }}$ questionnaire mailing. These emails supplemented, as opposed to replaced, their respective mailings.

## B. SAMPLE

The sample file that Synovate received from Mathematica contained 51,000 records and the Adult HCSDB was mailed out to 50,984 respondents (the remaining 696 records did not include the respondents' names or addresses and so were not able to be mailed).

## C. QUESTIONNAIRE VERSION

In Quarter II, 2010, all respondents received the questionnaire with questions in the CAHPS 4.0 format.

## D. SURVEY PROCESSING

Synovate applies a Bar Code, Control Number (MIQ) and Password to each beneficiary upon receipt of the sample. This system ensures that all data collected is aggregated and available throughout the survey lifecycle. Each of the identifying labels is detailed below:

## Barcode

Digit 1 - Quarter Marker (1-4)
Digit 2 - Wave Marker (1-4)
Digit 3 - Study Marker (1=sample, 2=supplemental, 3=child)
Digits 4-8 - Sequential ID\#
Control Number (MIQ) - 8-digit unique identifier
Digits 1-7 - Sequential ID \#
Digit 8 - Check Digit
Password
Non-sequential 6-digit password (for online response access) - Password is unique across all samples

## E. ADDRESSES

The HCSDB is designed so that beneficiaries may receive up to four mailings. Synovate may collect up to seven address changes for each beneficiary in order to maximize the receipt rate for mailing. Addresses from Center for Health Care Strategies, Inc (CHCS) were used starting in Quarter I, 2008.

The first available address in the following order was used for each mailing.

1. Respondent Updated
2. USPS Updated
3. National Change of

Address (NCOA)
4. Default - CHCS
5. Default - Residential
6. Default - Sponsor
7. Default - Unit
8. Updated CHCS(depending on date in file)
9. Updated Residential (depending on date in file)
10. Updated Sponsor
11. Updated Unit
12. Original CHCS
13. Original Residential
14. Original Sponsor
15. Original Unit

The origin of the addresses is as follows:

## - Altarum/DEERS Addresses

In the initial sample file, Altarum provides up to four addresses for each beneficiary. Synovate considers these addresses to be Original CHCS, Original Residential, Original Sponsor and Original Unit.

Altarum also provides updates on each of the four addresses prior to the Questionnaire, Postcard and $2^{\text {nd }}$ Questionnaire mailings. Synovate records these addresses as CHCS Updated, Residential Updated, Sponsor Updated, Unit Updated.

- NCOA Address

Upon receipt of the initial sample and prior to the Pre-Notification mailing, Synovate sends the first available address for each beneficiary to a NCOA vendor for updating and hygiene services. The
updated address returned by the vendor is marked as the NCOA address. The definition of "best address" changed in Quarter I, 2009. Synovate compared the date on the Residential address to the date on the CHCS address. The address that had the more current date was sent off for NCOA processing. If the dates were the same or if one/both were missing dates, then the hierarchy of CHCS then Residential would prevail.

- Respondent Address Changes

Respondents were able to report address and status changes via regular mail, telephone, voicemail, fax, and email. Address changes submitted by respondent were considered priority over any other address type.

- Address Correction via USPS

The United States Postal Service provided address corrections on returned mail if available.

- Sample Refreshes

Another change made in Quarter I, 2009 was the use of the sample refreshes sent by Altarum for the first and second questionnaire mailings. Prior to Quarter I, 2009, Synovate used information on recently deceased beneficiaries, information regarding beneficiaries who were no longer in the TRICARE program (nomatch), and any updated addresses for the subsequent mailings. Starting in Quarter I, 2009, Synovate only used the deceased and nomatch information, and did not use any refreshed addresses in order to maintain the integrity of the NCOA address. Addresses that were updated due to the previous address being undeliverable are marked as "Default" (Residential, CHCS, Sponsor, or Unit).

Table 2.1 gives the address breakdown for each mailing by beneficiary category.

## F. SURVEY ADMINISTRATION TIMELINE

Quarter II

| File Receipt | 23 Nov 09 |
| :--- | :---: |
| NCOA Update | 24 Nov 09 |
| Pre-Notification | 8 Dec 09 |
| Altarum-DEERS Update | 14 Dec 09 |
| Questionnaire 1 | 4 Jan 10 |
| Postcard | 20 Jan 10 |
| Altarum-DEERS Update | 19 Jan 10 |
| Questionnaire 2 | 1 Feb 10 |
| Close of Field | 1 Mar 10 |
| File to MPR | 9 Mar 10 |
| Final Report to DoD | 10 Mar 10 |

## G. DISPOSITION CODES

Synovate assigns disposition codes to each sample member as the information is received and questionnaire is returned. These codes are outlined below.

- FLAG_FIN=1

Returned survey - survey was completed and returned.

- FLAG_FIN=2

Returned ineligible - survey was returned with at least one question marked and information that the beneficiary was ineligible. The information indicating ineligibility may have come by mail, phone, fax, or the survey itself.

- FLAG_FIN=3

Returned blank - temporarily ill or incapacitated. Survey was returned blank along with information that the beneficiary was temporarily ill or incapacitated. These sample members were eligible.

- FLAG_FIN=4

Returned blank - deceased. Survey was returned blank along with information that the beneficiary was deceased. These sample members were ineligible.

- FLAG_FIN=5

Returned blank - incarcerated or permanently incapacitated. Survey was returned blank along with information that the beneficiary was incarcerated or permanently hospitalized. These sample members were ineligible.

- FLAG_FIN=6

Returned blank - left military or divorced after fielding date, retired. Survey was returned blank along with information that the beneficiary left the military after fielding date, divorced after fielding date, or retired. These sample members were eligible.

- FLAG_FIN=7

Returned blank - not eligible on fielding date. Survey was returned blank along with information that the beneficiary was not eligible for Military Health System Plan on fielding date. These sample members were ineligible.

- FLAG_FIN=8

Returned blank - other eligible. Survey was returned blank along with a reason given by the sample member. These sample members were eligible.

- FLAG_FIN=9

Returned blank - no reason. Survey was returned blank without an explanation. These sample members had unknown eligibility.

- FLAG_FIN=10

No return - temporarily ill or incapacitated. Survey was not returned and beneficiary was temporarily ill or incapacitated. These sample members were eligible.

- FLAG_FIN=11

No return - active refuser. Survey was not returned and beneficiary refused to take part in the survey. These sample members were eligible.

- FLAG_FIN=12

No return - deceased. Survey was not returned and beneficiary deceased. These sample members were ineligible.

- FLAG_FIN=13

No return - incarcerated or permanently incapacitated. Survey was not returned, beneficiary was incarcerated or permanently hospitalized. These sample members were ineligible.

- FLAG_FIN=14

No return - left military or divorced after fielding date, retired. Survey was not returned, beneficiary left service after fielding date, divorced after fielding date, or retired. These sample members were eligible.

- FLAG_FIN=15

No return - not eligible on fielding date. Survey was not returned, beneficiary was not eligible for Military Health System Plan on fielding date. These sample members were ineligible.

Example: Beneficiary turned 21 and is no longer covered under parents' plan.

- FLAG_FIN=16

No return - other eligible. Survey was not returned, beneficiary gave other reason for not completing the survey. These sample members were eligible.

Examples: Beneficiary claims they have not used benefits in past 12 months. Beneficiary is away at college, on a religious mission, lives overseas. Received information that beneficiary chosen for survey does not speak English well enough to participate.

- FLAG_FIN=17

No return - no reason. Survey was not returned, beneficiary gave no reason. These sample members had unknown eligibility.

- FLAG_FIN=18

Postal Non Deliverable (PND) - no address remaining. All addresses were attempted, mailing was returned PND. These sample members had unknown eligibility.

- FLAG_FIN=19

PND - address remaining at the close of field. At the close of field, the last address used was found invalid, next available was not attempted. These sample members had unknown eligibility.

- FLAG_FIN=20

Original Non-Locatable - no address at start of mailing. Substantially incomplete or blank address field before the survey was administered, no mailings attempted. These sample members had unknown eligibility.

- FLAG_FIN=21

Beneficiary provides written documentation declining to participate but doesn't specify a reason. These sample members were eligible.

- FLAG_FIN=22

Beneficiary indicates they are hospitalized but without providing any way to determine whether incapacity is temporary or permanent. Therefore, eligibility determination can not be made. These sample members had unknown eligibility.

- FLAG_FIN=23

Returned blank - deployed. Survey was returned blank along with information that the beneficiary was deployed. These sample members were eligible.

- FLAG_FIN=24

No return - deployed. Survey was not returned, beneficiary was deployed. These sample members were eligible.

- FLAG_FIN=25

Deceased. Beneficiary coded as deceased due to refresh sample sent by Altarum. These sample members were ineligible.

- FLAG_FIN=26

No match. Not eligible indicated by Altarum-DEERS update. Beneficiary coded as no longer having TRICARE coverage due to sample refresh.

Tables 2.2 shows frequencies of these disposition codes by beneficiary category.

Table 2.2
Frequency of Disposition by Beneficiary Category - Total Sample - Quarter II, 2010

## Description of the Adult HCSDB Database

This chapter presents the procedures for developing the database, and presents the database file layout.

## VARIABLE NAMING CONVENTIONS

The conventions used to name variables on the 2010 Adult HCSDB data file are listed below and summarized in Table 3.1. The naming conventions remain constant across the four quarters of the 2010 HCSDB.

- Survey Variables. Variable names for core survey questions consist of up to eight alphanumeric characters that start with an alpha character ("H" for Adult survey variables), followed by a year designation ("10") and ending with three numbers and, if necessary, one alpha character to identify the relevant survey question. Recoded variables have the same names as on the annotated survey. The original variables are suffixed with "_O"; these will not be on the public release file.
- Supplemental Question Variables. Each quarter, the questionnaire includes a battery of questions on specific health care topics concerning services offered to MHS beneficiaries. Like the core questions, supplemental questions also include up to eight alphanumeric characters; each variable begins with an " S " to distinguish it as a supplemental question, followed by the year designation ("10"). The variable ends with an alphanumeric character denoting the supplemental topic followed by the question number in the supplemental series.
- Self-Reported Data. Defense Manpower Data Center (DMDC) standard demographic selfreporting variables on the adult survey are prefixed with "SR." Survey variables with this naming convention include SRRACEA-SRRACEE (race/ethnicity) and SREDA (education).
- Coding Scheme Flags and Counts. Coding Scheme flags, variables like N1-N24, reference the notes in the Coding Scheme for the Adult Survey. See Appendix D for the Coding Scheme for Quarter II for more information. Coding Scheme counts are sums of missing value responses for each questionnaire; each of these variable names begins with the 4 characters "MISS".
- Constructed Independent Variables. Independent variables are prefixed with an "X." These include original survey variables modified as a result of data cleaning or recoding and newly constructed variables that did not previously exist on the survey file. For example, since the variable PNSEXCD was modified as a result of data cleaning and recoding, it was renamed XSEXA.
- Constructed Dependent Variables. Dependent variables are given different prefixes depending on function. Healthy People 2010 variables, for example, are prefixed with an "HP" and all other newly constructed dependent variables are prefixed with a "K."
- Constructed Restricted Use Variables. Original DEERS variables that have been recoded to maintain the confidentiality of the respondent are prefixed with "R."
- Weighting Variables. Quarterly weighting variables are prefixed with a "FW".

TABLE 3.1
NAMING CONVENTIONS FOR 2010 HCSDB VARIABLES - QUARTER II

| $1^{\text {st }}$ Character: Survey Type | $2^{\text {nd }}-3^{\text {rd }}$ <br> Characters: Survey Year | $4^{\text {th }}-6^{\text {th }}$ Characters: Question \# | Additional Characters: Additional Information |
| :---: | :---: | :---: | :---: |
| H= Health <br> Beneficiaries (18 and older, Adult Questionnaire) | 10 | $001 \text { to } 074$ | $A$ to $R$ are used to label responses associated with a multiple response question |
| $\begin{aligned} & S=\text { Supplemental } \\ & \text { Question } \end{aligned}$ |  | Quarter II <br> 009-011, 014 - Supplemental questions about respondent's personal doctor and about the visits to the respondent's healthcare provider. <br> B01-B04, B23-B26 - Supplemental questions about overall mental or emotional health. <br> D02-D03 - Supplemental questions about respondent's use of tobacco products. <br> V01-V02, V05-V07, V09, V11-V12, V19-V28 Supplemental questions about TRICARE's civilian network. |  |

| 1 <br> st <br> Variable Group | Additional Characters: <br> Additional Information |
| :--- | :--- |

| N=Coding Scheme notes | Number referring to Note, e.g., N2 |
| X=Constructed independent variable | Descriptive text, e.g., XREGION |
| HP=Constructed Healthy People <br> 2010 variable | Descriptive text, e.g., HP_BP (had blood pressure screening in past <br> two years and know the results) |
| R=Constructed restricted use variables | Descriptive text, e.g., RDAGEQY (Age at time of data collection- <br> Capped(18 and below, 86 and above)) |
| K=Constructed dependent variables | Descriptive text, e.g., KMILOPQY (total number of outpatient visits to <br> military facility) |
| FW=Quarterly weighting variables | Descriptive text, e.g., FWRWT for the overall final quarterly weight; <br> Number referring to replicate weights, e.g., FWRWT10 |

## CLEANING AND EDITING CONVENTIONS

Data quality procedures are found in the Coding Scheme tables. The complete Coding Scheme for Quarter II appears in Appendix D. It contains detailed instructions for all editing procedures used to correct data inconsistencies and errors. Editing procedures check for appropriate response values and consistent responses throughout the questionnaire. The steps to insure data quality include the following:

- Initial Cleaning. Missing value flags were encoded when Synovate created the SAS dataset:
- Skipped items were encoded with SAS missing value code of '..'
- Data Cleaning and Recoding of Variables - Implementation of the Coding Scheme. Skip patterns were checked for consistency, and questions that were skipped legitimately were recoded with the SAS missing value of ". N "; questions that were answered, but should have been skipped, were recoded with a SAS missing value of ".C". When possible, variables were backward coded or forward coded to make all responses consistent within a sequence. Numeric values were checked, and values that were out of range were flagged with the SAS missing value of "O".
- Frequency Checks. Formatted and unformatted frequency tables for all variables in Quarter II, 2010 Adult HCSDB data file appear in Chapter 5 of this document. These frequency tables and other relevant cross tabulations were used to examine the range of values recorded for each data item to determine the type and magnitude of missing values. All value labels have been checked for accuracy.

## RECORD SELECTION CRITERIA

Blank returns, nonrespondents, and any respondents found to be ineligible for MHS benefits were removed from the database. In addition, among eligible respondents with a non-blank questionnaire, a questionnaire must be "complete" to be included in the database.

To determine if a questionnaire is "complete", 20 key questions were chosen. These key questions were adapted from the complete questionnaire rule developed by AHRQ for CAHPS surveys. At least 50 percent of these key items (more than nine) must be answered for a questionnaire to be accepted as a complete questionnaire. The key survey variables are: H10003, H10005, H10006, H10009, H10013, H10018, H10019, H10027, H10028, H10031, H10033, H10039, H10042, H10047, H10050, H10051, H10063, H10071, SREDA and the race indicator.

## Weighting Procedures

The analysis of survey data from complex sample designs, such as the 2010 Adult HCSDB, requires weights to do the following:

- Compensate for variable probabilities of selection
- Adjust for differential response rates
- Improve the precision of the survey-based estimates through post-stratification [for details, see Brick and Kalton (1996) and references cited therein], and trim extreme weights.

Sampling weights are equivalent to the reciprocal of the probability of each respondent's selection into the sample. Sampling weights are further adjusted for nonresponse within the classes formed based on the percentiles of the propensity scores from the propensity model. Finally, we poststratified the nonresponse adjusted weights to the frame totals to obtain specific domain weighted totals equal to the
population totals, and trimmed some extreme weights to reduce the excessive effect of extreme weights on variance inflation. Chapter 5 contains the weighted and unweighted frequencies for each variable in Quarter II. For further details of the 2010 weighting, see 2010 Health Care Survey of DoD Beneficiaries: Technical Manual.

4

## Programming Guide

This chapter is designed to help users create tables and variance estimates. Procedures for using SAS, SPSS, SUDAAN, and WesVarPC to create estimates are explained. Examples provided in the text are based on the 2010 Quarter II HCSDB dataset.

## HOW TO MAKE A TABLE USING SAS

The Quarter II, 2010 Adult HCSDB dataset is provided in a Statistical Analysis System (SAS) 8.0 format. SAS is a computer software system used for data management, summarization, and analysis. Later versions of SAS can also read version 8 datasets. A format library for the adult database is included along with the dataset. SAS can be run interactively or non-interactively (in batch mode), and the sample programs presented here can be run using either method. Special instructions are given later in the chapter for working interactively with the SAS Display Manager System in a Windows environment. All SAS programs generate a LOG and a LST file. The LOG file shows how SAS interprets your program and flags SAS syntax errors. The LST file shows the requested output.

## File References, Libraries, and Options

SAS recognizes two types of datasets -- permanent and temporary. Permanent datasets, such as the HCSDB, are located through a LIBNAME that references the directory where the data is stored. For example, if the 2010 Quarter II adult dataset is located on a CD-ROM in the subdirectory HCSDB10\FORMAIQ2, your LIBNAME statement must look like this:

LIBNAME INFORMA 'F:IHCSDB10IFORMAIQ2';
The adult dataset can then be referred to as INFORMA.HCSDB10, where INFORMA is the location of the file HCSDB10.

A format library requires a LIBNAME LIBRARY statement that shows the location of the format library. For example, if the adult format library is stored on your hard drive in a FMTLIB subdirectory, the LIBNAME statement should look like this:

LIBNAME LIBRARY 'C:IHCSDB10IFORMAIQ2IFMTLIB';
The OPTIONS statement controls page format and line length. A table with a "portrait" orientation might have this statement:

OPTIONS PS=79 LS=132;
A table with a "landscape" orientation that is left justified would have this OPTIONS statement:
OPTIONS PS=50 LS=175 NOCENTER;

## DATA Step

The DATA step is used to create permanent or temporary datasets. It is also used to create new variables, modify existing variables, and limit the number of variables or observations. In a DATA step, you can do any or all of the following activities:

- Construct new variables. For example, to construct a variable of Active Duty by sex:

```
|* Active Duty males */
IF XSEXA = 1 AND XBNFGRP = 1 THEN XSEX_AD = 1;
* Active Duty females;
ELSE IF XSEXA = 2 and XBNFGRP = 1 THEN XSEX_AD = 2;
ELSE XSEX_AD = .; l* missing value */
```

[Note: the two methods to insert comments: enclosed within /* */ or beginning with * and ending with a semicolon]

- Modify existing variables. For example, if the respondent is in region 7 , the respondent will be placed in the combined region $7 / 8$ :

```
IF XREGION = 7 THEN XREGION = 8
```

- Limit the number of variables. Use a KEEP statement:

## KEEP XREGION SVCSMPL H10049 H10051;

- Limit the number of observations. Use a subsetting IF:

## /* Keep only TNEX region 3 observations */ <br> IF XTNEXREG = 3;

- Create a new temporary dataset. For example, SVC_1 is a temporary file of observations for only those respondents in service branch 1 (Army):

LIBNAME INFORMA 'F:IHCSDB10IFORMA';
DATA SVC_1;
/* Input file is HCSDB10 */
SET INFORMA.HCSDB10;
IF SVCSMPL = 1;
RUN;

- Create a new permanent dataset. For example, OUT.SVC_2 is a permanent dataset only of Navy respondents:

LIBNAME INFORMA 'F:IHCSDB10IFORMA';
LIBNAME OUT 'C:IHCSDB10IFORMA';
DATA OUT.SVC_2;
SET INFORMA.HCSDB10;
IF SVCSMPL = 2;
RUN;

## PROC TABULATE

PROC TABULATE produces summary statistics in a table layout. The table can have up to three dimensions: page, row, and column. Within any dimension, multiple variables can be reported one after another or hierarchically. Useful statistics that are available in PROC TABULATE include:

- N number of observations with nonmissing values
- NMISS number of observations with missing values
- MEAN the arithmetic mean
- SUM the sum
- PCTN percent that one frequency represents of another frequency
- PCTSUM percent that one sum represents of another sum

The essential elements to execute PROC TABULATE are outlined below (items within < > are not required):

## PROC TABULATE DATA=your dataset <option list>; CLASS class variables; VAR analysis variables; <br> TABLE << page expression, > row expression, > column expression </ table options >; WEIGHT FWRWT; <br> RUN;

If the input file is to be limited to a specific population, a separate DATA step can precede the TABULATE, or a WHERE statement can be used within the TABULATE procedure. For example, to create a table from only respondents in service branch 1, you would use the following statement after the PROC TABULATE statement:

## WHERE SVCSMPL = 1;

CLASS variables are any variables that are used for grouping; variables such as XTNEXREG, XSEXA, and SVCSMPL are good examples of class variables. Class variables can be either character or numeric and typically have a discrete number of values. Unless MISSING is specified in the options list in the PROC TABULATE statement, any observations with a missing CLASS variable will be dropped from the table.

The VAR statement identifies all analysis variables for a table. Analysis variables must be numeric and can be either discrete or continuous. SAS excludes missing value when computing statistics such as means and percentages.

The WEIGHT statement identifies the numeric variable whose value is used for weighting each analysis variable. In the HCSDB for Quarter II, 2010, the weight variable is FWRWT.

The TABLE statement defines the table features. Every variable listed in this statement must be classified as either a class variable or an analysis variable in the CLASS or VAR statements. A comma separates each table dimension (page, row, and column). If there are three dimensions, the first is the page, the second is the row, and the last is the column. If there are only two dimensions, the first is the row and the second is the column. Tables with only one dimension are in column form. Each dimension expression is composed of the same following elements:

- Analysis variables
- Class variables
- The universal class variable ALL, which summarizes the class variables in the same group or dimension
- Keyword for the statistic to be performed, such as MEAN, SUM, or PCTSUM
- A format modifier, which defines how to format values in cells. For example, $\mathrm{F}=8.2$ will present values with a maximum of 8 positions and 2 digits to the right of the decimal.
- Labels, which temporarily replace variable names and statistic keywords. These labels have the form ='label'; for example, XTNEXREG='TNEX Region' or MEAN=' ' (to eliminate the word MEAN from the headings).
- Crossing operator * (asterisk). The asterisk is used to cross elements within the same dimension. For example, you would use XENRLLMT*XSEXA to cross enrollment status by sex. The asterisk is also used to connect the statistic (e.g., MEAN, SUM) to the appropriate dimension; for example, to calculate the mean of respondents' satisfaction with all health care in the last 12 months, you would use H 10018 *MEAN.
- Denominator definitions are enclosed by < > (brackets).
- Concatenation operator is a single space between elements in a dimension. For example, to concatenate satisfaction with all health care in the last 12 months with satisfaction with health plan, you would use H10018 H10047.
- Grouping is accomplished with parentheses. Below is an example of grouping, concatenation, and crossing within a single dimension:

## (XBNFGRP ALL)*XSEXA

## The SAS Display Manager System

The SAS Display Manager system provides an interactive tool for running SAS commands, like those given above, in the Windows environment. Double clicking the SAS icon on the desktop begins the SAS session. When you first enter SAS version 8 , the following screen opens.

The screen is divided into two windows, a Log window above and an Editor window below.
The Window Bar at the bottom of the screen includes tabs for the Log and Editor windows with an additional tab for the Output Window. Clicking on the Output tab will open the Output window. The instructions in this document will outline options for setting up the Editor and for displaying the windows themselves.

The default editor for version 8 is the SAS Enhanced Editor which is color coded to check SAS syntax. Another editing option is to use the Program Editor which includes line editing options. We will describe procedures for setting up the Program Editor.

Click on View and select Program Editor as in the following:

The lower Editor Window has now changed to Program Editor as in the following screen:

Open the Tools menu and choose Options and Preferences.

Many of these settings are system default options. To add a command line to the three windows, do the following. Click on the View tab and click in the box opposite Command Line as follows:

Click on OK and a command line will be added as in the screen below.

Each window shows the word Command followed by an arrow. Commands may be typed at this location. To arrive at the command line, depress the Home button on your keyboard. The cursor will appear opposite the arrow.

Toggling among the windows may be accomplished by typing the desired window name at the command line and pressing Enter. SAS recognizes Pgm as the abbreviated reference to the Program Editor and Out as a shortened name for the Output window. A few keystrokes allow you to navigate among the windows. For example, the command line lets you continue to customize our SAS session as follows.

In order to more easily distinguish between the SAS windows, it may be preferable to change the background color of selected windows. As an example, set the background color of the Log window to yellow and the Output window to gray. Press the Home key to arrive at the command line. Type Log opposite the arrow to toggle to the Log window. Type the command, color back yellow (or some other color) on the command line. Your screen will resemble the following.

Press Enter to process the commands and the window will shade to yellow. Toggle to the Output window by typing Out and keying Enter. Type color back gray and key Enter. Return to the Program Editor and the screen will look like the following.

All SAS statements for building and processing SAS datasets are typed into the Program editor. A SAS session may involve typing statements like the ones above for library reference, computing new variables, data steps, etc. Entering a long series of statements in such a small space may be awkward, so another arrangement for the windows may be preferable.

Cascading the windows is one option. To cascade the windows, open the Window menu, and choose Cascade as indicated in the following.

Clicking the option Cascade produces the following result.

Each window is partly superimposed on the other. The colors distinguish between windows at a glance. With the Program Editor in front, SAS statements may be typed there with relative ease. As a final option, you can enlarge the Program Editor to fill the entire screen. At the command line, type zoom as in the following:

The window changes to fill the screen.

One more option for customizing screens is explained below. This involves adding line numbers to the editing environment in the Program Window. After adding the line numbers, many useful line-editing commands become available (see the SAS Manual). At the Command line type "numbers on" as in the following screen.

The line numbers appear at the left of the full screen Program Editor as in the screen below, and the SAS statements can be typed into the screen and edited.

Below is an example of a PROC TABULATE to construct a table of health status and respondent's weight by beneficiary group and gender for respondents in TNEX region 3. Beneficiary group (XBNFGRP) and sex (XSEXA) are both class variables with a discrete number of values. The columns of the table are beneficiary group broken out by sex, a total for each beneficiary group, and a region total. The variables ( H 10070 and H 10063 ) are the analysis variables appearing as the rows of the table. The statistic that we want to see is the weighted mean of these variables for each group in the table and for the entire region as a whole.

Enter the following SAS statements into the Program Editor.
OPTIONS PS=79 LS=95;
LIBNAME IN 'C:IFILESIDoDIADULT 2010';
LIBNAME LIBRARY ‘C:IFILESIDoDIADULT 2010IFMTLIB’;
PROC TABULATE DATA=IN.HCS102_1;
WHERE XTNEXREG = 3; $\quad$ * limit to TNEX Region 3 *
CLASS XBNFGRP XSEXA;
VAR H10070 H10063;
WEIGHT FWT;
TABLE (H10070 H10063)*MEAN, I* Row Dimension *
XBNFGRP*(XSEXA ALL) ALL; ${ }^{*}$ Column Dimension */
TITLE "Table 4.1";
TITLE2' Constructed Beneficiary Group by Gender for TNEX Region 3';
RUN;
Key Home and type the command SUBMIT on the Command Line. Submit instructs the SAS system to process the commands written in the Program Editor. Your screen should resemble the following.

Enter the Submit command, and the SAS statements disappear from the Program Editor. If a table is successfully produced, the Output window will open and the table will be displayed. If no output is produced, then SAS has encountered an error. SAS statements about the error can be seen
and evaluated in the Log window. In all cases, the Log window should be carefully examined after SAS statements are processed. SAS may produce a table even if there are errors in the program, so the table may not be correct.

No table was produced for this run. The error is indicated in the Log Window as shown below.

The variable FWT was not found in the dataset. Type Pgm on the Command line to return to the Program Editor. Type Recall on the Command line and the program statements will reappear in the window.

You can correct the error by entering FWRWT, the correct variable name, in the weight statement. Then, rerun the procedure.

The corrected program produces the following output.

The result of this process is Table 4.1.
Note that the TITLE statement defines the heading for each page. Titles of more than one line are entered as TITLE, TITLE2, etc.

## Using Formats

The format library is the key to interpreting values of discrete variables. For example, in the program above, the format library found at C:IFILESIDoDVADULT 2010IFMTLIB indicates that a Value of 1 for XSEXA means male, and a value of 2 for XSEXA means female. Similarly, if XBNFGRP equals 1 , the respondent is Active Duty; if XBNFGRP equals 2, the respondent is a family member of Active Duty personnel; if XBNFGRP equals 3, the respondent is an under-65 retiree or a survivor or one of their family members; if XBNFGRP equals 4 , the respondent is a 65 -or-over retiree, survivor, or one of their family members.

Since formats are associated with the variables in the HCSDB, formatting is automatic as long as SAS can locate the format library. Error messages will result if the LIBNAME LIBRARY statement is not present. If the format library is not available for some reason, use the statement

FORMAT _ALL_;
within the PROC TABULATE to prevent SAS from searching for the missing format library. The default formats in the format library were used to produce the table described in the previous section.

## Table Appearance

Format modifiers and temporary labels improve the appearance of a table. In Table 4.1, the values of the statistics are of the form xxx . xx. If each cell is defined to be six positions wide with two positions to the right of the decimal, there is adequate space to keep the table from looking crowded. This is done by crossing the statistic with the format modifier:

## MEAN*F=6.2

Labels are attached to all variables in the HCSDB. You can use temporary labels to override the label within the SAS dataset. It is not always necessary to use both the variable label and the formatted values for each value of a class variable. In the previous example, the formatted values of XBNFGRP are Active Duty, family members of Active Duty, etc. which we know to be beneficiary groups; the title also tells you that these are beneficiary groups. The table can be made attractive by deleting the heading for XBNFGRP by including a blank for the temporary label:

## XBNFGRP=’

Similarly, because the statistic being reported here is a mean, you do not need MEAN on each row. You can add or eliminate a label and include a format modifier to the same variable:

MEAN=' '*F=6.2
The headings for XSEXA and ALL can be improved:
XSEXA='Gender'
ALL='Group Total' for the ALL that is crossed with XBNFGRP ALL='Total' for the TNEX Region 3 total

The new program looks like this:

```
OPTIONS PS=79 LS=95;
LIBNAME IN 'C:IFILESIDoDIADULT 2010';
LIBNAME LIBRARY `C:IFILESIDoDIADULT 2010IFMTLIB';
PROC TABULATE DATA=IN.HCS102_1;
WHERE XTNEXREG = 3; I* limit to TNEX Region 3 *
CLASS XBNFGRP XSEXA;
VAR H10070 H10063;
WEIGHT FWRWT;
TABLE (H10070 H10063)*MEAN=' '*F=6.2, I* Row Dimension */
    /* Column Dimension */
    XBNFGRP=' '*(XSEXA='Gender' ALL='Group Total')
    ALL='Total';
```

TITLE "Table 4.2";
TITLE2 'Constructed Beneficiary Group by Gender for TNEX Region 3'; RUN;

Typing these statements into the Program Window produces the following screen.

After the Submit command is entered, the following table is displayed in the Output window.

The resulting output is in Table 4.2.
Table 4.2
Constructed Beneficiary Group by Gender for TNEX Region 3

(Continued)

Table 4.2
Constructed Beneficiary Group by Gender for TNEX Region 3

Although the label for MEAN is deleted, there is still a space in the table for this label. You can eliminate this blank space by using the TABLE option of ROW=FLOAT. SAS row headings are automatically allocated; you can override this by using the TABLE option of RTS=n where n is an integer value specifying the number of print positions to be used for row headings. If you decide that we don't need the label 'Gender' for XSEXA because 'male' and 'female' are self-explanatory, the revised program is as follows:

```
OPTIONS PS=79 LS=95;
LIBNAME IN `C:IFILESIDoDIADULT 2010';
LIBNAME LIBRARY 'C:IFILESIDoDIADULT 2010IFMTLIB';
PROC TABULATE DATA=IN.HCS102_1;
WHERE XTNEXREG = 3; I* limit to TNEX Region 3 *
CLASS XBNFGRP XSEXA;
VAR H10070 H10063;
WEIGHT FWRWT;
TABLE (H10070 H10063)*MEAN=` '*F=6.2, I* Row Dimension *I
/* Column Dimension */
XBNFGRP=' '*(XSEXA=' ' ALL='Group Total')
ALL='Total' I ROW=FLOAT RTS=32;
TITLE "Table 4.3";
TITLE2' Constructed Beneficiary Group by Gender for TNEX Region 3';
RUN;
```

Typed into the Program Window, the revised program appears as follows.

The output table is displayed in the Output Window as follows.

The result is Table 4.3.

Table 4.3
Constructed Beneficiary Group by Gender for TNEX Region 3

(Continued)
Table 4.3
Constructed Beneficiary Group by Gender for TNEX Region 3

## Calculating Percents

When calculating percentages, it is necessary to appropriately define the denominator. To calculate a column percentage, the denominator definition must include all class variables that define the row. For example, if you want to look at the percentage of people in region 2 and each branch of service who answered yes (or no) to variable H10051, 'Have you ever smoked at least 100 cigarettes in your entire life?', your TABLE statement in the TABULATE procedure would look like this:

WHERE XTNEXREG = 2;
TABLE H10051 ALL='Total',
(All='Service Total' SVCSMPL)*PCTN<H10051 ALL>='Percent';

Table 4.4 includes a program and its output for calculating column percentages. The program statements in the Program Editor appear as follows.

The submitted statements produce the following output.

Table 4.4
Have You Ever Smoked At Least 100 Cigarettes In Your Entire Life for Service Branches within TNEX Region 2

(Continued)

Table 4.4
Have You Ever Smoked At Least 100 Cigarettes In Your Entire Life for Service Branches within TNEX Region 2

| \| | \|Other/Unkno-| |  |
| :---: | :---: | :---: |
| \| | \| Coast Guard | wn |
| \| | \|------- |  |
| \| | \| \# | \% | \# \| \% |
| \|Smoked at least 100 | $\mid$ \| | | \| |
| \|cigarettes in life | 1 \| | | \| |
|  | 1 \| | | \| | |
| \|Yes | 33\| 49.25| | 4\| 20.00 | |
| \| No | 34\|50.75| | 16\|80.00| |
|  |  | --+------\| |
| \|Total | \| 67|100.00| | 20\|100.00| |

The statistic $N$ is included with PCTN to make it easier to verify that the denominator definitions have been set up properly. After you check to see that the percentages are accurate, the N statistic can be removed. Note that the output for Table 4.4 is unweighted. The N statistic (and PCTN statistic) is always unweighted even if a WEIGHT statement is included.

Similarly, if you want to look at the percentage of TRICARE enrollees (and non-enrollees) by gender who report having smoked at least 100 cigarettes in their lifetime, this would be a row percentage. To calculate a row percentage, the denominator definition must include all class variables that define the column. Your TABLE statement would look like this:

```
TABLE H10051 ALL='Total',
XENRLLMT *(XSEXA=' ' All='Group Total')*
PCTN<XENRLLMT*XSEXA XENRLLMT*ALL>='Percent';
```

Notice that there are no parentheses used in the denominator definition. Because parenthetical groupings are not allowed in the denominator definition, all crossings and concatenations must be included. As noted above, the N and PCTN statistic are unweighted counts of CLASS variables. If you want to produce a weighted count and percentage for this table, you would include FWRWT (the 2010 quarterly weight variable) as an analysis variable in the VAR statement and in the column crossing of the TABLE statement; the statistics to be generated should be specified as SUM and PCTSUM. A program and output to demonstrate weighted row percentages appears in Table 4.5.

The following screen shows the new program typed into the Program Editor.

These commands produce the following output.

Here, as above, the SUM statistic is included to help determine the accuracy of the denominator definition.

Additional information about running SAS is available from the SAS Institute. Please consult the appropriate manuals for more detailed information.

See Table 4.5 to view the entire table.

Table 4.5
Have You Ever Smoked At Least 100 Cigarettes In Your Entire Life by TRICARE Prime Enrollment and Gender TNEX Region 2 Only

## HOW TO MAKE A TABLE USING SPSS

The Quarter II, 2010 Adult HCSDB dataset is in an SPSS format. SPSS is a computer software system used for data management, summarization, and analysis. SPSS can be run interactively, using menus, or in batch mode, using syntax commands. This guide instructs users on how to use SPSS dialog boxes to:

- Construct new variables
- Recode existing variables
- Select cases for analysis
- Weight cases for analysis
- Create customized tables

As you use the dialog boxes, you generate syntax automatically. This syntax may be pasted into a syntax file for future use or for modification.

## Locating and opening the data file

To begin an SPSS session, double click on the SPSS icon on your desktop. The Data Editor window will open and present a blank spreadsheet like the following screen:

Click on File in the upper left corner to open the following menu:

Select the Open option or choose a file from the list displayed. Open and data produces the following screen:

If the file is not in this directory，navigate through your folders until you locate it．Mark the file and click Open．You will be returned to the spreadsheet Data Editor with the file on view．The Quarter II， 2010 Adult HCSDB dataset has been opened and is displayed below．

## Constructing new variables

Data can be evaluated from many different aspects．It is sometimes useful to build new variables from combinations of the existing ones and to examine their distributions．

For example，the variable in the file for beneficiary group at the time of sampling is called xbnfgrp，and the variable for sex is xsexa．The value 1 for xbnfgrp indicates that the individual is on Active Duty．The relationships for constructing a new variable of Active Duty by sex are：

Active-Duty-males: $x$ sexa $=1$ and $X B N F G R P=1$
Active-Duty-females: xsexa=2 and XBNFGRP=1
Open the Transform menu and select Compute as in the following:

The following dialog box will open:

You can build the new variable in two steps to express the two conditions. The first task is to give the new variable a name and its first value. Enter the Target Variable slot and name the new variable sex_ad. Next, assign the value 1 to sex_ad by entering it into the slot for Numeric Expression. Your screen should look like the following:

Once you we have assigned the value 1 to sex_ad, you can build the condition that qualifies the assignment. Click on If and open the following dialog box:

Click on the circle indicating Include if case satisfies condition, and the black dot will move to that circle. The slot underneath will open, ready for your input. Build the "if" condition. Write it directly into the slot or move the elements into the slot from the given options. Add the elements $x \operatorname{sexa}=1 \& x b n f g r p=1$.

The screen should resemble the following:

Click on Continue and return to the previous screen, which will now look like this:

Your condition will be written next to the If button. Click on OK to exit the dialog box, and the variable sex_ad will be created with its value set to 1 .

The next step is to build the second condition for the new variable, which will set it to the value 2 . Reopen the Compute dialog box. The commands you just gave still appear in the dialog box. Simply assign the value 2 to sex_ad, press If, and enter the new condition to identify Active Duty females. Click Continue, and finish with OK. The condition, if xsexa $=2$ and xbnfgrp $=1$, will be added to the new variable sex_ad.

Once you have created a new variable, you may want to add it permanently to the dataset. The new variable is computed for each case in the file and added to the view in the Data Window after the last variable in the dataset. The variable name is the column heading.

Since the HCSDB data set carries Read-Only status to protect it from corruption, changes to it cannot be saved. At the end of the day, when the work session ends and you exit SPSS, the file will revert to its former status and the new variables will be lost. The solution is to save the dataset under a new name when you exit. Choose the Save As option on the File menu, and you will be prompted to name the file and to save it in a folder of your choosing. Give the file a new name and save it. Open the new expanded file anytime for processing.

Suppose you do not want to use up your disk space for expanded copies of the dataset. Another option is to save the syntax you have generated in a file that can be run as it is needed. Syntax is a written instruction generated by the commands you give in a dialog box. These "sentences" can be saved in a file and executed when needed. This is the batch mode of processing syntax commands. Syntax files take up very little space.

Experienced SPSS programmers, who have mastered SPSS syntax, often prefer to work only in batch mode. This option is available to users who have not mastered the syntax language. You can paste the commands, generated interactively in the dialog box, onto a syntax file.

Recall the compute example for the new variable sex_ad. The screen below is the result of assigning 1 to sex_ad according to an If condition. You clicked on OK to set the value. Returning to the screen and clicking on Paste writes the command to a syntax file.

Click on the Paste button, and the syntax window below will open with the syntax written in it.

Now return to the compute dialog box.

Assign the value 2 to sex_ad and build the "if" condition as in the diagram above. Select Paste, and these commands will be appended to the syntax file.

The results appear in the screen above. SPSS gives default names to syntax files, such as Syntax1, Syntax2, etc., as they are created. It is a good idea to save the syntax, re-naming the file using the Save As option on the File menu. Use a name that has some meaning to you, e.g., New_computes. The file will automatically receive the suffix .sps.

Another option for adding new variables to the dataset is to Recode existing variables into new variables. A common example involves grouping an age variable into age categories as shown below, using the variable RFLDAGE, which exists on our dataset. RFLDAGE is coded in years from 18 to 86, which can be grouped into four age categories:

> 18 to $34=1$ - label: "young adult"
> 35 to $49=2$ - label: "mature adult"
> 50 to $65=3-$ label: "middle-age"
> 66 to $86=4-$ label: "senior citizen"

The new variable is called age_grp.

From the Transform menu, choose Recode and Into Different Variables as pictured below:

The following dialog box will open:

Move RFLDAGE from the variable list on the left to the box labeled Input Variable -> Output Variable. In the Name slot, enter the new variable name age_grp. Enter Age Categories, the variable label, in the Label slot. Click on Change. The dialog box should look like the one below.

Click on Old and New Values, and the following dialog box will open:

The next step in grouping the age variable is to specify the existing values of Age to be recoded. To do this, click on the Range circle under Old Value.

Once the appropriate slots are open, you have four ranges to enter.
First, enter 18 through 34 in the slots provided under Range. Next, enter the value $\mathbf{1}$ in the Value slot under New Value. Add is now illuminated.

Clicking on Add produces the following result:

The specified range appears in the box labeled Old -> New, and the Range and Value slots have been cleared to permit additional entries.

The three remaining ranges are built in the same manner, adding each specification, until the dialog box looks like the one below.

Click on Continue and return to the previous screen.

Click on OK to exit the screen. The new variable age_grp has been created. The Recode syntax can be pasted to a syntax file.

The final task is to create the value labels for the new variable age_grp. Labeling variables makes output from statistical reporting procedures much clearer and more elegant.

In the Data Window, go to the column for the new variable age grp and double click in the gray area containing the variable name. The screen will change to variable view:

The variable age_grp is shown with its attributes.

Click in the cell under Values and the following dialog box will open:

You can then begin to label the values of age_grp. Enter $\mathbf{1}$ in the slot marked Value, and enter the label Young Adult in the slot marked Value Label. The screen will look like the following:

Add is now illuminated. Click on Add and the text of your command will appear in the central box, clearing the slots for further entries, as in the next screen.

Build the other three labels until the screen looks like the following:

Click on OK and the screen will appear as follows:

Click on the Data View tab to return to the data screen.

## Limiting the Number of Variables

The HCSDB dataset contains many variables. To speed up software performance time, it may be desirable to limit the number of variables for analysis. There are ways to do this.

The first is to Save a subset of variables in a new file with a new name. This option is available only through syntax. The Keep or Drop command lets you save a subset of variables. The choice of Keep or Drop is dependent on which list is shorter to write.

For example, suppose you want to run some procedures to evaluate respondent's weight as it relates to their state of health. You are also interested in people that have smoked at least 100 cigarettes in their lifetime, and in differences within these groupings by gender. Moreover, you want to look at regional differences and differences among branches of service by beneficiary group and enrollment. You can do all the work on a subset of only nine variables, saving them in a separate file.

To write the syntax, open a syntax window. If you want to create a new syntax file, choose New, Syntax on the File menu as in the following:

A blank syntax window will open.
Write the following command, substituting the file name and directory specification:

## SAVE OUTFILE=’C:IMYFILESIHLTHCARE.SAV'/KEEP=XTNEXREG XSEXA XENRLLMT SVCSMPL FWRWT XBNFGRP H10051 H10070 H10063.

as in the following:

Upper case is optional. Be sure to enclose the entire file name in single quotes and to type a period at the end of the command.

Run the command by choosing the Run menu and selecting All from the choices.

Open the new file according to the specifications at the beginning of this chapter.
The second way to limit the number of variables for analysis is to define a subset of variables that will appear in the dialog boxes for procedures. Using the Utilities menu, define a subset of variables as in the following:

Select Define Sets.

Insert a name for the subset of variables in the slot labeled Set Name. Move the variables you want to subset from the list on the left to the slot marked Variables in Set. By way of illustration, we will move the nine variables selected for the day's processing.

The screen should look like the following:

Click on Add Set to save the set specifications. The screen will change to the following:

The set is now available for use. To use the set, Close the dialog box, reopen the Utilities menu, choose Use Sets..., and receive this screen:

Move HLTHCARE from the left slot to the right slot, which is labeled Sets in Use. Transfer ALLVARIABLES from the right to the left slot. Leave NEWVARIABLES where it is. OK saves this change.

Until you change this specification, only nine original variables and any new variables will appear in the dialog boxes associated with procedures.

## Limiting the Number of Observations

There are many ways to limit the number of observations available to statistical reporting procedures. The method illustrated here involves using filter variables with a menu-driven Filter By option. Using filters deactivates but does not delete cases from the file. A diagonal line appears next to the filtered cases in the Data Window.

The first task is to compute a filter variable for all the cases in the file. A filter variable has two values: $\mathbf{0}$ and $\mathbf{1}$. The $\mathbf{1}$ indicates that the case will be included for procedures. The $\mathbf{0}$ flags the case for removal.

For example, suppose you want to produce a table for people who live in the West, i.e., cases for which the variable xtnexreg $=3$. You would build a filter variable named filtr_3, which has the value 1 associated with the cases in the West and 0 for all the other cases in the file. The logic is: if xtnexreg $=3$, then filtr_3 = 1, else filtr_3 = 0 .

The screen below shows the final step in computing the filter variable. The variable was first initialized to $\mathbf{0}$. Then, the "If" condition was built for setting the filter variable to $\mathbf{1}$. You are now working with a subset of variables, allowing the dialog boxes to be used more efficiently.

The screen that follows shows the syntax that was generated as you built the variable filtr_3.

Once you build the filter variable, you can apply it for analyzing only those people from the West.
Using the Data menu, choose Select Cases.

You can now produce tables for the subset of cases．
When using filter variables，it is important to check the filter status and to adjust it to fit the present need．Filtered cases are not available for procedures．Moreover，a filter is in effect until it is turned off or until another filter is activated．Check the status line at the bottom of the Data Editor window to see if a filter is activated．In the example above，Filter On is indicated on the status line．To see which filter is active，you must re－enter the Select Cases dialog box．There you can deactivate the filter or activate a new one．

To deactivate a filter，choose All cases and OK as in the screen below．

## Weighting Data

The data file includes a weighting variable, FWRWT, which should be applied to all procedures and runs. Again, using the Data menu, choose Weight Cases. In the dialog box, choose Weight cases by. Move the weight variable from the list on the left into the slot labeled Frequency Variable on the right as shown below:

Click on OK and exit the dialog box. The indication that the data is weighted appears on the status line near the bottom of the screen. As in the following screen, Weight On is specified there.

The status line indicates if the data is weighted. Which weight variable is in effect can only be checked by re-entering the Weight Cases dialog box. Weighting stays in effect until it is canceled or until another weight variable is activated.

## BUILDING TABLES

Building tables starts with creating a new subset of variables that includes $\mathrm{H} 10051, \mathrm{H} 10070, \mathrm{H} 10063$, svcsmpl, xbnfgrp, xsexa, xtnexreg, xenrllmt, FWRWT, and filtr_3. The procedures Means and Crosstabs will probably meet most of your statistical reporting needs. SPSS also offers many options for editing the output tables themselves. Some of these options are explained here.

## Calculating Means

As an example, suppose you want to analyze the health care variables and you want to focus on the West ( $\mathbf{x t n e x r e g ~ = ~ 3 ) . ~ S u p p o s e ~ y o u ~ a r e ~ a l s o ~ i n t e r e s t e d ~ i n ~ h o w ~ t h e ~ r e s p o n d e n t ' s ~ w e i g h t ~ r e l a t e s ~ t o ~ h i s ~}$ self-evaluation of his health for the West region. Within this grouping, you want to examine the effects of the beneficiary group, xbnfgrp, and sex, xsexa.

The health care variables are $\mathbf{H 1 0 0 7 0}$ - respondent's weight, and $\mathbf{H} \mathbf{1 0 0 6 3}$ - assessment of the state of health. The statistic you want to see is the mean of the health care variables for each group in our breakdown.

For this analysis, you can use the subset of variables defined above. The subset includes the weight variable, FWRWT, which you would activate for procedure runs. The subset also includes the new variable, filtr_3, which allows us to select only those cases in the West.

Open the Data menu in the Data Window. In the Weight Cases dialog box, activate the weight variable FWRWT. Reopen the Data menu and, in the Select Cases dialog box, activate the filter variable, filtr_3. On the status line, Filter On and Weight On should appear.

Open the Analyze menu in the Data Window. Choose Compare Means and Means from the options as illustrated below.

The dialog box for the Means procedure will open as in the following screen:

Move the variables $\mathbf{H 1 0 0 7 0}$ and $\mathbf{H 1 0 0 6 3}$, from the variable list on the left to the box underneath Dependent List. These are the two analysis variables. Notice that Layer 1 of 1 is specified in the middle of the dialog box. Move XBNFGRP from the variable list on the left into the box under Independent List. XBNFGRP is the first grouping variable. The screen should look like the following:

Click on Next in the center of the box to create a second layer. The following screen will open:

Notice that Layer $\mathbf{2}$ of $\mathbf{2}$ is specified in the middle of the dialog box. Move xsexa from the variable list on the left into the box under Independent List. Xsexa is the second grouping variable. The screen should look like the following:

To set some options, click on Options and the following dialog box will open:

On the left of the box is a list of statistics, under Statistics. These are all the possible options for statistical output. In the box under Cell Statistics are the default output statistics for the analysis. In this case, Mean is the statistic of interest. Highlight Number of Cases and Standard Deviation and move them to the box at the left, removing them from the analysis, as follows:

Click on Continue and return to the previous screen. Click OK. The Means procedure will run. On the status line, Running Means will appear, and a counter for the number of cases processed will be activated.

When Means has finished processing, the Output Navigator window will open automatically. As the name suggests, the output window is not just for looking at output. A number of options are available for navigating through output, moving tables, and even editing the tables themselves.

The output is organized into two sections. On the left side is a navigating tool, which lists the components of the right side, the actual output. In the left pane, Means is indicated, and indented under it appear Title, Notes, Case Processing Summary, and Report. Clicking on Means highlights and selects all the elements. Lines appear around these elements in the right pane. The indenting indicates that the elements are hierarchically organized, with Means at the top. Clicking on any of the sub-elements selects just that element.

A closer look at the left pane reveals another feature. Hiding underneath the element icons are book icons. The books are either open or closed. If a book is closed, the element is hidden. Notice that the book under the Notes icon is closed. This is a default SPSS option. Double-clicking the icon will open the book, and the Notes will appear in the output. Double-clicking an open book will close it, and the physical element will disappear from the output. Closing a book and hiding the element does not delete the element.

It is possible to select elements in the right pane of the output. Simply click anywhere inside of the actual output element, and that element will be selected.

The output may contain many different procedures. The procedure name will be at the top of the list for each section in the left pane. The procedure name does not actually parallel physical output but indicates the category of the output elements.

As you click on each element in the left pane, you will notice that the screen jumps to the actual output of the element, in the right pane. When you click on the procedure name, you jump to the beginning of the next procedure output. This is a quick way to scroll through your output. It also lets you delete, move, and edit selected elements.

To Edit the Title element, Means, to create a more appropriate title, select the table title by clicking once on the Title icon in the left pane. A box now surrounds the title in the right pane. Double-click anywhere within this box, and a box appears around Means, as shown in the following screen.

You have entered the edit mode for this element, and the cursor appears inside the box. You can delete the word Means and write a title that relates to the information in the table. A possible title appears in the next screen. To exit edit mode, click anywhere outside the box. The change you made will be saved.

If you navigate to the next element, Notes, you see a closed book. Double-click this item, and the notes will appear as follows:

Decide if you want this information to appear in your report. If not, simply double-click the Notes icon, and the notes will again become hidden.

Navigate to Case Processing Summary. The table gives useful information about the number of cases included in and the number of cases excluded from a given procedure. This information is important for the researcher but probably not necessary for the report, so you would double click this item to hide it.

Navigate to Report to see the actual table output from the procedure Means. You can view this table by scrolling through the output. If the table is large, however, scrolling in the output window can be problematic. A better way to review the table is to open it as a Pivot Table Object in a special editor.

Select the table by clicking the Report icon or by clicking inside the table itself. A box will appear around the table. Insert the mouse pointer inside the table and right-click, opening the following dialog box:

Select SPSS Pivot Table Object and Open as pictured below:

The table will appear in a new screen superimposed on the output. Maximize this screen as shown below.

In this special editor, there are many options for formatting the table.
Suppose you want to change the table format from vertical to horizontal. Open the Pivot menu in the tool bar and choose Transpose Rows and Columns as shown below:

The rows and columns will be reversed as shown in the following screen. Though the table appears too wide in the viewer, it will fit the page when printed. You can do all the table editing in the left section of the table, and the changes will spread through the entire table.

You would then notice that certain labels are redundant. The labels, Constructed Beneficiary Group and Male or Female - R are the Variable Labels for the variables. The information in these labels is echoed in the Value Labels, which are also reproduced in the table. You would delete the Variable Labels as follows.

Click inside the section of the table where the label, Constructed Beneficiary Group, appears. Rightclick to open a dialog box, choosing Hide Dimension Label, as illustrated below.

Click inside the table section labeled Male or Female - R and repeat the above procedure. An improved table is shown in the following screen.

The mean values reported are formatted to allow space for the labels of the satisfaction variables. The spaces between the values are not pleasing to the eye. You can shorten these labels and add the lost information in another place, according to the following procedures:

Double-click on the label for health state. Delete the text, entering only the words, Health State. Do the same for the health care label, entering only the words, Weight in pounds.

Double-click on the word, Report, in the center at the top of the table, right-click, and choose Delete from the dialog box.

The resulting table is much more readable. You can then add the deleted information to clarify the table output. Open the Insert menu and choose Title as in the following:
$\$$ SPSS Pivot Table - table1 $\quad \square \times \mathbb{0}$
File Edit View Insert Pivot Format Help

| Statistics | $\begin{aligned} & \hline \text { Titte } \\ & \hline \text { Caption } \\ & \hline \end{aligned}$Footnote |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |
|  |  | ctive Duty $\leqslant 65$ |  | Family of Active $<65$ |  |  | Ret'Survfam $\times 65$ |  |  | R |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total | M: |
| Weight in pounds | 183.36 | 149.93 | 176.46 | 186.85 | 153.29 | 155.78 | 201.86 | 162.25 | 180.52 | 1 |
| Health State | 3.85 | 3.69 | 3.81 | 3.74 | 3.76 | 3.76 | 3.59 | 3.58 | 3.58 |  |

Type in a new title for the table. The final result appears below.

After all the editing changes have been made, exit the Pivot Table editor and return to the output navigator. Click on the File menu and choose Print Preview. Zoom in on the page and review the appearance of the report. The page will appear as the page below.

## Calculating Percents

The Crosstabs procedure offers many options for analyzing data. The distribution of cases resulting from "crossing" one variable with another is often of interest. The number of cases, row percentages, column percentages, total percentages, and residuals are easily reproduced by Crosstabs. A full array of statistics is also available.

The examples given here involve examining relationships between variables, with a view toward the number of cases and the percent of cases in cells produced by "crossing" the variables.

For example, suppose you want to see the percentage of people within each branch of service answered "yes" or "no" to the question, "Did you ever smoke at least 100 cigarettes in your life?" The variables in this analysis are svcsmpl - the branch of service, and $\mathbf{H 1 0 0 5 1}$ - the questionnaire variable. The cases for the analysis are from the South only.

The first task is to build a new filter variable, assigning 1 to the variable when XTNEXREG = 2. You would call the variable filtr_6 and build it the same way you built the filter, filtr_3. Cases from the South are selected when you activate the filter, and the other cases are filtered out. Check the status line for Filter On.

Next, open the Analyze menu in the Data Window, choosing Descriptive Statistics and Crosstabs , as shown below.

The Crosstabs dialog box will open as follows：

Move H10051 from the variable list on the left into the box marked Row（s）：，and move the variable svcsmpl into the box marked Column（s）：．The screen will resemble the following：

For this analysis, there are no Layer variables, so you can proceed to format the table cells.
Click on Cells... and open the following dialog box.

Under Counts, Observed is checked. This refers to the cell count, a statistic you want to see, so you would leave it checked. Under Percentages, check Column because you are interested in the percentage of people in each branch of service. Click Continue and return to the original screen.

Suppose you also want to see the chi-square statistic. Click on Statistics, and the following screen will open:

If you wanted to calculate chi-square, you would check Chi-square as in the screen above, click Continue to return to the first screen, and click OK to run the procedure. Running Crosstabs will appear on the status line, together with the case counter. For this crosstabulation we will not reflect the chi-square statistics.

When the run is completed, the output window will open, and you can proceed to reformat the table. For a given work session, SPSS appends new output to previous output--in our case, the Means procedure. As shown in the next screen, a second section now appears in the left pane, headed by the word Crosstabs. Navigate to the Title section and double-click inside the title box to change the text in the box to fit the table, as in the example below.

As you did for the Means procedure, you would again evaluate the Notes and examine the Case Processing Summary. Hide the Notes and the Case Processing Summary as you did before.

Navigate to the procedure icon. Follow the procedure for opening an SPSS Pivot Table Object, open the table in the special editor and maximize the screen as in the following:

The information you requested is in the table, but the table is hard to read. The first possibility is to realign the percent statistic, bringing it into the row dimension. To do this, open the Pivot menu and choose Pivoting Trays, as in the following screen:

The pivoting tool will appear:

This tool reflects the table structure: rows, columns, and layers. The icons in the margins of the pivoting trays represent the table elements: the variables and the cell statistics. Place the mouse pointer on each icon and notice the element name appear. In this example, on the ROW axis, you would find the variable, H10051 - smoked at least 100 cigaretts in life, and Statistics - the percent of people in each branch of service. On the column axis is the variable, svcsmpl - the branch of service.

Place the mouse pointer on the Statistics icon. Click and drag the icon from the ROW to the COLUMN dimension. The table immediately reformats as in the following screen:

Close the pivoting tool and scroll from side to side in the table. Again, the table appears too wide, but the report will print properly. Notice that the table is much more readable.

The label at the top of the table is the Variable Label for svcsmpl. Select it by double-clicking and edit it for clarity (see the screen below).

The table is now formatted to accommodate the long percent label, creating a lot of wasted space. Double-click this element, delete the text, and replace it with the word, "Percent". The empty space disappears and the table appears as follows:

Next, notice that the label for $\mathbf{H 1 0 0 5 1}$ is awkward. Select and clear it.
Last, edit the text in the table label so that it better expresses the content of the table. The finished table appears as follows:

Check Print Preview to see if the table is acceptable.
The last example shows you how to add a Layer dimension to a Crosstabs analysis. Using the same row variable, H10051, suppose you want to look at the percentage of people by their enrollment status
in TRICARE Prime, xenrlimt, who smoked at least 100 cigarettes in their lifetime. Suppose you are also interested in sex differences, $\mathbf{x s e x a}$, among the groupings. Xsexa is the Layer variable. You want to remain in the South region, using filtr_6 as the filter variable. The cases will be weighted by FWRWT.

The status line indicates Weight On and Filter On. Verify that both the weight and the filter variables are appropriate.

Once more, open the Crosstabs dialog box, enter the analysis variables, and set the Cells options, checking Column under Percentages until the dialog box looks like the following:

Do the following:

- Run Crosstabs.
- Edit the Title element in the Output Navigator.
- Examine Notes and the Case Processing Summary to verify that the crosstab ran as expected.
- Open the table as an SPSS Pivot Table Object, and the following will appear:

The table is difficult to read, but you can improve it by doing the following.

Select the Pivot menu to activate the Pivoting Trays. The table structure is reproduced in the tool as follows:

Place the mouse pointer on each small icon to find the second grouping variable, labeled Male or Female - R, in the ROW dimension. Move it to the COLUMN dimension, and the table changes to the following:

Then drag the Statistics icon to the COLUMN dimension to produce the following change:

Close the Pivoting Trays and hide the dimension label, Male or Female - R, in the table. Then, change the percent label to "Percent" and delete the label for H10051 in the row dimension. Last, revise the label above the table to make it more informative.

The resulting table is both clear and informative.

The Print Preview, as in the view below, shows how the report will print.

## CALCULATING VARIANCES OF ESTIMATES

Sampling error occurs when estimates are derived from a sample rather than a complete census of the population. The sample used for a particular survey is only one of a large number of possible samples of the same size and design that could have been selected. Even if the same questionnaire and instructions were used, the estimates from each sample would differ from the others. The standard error (or square root of the variance) indicates the magnitude of the sampling error and thus measures the precision expected from a particular sample.

It is desirable to assess the accuracy of an estimate. The standard error of a survey estimate measures the precision with which an estimate from one sample approximates the true population value. The standard error can be used to construct confidence intervals for survey parameters, within which the true parameter lies within a measurable degree of certainty.

This section explains how to estimate standard errors or variances for estimators computed from the Quarter II, 2010 Adult HCSDB. For a full discussion of variance estimation methods, see Wolter (1985) and references cited therein.

## Variance Estimation Methods

To account for complex estimators for the sample design ${ }^{1}$, it is customary to use either Taylor series linearization or a resampling method for variance estimation. Neither variance estimation method is, in general, better so the choice of one or the other is largely a matter of convenience. To help users to estimate standard errors using Taylor series linearization or Jackknife replication, the public release files for the Quarter II, 2010 Adult HCSDB include the following variables:

- The stratum variable (STRATUM) for the Taylor series linearization method
- Quarterly final weight (FWRWT)
- Quarterly jackknife replicate weights (FWRWT01 to FWRWT60)

Three popular software packages are available for performing Taylor series linearization method: SAS/STAT ${ }^{\circledR}$ version 8.0 or higher, SUDAAN ${ }^{\text {TM }}$ (Research Triangle Institute, 2001) and WesVarPC (Brick et al. 1996), respectively. The last two software packages can be used for replication methods including Jackknife variance estimation. The discussion below explains how SUDAAN and SAS are used to calculate variance estimates using Taylor series linearization method, and how SUDAAN and WesVarPC are used to calculate variance estimates using Jackknife replication method.

## Taylor Series Linearization Method

For most sample designs (including the Quarter II, 2010 Adult HCSDB), design-based variance estimates for linear estimators of totals or means can be obtained with explicit formulas. However, nonlinear functions such as ratios do not have exact expressions for the variance. The Taylor series linearization method approximates the variance of a nonlinear estimator with the variances of the linear terms from the Taylor series expansion. Woodruff (1971) presented applications of this technique to sample surveys. Details on this method can also be found in "The 2010 Health Care Survey of DoD Beneficiaries: Adult Technical Manual".

To calculate variance estimates based on the Taylor series linearization method with HCSDB's stratified sampling design, both the stratum variable (STRATUM) and the final weight (FWRWT) specified for each data record are needed.

[^0]
## SUDAAN

SUDAAN incorporates the final analysis weight and the survey design to obtain estimates and their sampling errors. With a small overall sampling rate of about 1 percent, you can use the withreplacement design procedure (STRWR) in calculating standard errors.

All SUDAAN procedures require the following:

- The specification of sampling design. The terminology for the stratified with-replacement sample design is DESIGN = STRWR.
- The data file sorted by the variable specified in the NEST statement. For the Quarter II, 2010 Adult HCSDB, the data file for adults must be sorted by STRATUM before using any SUDAAN procedure.
- A FILE TYPE appropriate for SUDAAN, if you use a stand-alone SUDAAN program. For example, some SUDAAN PC versions under Windows or MS-DOS accept only V6.02 through V6.04 SAS files, and FILE TYPE must be specified as SAS. SAS-callable SUDAAN is also available and can be invoked directly in a SAS program with any available SAS file as input; FILE TYPE is not needed here.
- The WEIGHT variable is FWRWT.

The following program is an example of how to use SUDAAN to calculate variance estimates for a mean statistic. Suppose you want to estimate:

- The rating of a specialist (H10031), among all beneficiaries who smoked at least 100 cigarettes in their lifetime (H10051=1) for each TNEX region (XTNEXREG)

```
PROC DESCRIPT DATA=HCSDB /*FILETYPE=SAS*/ DESIGN=STRWR;
WEIGHT FWRWT;
NEST STRATUM;
SUBPOPN H10051=1;
SUBGROUP XTNEXREG;
LEVELS 4;
VAR H10031;
RUN;
```

The following program is an example of how to use SUDAAN to calculate variance estimates for column percentages or row percentages. Suppose you want to estimate:

- A cross tabulation of respondents in TNEX region 3 who last had a blood pressure reading less than 12 months ago, 1 to 2 years ago, and more than 2 years ago (H10048) by TRICARE enrollment (XENRLLMT).

```
PROC CROSSTAB DATA=HCSDB /*FILETYPE=SAS*/ DESIGN=STRWR;
    WEIGHT FWRWT;
    NEST STRATUM;
    SUBPOPN XTNEXREG = 3;
    SUBGROUP H10048 XENRLLMT;
    LEVELS 35;
    TABLES H10048 *XENRLLMT;
    RUN;
```

From the above examples, users should note that:

- PROC DESCRIPT can be used to compute estimates of means and the corresponding standard errors.
- PROC CROSSTAB can be used to compute estimates of proportions and the corresponding standard errors.

For a more detailed and complete discussion of how to use SUDAAN, see Research Triangle Institute (2001).

## SAS

SAS/STAT version 8.0 and higher provide procedures for survey sampling. These procedures can be used to analyze data from a stratified random sampling. These procedures include:

- PROC SURVEYMEANS: for estimating population means, totals, and proportions, including domain (subpopulation) estimates
- PROC SURVEYREG: for performing linear regression model fitting.

The following procedures were added to SAS/STAT version 9.0:

- PROC SURVEYFREQ: for constructing one-way frequency tables, two-way and multiway crosstabulation tables, and estimating population totals and proportions
- PROC SURVEYLOGISTIC: for performing cumulative logit regression model fitting, logit, complementary log-log, and probit link functions, and generalized logit regression model fitting.

The above procedures currently provide only the Taylor series linearization method to estimate standard error or variance of the estimate.

The following program is an example of how to use SAS/STAT to calculate variance estimates for a mean statistic. Suppose you want to estimate:

- The rating of a specialist (H10031), among all beneficiaries who smoked at least 100 cigarettes in their lifetime (H10051=1) for each TNEX region (XTNEXREG)

```
PROC SURVEYMEANS DATA=HCSDB;
WEIGHT FWRWT;
STRATA STRATUM;
DOMAIN H10051 * XTNEXREG;
VAR H10031;
RUN;
```

The above codes will provide output for H10051=1 and 2. User only needs to use output from H10051=1.

The following program is an example of how to use SAS/STAT to calculate variance estimates for column percentages or row percentages. Suppose you want to estimate:

- A cross tabulation of respondents in each TNEX region who last had a blood pressure reading less than 12 months ago, 1 to 2 years ago, and more than 2 years ago (H10048) by TRICARE enrollment (XENRLLMT).

## PROC SURVEYFREQ DATA=HCSDB;

 WEIGHT FWRWT;```
STRATA STRATUM;
TABLES XTNEXREG * H10048 * XENRLLMT;
RUN;
```

For a more detailed and complete discussion of how to use SAS/STAT, see SAS Institute Inc. (1999).

## Jackknife Replication Method

Another popular way to estimate the variance is to use a resampling method such as Jackknife replication, balanced repeated replication, random groups, or the bootstrap method. Like other replication methods, Jackknife replication constructs a number of subsamples (replicates) from the full sample and computes the statistics of interest for each replicate (with the same formula as the full sample estimate). The mean square error of the replicate estimates around their corresponding full estimate provides an estimate of the sampling variance of the statistic of interest regardless of the functional form of the statistic.

There are 60 replicate weights (FWRWT01-FWRWT60) for the Quarter II, 2010 Adult HCSDB file. Construction of these weights is described in the "2010 Health Care Survey of DoD Beneficiaries: Adult Technical Manual". With the replicate weights, you can produce Jackknife standard errors using in-house or custom written software, or you can use a publicly available software package such as WesVarPC or SUDAAN 7.5. Because WesVarPC 2.02 is available as freeware on the World Wide Web (http://www.westat.com/wesvar/demo/index.html), the following example explains how it is used to produce Jackknife variance estimates for statistics from the Quarter II, 2010 Adult HCSDB.

Suppose you want to estimate the mean rating of specialists (H10031) among all beneficiaries who smoked at least 100 cigarettes in their lifetime (H10051=1) for each region (XTNEXREG). You would use SUDAAN or WesVarPc as follows.

## SUDAAN

```
PROC DESCRIPT DATA=HCSDB DESIGN=JACKKNIFE;
WEIGHT FWRWT;
JACKWGTS FWRWT1-FWRWT60 / ADJJACK=1;
SUBPOPN H10051=1;
SUBGROUP XTNEXREG;
LEVELS 4;
VAR H10031;
OUTPUT NSUM MEAN SEMEAN / TABLECELL=DEFAULT FILENAME=OUT1;
RUN;
```

## WESVARPC

- Create a SAS V6.04 file, SAS Transport file, or ASCII file. WesVarPC has a restriction for the input data format. All files must be converted to one of these three types of files before being imported to WesVarPC.
- Create a WesVarPC data file. From the Prep menu, choose the Import Data Files screen and import all variables for the analysis. For this example, input H10051, H10031, and XTNEXREG into the Variables box, FWRWT1-FWRWT60 into the Replicates box, and MPRID into the ID box. Also specify the replication method as JK1 on this screen.
- Create a data file for the subpopulation. Specify the subpopulation by choosing the Subpop WesVarPC Data File from the Prep menu: H10051=1.
- Calculate estimates. From the Tables menu, choose New and select the file created from the above procedure. Then, from the Table Request screen, specify H10031 as the Analysis variable, MEAN (H10031) as the Compute Statistics, and XTNEXREG as the Table.

The above steps can also be followed to produce standard errors. The WesVarPC user's manual (Brick et al. 1996) provides other possible methods for producing standard errors. The latest WesVarPC 4.0 is no longer freeware and can be purchased from Westat.

PAGE IS INTENTIONALLY LEFT BLANK TO ALLOW FOR DOUBLE-SIDED COPYING

## Chapter $\square$

## Codebook

This chapter describes every variable in the database. This codebook will also be helpful in identifying which data are available for various analyses, and what, if any, recoding of variables will meet your needs. It may also be useful in reviewing output.

The variables are in order based on their order in the database. An alphabetical listing (see Table of Contents) is provided to assist in locating variables.

The codebook contains frequency distributions for both discrete and continuous variables. A discrete variable is one that has only a few values. A continuous variable may have many possible values.

Below are two examples of the presentation of variables in the codebook. For each variable, we include the variable name, definition, weighted and unweighted frequency distributions, and the format value for each value. The first example contains a frequency distribution for a discrete variable.

H10005 -
In last year: facility used most for health care

| Value | Unweighted |  | Weighted |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

| 4 | 362 | 2.88 | 308345.60 | 4.18 | Veterans Affairs (VA) clinic or hospital |
| 5 | 452 | 3.60 | 287138.30 | 3.89 | Went to none of listed types of facility |

The table below contains an example of a frequency distribution for a continuous variable: age. The frequency does not list every possible value of age individually but instead shows several age ranges that together cover all possible values of age. You will notice that the second to last range representing ages " 75 years to 85 " includes 313 respondents aged 75 to 85.

RDAGEQY -
Age at time of data collection-Capped (18 and below, 86 and above)

## Health Care Survey of DoD Beneficiaries

January 2010

According to the Privacy Act of 1974 (5 U.S.C. §552a), the Department of Defense is required to inform you of the purposes and use of this survey. Please read it carefully.

Authority: 10 U.S.C. $\S 1074$ (Medical and Dental Care for Members and Certain Former Members, as amended by National Defense Authorization Act of 1993, Public Law 102-484, §706); 10 U.S.C. §1074f (Medical Tracking System for Members Deployed Overseas); 32 C.F.R. §199.17 (TRICARE Program); 45 C.F.R. Part 160 Subparts A and E of Part 164 (Health Insurance Portability and Accountability Act of 1996, Privacy Rule); DoD 6025.18-R (Department of Defense Health Information Privacy Regulation); DoD 6025.13-R (Military Health System Clinical Quality Assurance Program Regulation); 64 FR 22837 (DHA 08 - Health Affairs Survey Data Base, April 28, 1999); and, E.O. 9397 (as amended, November 20, 2008, for SSN collection).

Purpose: This survey helps health policy makers gauge beneficiary satisfaction with the current military health care system and provides valuable input from beneficiaries that will be used to improve the Military Health System.
Routine Uses: None.
Disclosure: Participation is voluntary. Failure to respond will not result in any penalty to the respondent. However, maximum participation is encouraged so that data will be as complete and representative as possible.

## YOUR PRIVACY

Your participation in this survey effort is very important. Your responses are confidential and your participation is voluntary. The number on the back of this survey is ONLY used to let us know if you returned your survey so we don't have to send you reminders.
This is your opportunity to tell officials of your opinions and experiences with the current military health care system. It is also an opportunity to provide feedback and identify areas where improvements are needed.

The survey processing center removes all identifying information before sending the results to the Department of Defense.

Your information is grouped with others and no individual information is shared. Only group statistics will be compiled and reported. No information about you as an individual will be disclosed.

## SURVEY INSTRUCTIONS

Answer all the questions by checking the box to the left of your answer. You are sometimes told to skip over some questions in this survey. When this happens you will see an arrow with a note that tells you what question to answer next, like this:

Please return the completed questionnaire in the enclosed postagepaid envelope within seven days. If the envelope is missing, please send to:

```
Office of the Assistant Secretary of Defense (Health Affairs) TMA/HPAE
c/o Synovate Survey Processing Center
PO Box 5030
Chicago, IL 60680-4138
```

## SURVEY STARTS HERE

As an eligible TRICARE beneficiary, please complete this survey even if you did not receive your health care from a military facility.
Please recognize that some specific questions about TRICARE benefits may not apply to you, depending on your entitlement and particular TRICARE program.
This survey is about the health care of the person whose name appears on the cover letter. The questionnaire should be completed by that person. If you are not the addressee, please give this survey to that person.

1. Are you the person whose name appears on the cover Percent of letter?

*Percent of responses exclude values coded as missing or skipped, therefore denominators vary depending on number of eligible respondents per question.
2. Which health plan did you use for all or most of your health care in the last 12 months?
Percent of Percent of
Responses ${ }^{\star}$ MARK ONLY ONE ANSWER.

|  |  | See Note 1 |
| :---: | :---: | :---: |
| 46.4\% | $1 \square$ | TRICARE Prime |
| 9.4\% | $3 \square$ | TRICARE Extra or Standard (CHAMPUS) |
| 1.1\% | $11 \square$ | TRICARE Plus |
| 1.1\% | $12 \square$ | TRICARE Reserve Select |
| 21.7\% | $4 \square$ | Medicare (may include TRICARE for Life) |
| 1.8\% | $5 \square$ | Federal Employees Health Benefit Program (FEHBP) |
| 0.4\% | $6 \square$ | Medicaid |
| 2.1\% | $7 \square$ | A civilian HMO (such as Kaiser) |
| 8.4\% | $8 \square$ | Other civilian health insurance (such as Blue Cross) |
| 0.8\% | $9 \square$ | Uniformed Services Family Health Plan (USFHP) |
| 3.4\% | $10 \square$ | The Veterans Administration (VA) |
| 0.2\% | $13 \square$ | Government health insurance from a country other than the US |
| 3.0\% | -5 $\square$ | Not sure |
|  | -6 $\square$ | Did not use any health plan in the last 12 months $\rightarrow$ Go to Question 5 |

For the remainder of this questionnaire, the term health plan refers to the plan you indicated in Question 3.
4. How many months or years in a row have you been in this health plan?

| $1.7 \%$ | 1 | $\square$ | Less than 6 months |
| :---: | :---: | :---: | :--- |
| $7.1 \%$ | 2 | $\square$ | 6 up to 12 months |
| $9.6 \%$ | 3 | $\square$ | 12 up to 24 months |
| $20.5 \%$ | 4 | $\square$ | 2 up to 5 years |
| $22.0 \%$ | 5 | $\square$ | 5 up to 10 years |
| $39.2 \%$ | 6 | $\square$ | 10 or more years |

## YOUR HEALTH CARE IN THE LAST 12 MONTHS

These questions ask about your own health care. Do not include care you got when you stayed overnight in a hospital. Do not include the times you went for dental care visits.
5. In the last 12 months, where did you go most often for your health care?

Percent of
Responses $^{*}$ MARK ONLY ONE ANSWER.
Responses*

## TRICARE CIVILIAN PROVIDERS

(OUTSIDE OF MILITARY INSTALLATIONS)
The following questions ask about your experiences with civilian providers while using TRICARE. TRICARE, including TRICARE Prime and Extra, is the healthcare system of the Department of Defense that provides care for active duty and retired military personnel and their dependents. TRICARE includes the hospitals, clinics, and pharmacies of the three Services, supplemented by offsite civilian providers. Some are members of TRICARE's civilian provider network, which is made up of the doctors, clinics, hospitals, and other health care providers who are part of DoD's preferred provider pool. Others accept payment from TRICARE, but are not network members.
34. A personal doctor or nurse is the health provider who knows you best. This can be a general doctor, a specialist doctor, a nurse practitioner, or a physician assistant.

36. What problems did you encounter in finding a personal doctor who would accept TRICARE?

S10V21A-S10V21J

37. The TRICARE Civilian network is made up of the doctors, clinics, hospitals, and other health care providers who are part of DoD's preferred provider pool. Is your personal doctor or nurse part of TRICARE's civilian provider network?

Yes
No
I do not have a personal doctor or nurse

38. In the last 12 months, how much of a problem was it to find a doctor or nurse from the TRICARE civilian provider

| $7.2 \%$ | $\square$ |

SSGT DAVE BRYANT
222 S. RIVERSIDE DRIVE
CHICAGO, IL 60606-5809

## Dear SSGT DAVE BRYANT:

We need your help! The Department of Defense needs your help in completing the January 2010 Health Care Survey of Department of Defense Beneficiaries. Our mission is to provide beneficiaries with the highest quality health care that we can. To accomplish this, we need to know what we are doing right and what needs improvement. We depend on you to keep us informed. By sharing your thoughts and feelings about your health care experiences, you can help us make health care better for all beneficiaries and their families.

This survey asks about your experience and satisfaction with the health care services you have received in the past 12 months. You are one of a few military beneficiaries who have been selected for this study. Your responses are important to us even if you do not receive your health care through the military.

The survey will be mailed to you within a month. However, you may complete it now on our web site using the following address and password.

## www.synovate.net/januarysurvey10 <br> Password: 7654321

If your installation's server blocks the survey site, you can complete the survey online using a civilian internet source.

If you have questions about the survey, need the survey sent to your new address or do not wish to participate, please contact the Survey Processing Center. You can reach them by email at survey-dodq2@synovate.net; by calling 1-877-236-2390; or sending a fax to 1-800-409-7681. Please reference your ID number, 12345678, in all communication.

For information about the legitimacy of the survey, please go to the TRICARE Web site at www.tricare.mil/hpae/home and click on the List of Approved Surveys. The DoD Report Control Symbol for this survey is RCS\# DD-HA(A) 1942. Thank you for your time and assistance in this very important effort.

Sincerely,

Thomas V. Williams, Ph.D.
Director, Health Program Analysis and Evaluation Directorate
Office of the Assistant Secretary of Defense (Health Affairs)/TRICARE Management Activity

January 4, 2010
12345678 26C3 0201201
SSGT DAVE BRYANT
222 S. RIVERSIDE DRIVE
CHICAGO, IL 60606-5809

## Dear SSGT DAVE BRYANT:

We need your help. Please fill out the enclosed January 2010 Health Care Survey of Department of Defense Beneficiaries that asks about the health care you received in the last 12 months. By completing this survey, you will provide the information we need to improve the health care services for our entire military community. Even if you did not receive any of your health care from a military facility, we still ask that you complete the survey. Your views are important to us and your opinions count. We hope you will take the time to answer these questions. Most people find it takes only 20 minutes to answer these questions.

If you have already completed this survey online, we thank you and please disregard this letter.
You have been chosen as part of a scientific sample of military beneficiaries. To get accurate results, we need to get answers from you and other people we ask to take part in this survey. Of course, what you have to say is private, and your answers will be pooled with others to mask your individual response while providing aggregate information to decision makers. What you write will be used only by this study. You may choose to fill out this survey or not. If you choose not to, this will not affect the benefits you get.

For your convenience, you can also complete the survey online by using the link and password below. If your installation's server blocks the survey site, you can complete the survey online using a civilian internet source.

## WE NEED YOUR HELP!

HELLO!
5V73-20

Recently, we sent you the January 2010 Health Care Survey of Department of Defense Beneficiaries. If you already filled it out and returned it, please accept our thanks. If you have not returned a completed survey, please do so now.

We share a common goal: a great military health care system. By completing this survey, you will provide the information we need to improve the health care services for our entire military community. This survey includes questions about the health care services you may have received in the past 12 months. Even if you did not receive any of your health care from a military facility, we still ask that you complete the survey. Your views are important to us and your opinions count. We hope you will take the time to answer these questions. Most people find it takes only 20 minutes to answer these questions.

For your convenience, you can also complete the survey online by using the link and password below. If your installation's server blocks the survey site, you can complete the survey online using a civilian internet source.

## APPENDIX D

Coding Scheme and Coding Tables - Quarter II

PAGE IS INTENTIONALLY LEFT BLANK TO ALLOW FOR DOUBLE-SIDED COPYING

## Quarter II

2010 HEALTH CARE SURVEY OF DOD BENEFICIARIES (HCSDB) CODING SCHEME AND CODING TABLES

## BASIC SAS AND ASCII/EBCDIC MISSING DATA AND NOT APPLICABLE CODES

| SAS |  |  |
| :---: | :---: | :--- |
| Numeric | ASCII/EBCDIC |  |
| . | Numeric |  |
| . O | -9 | No response |
| .N | -7 | Out of range error |
| .D | -6 | Not Applicable or valid skip |
| .I | -5 | Scalable response of "don't know" or "not sure" |
| .C | -4 | Incomplete grid error |

Missing values '.' and incomplete grids '.I' are encoded prior to implementation of the Coding Scheme Notes (see below).

## Coding Table for Note 1:

H10003, H10004

| N1 | H10003 <br> is: | H10004 <br> is: | H10003 <br> is coded as: | H10004 <br> is coded as: |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | $1-13$, health plan, <br> -5, not sure | Marked or missing <br> response | Stands as original <br> value | Stands as original <br> value |  |
| 2 | -6, no usage in <br> past 12 months | Marked response | Stands as original <br> value | .C, question should be <br> skipped | F |
| 3 | -6, no usage in <br> past 12 months | Missing response | Stands as original <br> value | .N, valid skip | F |
| 4 | Missing response | Marked or missing <br> response | Stands as original <br> value | Stands as original <br> value |  |

* Indication of backward coding (B) or forward coding (F).

Coding Table for Note 2:
H10006, H10007, H10008

| N2 | $\begin{aligned} & \text { H10006 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { H10007-H10008 } \\ & \text { are: } \end{aligned}$ | H10006 is coded as: | H10007-H10008 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: yes | "All are blank" | Stands as original value | Stand as original value |  |
| 2 | 1:yes or missing response | "Blank or NA" | 2: no | .N, valid skip if missing; .C, question should be skipped if marked | $\begin{aligned} & \hline \text { B } \\ & \text { F } \end{aligned}$ |
| 3 | 1: yes | "One marked, and one NA" | Stands as original value | ., missing if -6; stand as original value otherwise | F |
| 4 | 1: yes | At least one is "marked" | Stands as original value | Stand as original value |  |
| 5 | 2: no | "One marked, and one NA" | Stands as original value | .C, question should be skipped if marked | F |
| 6 | 2: no or missing response | At least one is "marked" | 1: yes | ., missing if -6; stand as original value otherwise | $\begin{aligned} & \hline \text { B } \\ & \text { F } \end{aligned}$ |
| 7 | 2: no | "All are blank" or "Blank or NA" | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 8 | Missing response | "All are blank" | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 2:
Responses to H10007-H10008 are all missing.
Definition of "Blank or NA" in Coding Table for Note 2:
All of the following are true: H10007-H10008 are a combination of not applicable (-6) or missing.
Definition of "One marked and one NA" in Coding Table for Note 2:
H10007-H10008 have one response marked not applicable (-6) and one marked response (other than not applicable).
Definition of "marked" in Coding Table for Note 2:
Any pattern of marks outside the definitions "all are blank", "One marked and one NA", and "Blank or NA".

| Coding Table for Note 3: H10009, H10010, H10011 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| N3 | $\begin{aligned} & \text { H10009 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { H10010-H10011 } \\ & \text { are: } \end{aligned}$ | H10009 is coded as: | H10010-H10011 are coded as: | * |
| 1 | 1: yes | "All are blank" | Stands as original value | Stand as original value |  |
| 2 | 1:yes or missing response | "Blank or NA" | 2: no | .N, valid skip if missing; .C, question should be skipped if marked | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \end{aligned}$ |
| 3 | 1: yes | "One marked and one NA" | Stands as original value | ., missing if -6 ; stand as original value otherwise | F |
| 4 | 1: yes | At least one is "marked" | Stands as original value | Stand as original value |  |
| 5 | 2: no | "One marked and one NA" | Stands as original value | .C, question should be skipped if marked | F |
| 6 | 2: no or missing response | At least one is "marked" | 1: yes | ., missing if -6 ; stand as original value otherwise | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \end{aligned}$ |
| 7 | 2: no | "All are blank" or "Blank or NA" | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 8 | Missing response | "All are blank" | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 3:
Responses to H10010-H10011 are all missing.
Definition of "Blank or NA" in Coding Table for Note 3:
All of the following are true: H10010-H10011 are a combination of not applicable (-6) or missing.
Definition of "One marked and one NA" in Coding Table for Note 3:
H10010-H10011 have one response marked not applicable (-6) and one marked response (other than not applicable).
Definition of "marked" in Coding Table for Note 3:
Any pattern of marks outside the definitions "all are blank", "One marked and one NA", and "Blank or NA".

## Coding Table for Note 4:

H10013, H10014-H10018

| N4 | H10013 is: | $\begin{aligned} & \text { H10014-H10018 } \\ & \text { are: } \end{aligned}$ | H10013 is coded as: | H10014-H10018 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: None | Any value | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 2 | 2-7, or missing response | "Blank or NA" | 1: None | .N, valid skip if missing; .C, question should be skipped if marked | B |
| 3 | 2-7 | At least one is "marked" or <br> "all are blank" | Stands as original value | ., missing if -6 ; stand as original value otherwise | F |
| 4 | Missing response | "All are blank" | Stands as original value | Stand as original value |  |
| 5 | Missing response | At least one is "marked" | Stands as original value | ., missing if -6 ; stand as original value otherwise | F |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 4:
Responses to H10014-H10018 are all missing.
Definition of "blank or NA" in Coding Table for Note 4:
All of the following are true: H10014-H10018 are a combination of not applicable (-6) or missing.
Definition of "marked" in Coding Table for Note 4:
Any pattern of marks outside the definitions "all are blank" and "Blank or NA".

| Coding Table for Note 5: H10015, H10016-H10017 |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| N5 | H10015 is: | H10016 is: | H10017 is: | H10015 is coded as: | H10016 is coded as: | H10017 is coded as: | * |
| 1 | .N, valid skip, or .C, question should be skipped | .N, valid skip, or .C, question should be skipped | .N, valid skip, or <br> .C, question should be skipped | Stands as original value | Stands as original value | Stands as original value |  |
| 2 | 1: Yes | Any value | Any value | Stands as original value | Stands as original value | Stands as original value |  |
| 3 | 2: No, missing | 1: Definitely yes 2: Somewhat yes | Any value | 1: Yes | Stands as original value | Stands as original value | B |
| 4 | 2: No, missing | 3: Somewhat no, 4: Definitely no, or missing | 1: Definitely yes <br> 2: Somewhat yes | 1: Yes | Stands as original value | Stands as original value | B |
| 5 | 2: No | 3: Somewhat no, 4: Definitely no, or missing | 3: Somewhat no, 4: Definitely no, or missing | Stands as original value | .N, valid skip if missing; <br> .C, question should be skipped if marked | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 6 | Missing response | 3: Definitely no, 4: Somewhat no, or missing | 3: Definitely no, <br> 4: Somewhat no, or missing | Stands as original value | Stands as original value | Stands as original value |  |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 6:

H10019, H10020-H10027, S10009

| N6 | H10019 is: | $\begin{aligned} & \text { H10020- } \\ & \text { H10024 } \\ & \text { are: } \end{aligned}$ | $\begin{aligned} & \text { H10025- } \\ & \text { H10026, } \\ & \text { S10009 are: } \end{aligned}$ | $\begin{aligned} & \text { H10027 } \\ & \text { is: } \end{aligned}$ | H10019 is coded as: | H10020H10026 and S10009 are coded as: | H10027 is coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: Yes | Any value | Any value | Any value | Stands as original value | Stand as original value | ., missing if -6 ; stands as original value otherwise | F |
| 2 | $\begin{aligned} & \hline \text { 2: No, } \\ & \text { missing } \end{aligned}$ | Any value | Any value | 0-10 | 1: Yes | Stand as original value | Stands as original value | B |
| 3 | 2: No, missing | At least one is "marked" | Any value | Missing response | 1: Yes | Stand as original value | Stands as original value | B |
| 4 | 2: No | At least one is "marked" | Any value | -6: No personal doctor | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | .C, question should be skipped | F |
| 5 | 2: No | "Blank or NA" | Any value | -6: No personal doctor or missing | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 6 | Missing response | Any value | Any value | -6: No personal doctor | 2: No | .N, valid skip if missing; .C, question should be skipped if marked | .C, question should be skipped | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \end{aligned}$ |
| 7 | Missing response | $\begin{aligned} & \text { "Blank or } \\ & \text { NA" } \end{aligned}$ | Any value | Missing response | Stands as original value | Stand as original value | Stands as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "blank or NA" in Coding Table for Note 6:
All of the following are true: H10020 is either 0: None or missing and H10021-H10024 are either not applicable (-6) or missing.

Definition of "marked" in Coding Table for Note 6:
Any pattern of marks for H10020-H10024 outside the definition "blank or NA".

| Coding Table for Note 7: H10020, H10021-H10026 |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| N7 | H10020 is: | $\begin{aligned} & \text { H10021-H10024 } \\ & \text { are: } \end{aligned}$ | $\begin{aligned} & \text { H10025- } \\ & \text { H10026 } \\ & \text { are: } \end{aligned}$ | H10020 is coded as: | H10021-H10026 are coded as: | * |
| 1 | .N, valid skip, or .C, question should be skipped | .N, valid skip, or .C, question should be skipped | Any value | Stands as original value | Stand as original value |  |
| 2 | 0: None | Any value | Any value | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 3 | 1-6, or missing response | "Blank or NA" | Any value | 0: None | .N, valid skip if missing; .C, question should be skipped if marked | B |
| 4 | 1-6, or missing response | At least one is "marked" or "all are blank" | Any value | Stands as original value | ., missing if -6 ; stand as original value otherwise | F |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 7:
Responses to H10021-H10024 are all missing.
Definition of "blank or NA" in Coding Table for Note 7:
All of the following are true: H10021-H10024 are a combination of not applicable (-6) or missing.
Definition of "marked" in Coding Table for Note 7:
Any pattern of marks for H10021-H10024 outside the definitions "all are blank" and "blank or NA".

Coding Table for Note 8:
H10025, H10026

| N8 | H10025 is: | H10026 is: | H10025 is coded as: | H10026 is coded as: |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | .N, valid skip, or <br> .C, question should be <br> skipped | .N, valid skip, or <br> .C, question should be <br> skipped | Stands as original value | Stands as original value |  |
| 2 | 1: yes | Any value | Stands as original value | Stands as original value |  |
| 3 | 2: no or missing response | $1,2,3,4$ | 1: yes | Stands as original value | B |
| 4 | 2: no | Missing response | Stands as original value | .N, valid skip | F |
| 5 | Missing response | Missing response | Stands as original value | Stands as original value |  |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 8A1:

S10009, S10010

| N8A1 | S10009 is: | S10010 is: | S10009 is coded as: | S10010 is coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | .N, valid skip, or .C, question should be skipped | Any value | Stands as original value | Stands as original value |  |
| 2 | 1 : yes | Any value | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 3 | 2: no | Any value | Stands as original value | Stands as original value |  |
| 4 | Missing | Any value | Stands as original value | Stands as original value |  |

Coding Table for Note 9:
H10028, H10029-H10031

| N9 | $\begin{aligned} & \text { H10028 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { H10029-H10031 } \\ & \text { are: } \end{aligned}$ | H10028 is coded as: | H10029 is coded as: | H10030-H10031 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: Yes | Any value | Stands as original value | ., missing if -6 ; stands as original value otherwise | Stand as original value | F |
| 2 | 2: No, missing | At least one is "marked" | 1: Yes | ., missing if -6; stands as original value otherwise | Stand as original value | B |
| 3 | 2: No | "All are blank" or <br> "Blank or NA" | Stands as original value | .N, valid skip if missing; <br> .C, question should be skipped if marked | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 4 | Missing response | "Blank or NA" | 2: No | .N, valid skip if missing; .C, question should be skipped if marked | .N, valid skip if missing; <br> .C, question should be skipped if marked | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \end{aligned}$ |
| 5 | Missing response | "All are blank" | Stands as original value | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 9:
Responses to H10029-H10031 are all missing.
Definition of "blank or NA" in Coding Table for Note 9:
All of the following are true: H10029 and H10031 are a combination of not applicable (-6) or missing. H10030 is either missing or 0 : None.

Definition of "marked" in Coding Table for Note 9:
Any pattern of marks outside the definitions "all are blank" and "Blank or NA".

## Coding Table for Note 10:

H10030, H10031

| N10 | H10030 is: | H10030 is coded as: | H10031 is coded as: |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | .N, valid skip, or <br> .C, question should be <br> skipped | .N, valid skip, or <br> .C, question should be <br> skipped | Stands as original value | Stands as original value |  |
| 2 | 1-5: specialists | 0-10, or missing <br> response | Stands as original value | Stands as original value |  |
| 3 | $1-5: ~ s p e c i a l i s t s ~ o r ~$ <br> missing response | -6: didn't need to see a <br> specialist | $0:$ None | .C, question should be skipped | B <br> F |
| 4 | 0: none | Any value | Stands as original value | .N, valid skip if missing; .C, <br> question should be skipped if <br> marked | F <br> 5 |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 10B1:

S10V19, S10V22

| N10B1 | S10V19 is: | S10V22 is: | S10V19 is coded as: | S10V22 is coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: yes, 2: no, or missing response | 1: yes, 2: no, or missing response | Stands as original value | Stands as original value |  |
| 2 | 1: yes or 2: no | -6: do not have a personal doctor or nurse | Stands as original value | ., missing | F |
| 3 | Missing response | -6: do not have a personal doctor or nurse | -6: do not have a personal doctor or nurse | Stands as original value | B |
| 4 | -6: do not have a personal doctor or nurse | 1: yes or 2: no | ., missing | Stands as original value | B |
| 5 | -6: do not have a personal doctor or nurse | Missing response | Stands as original value | -6: do not have a personal doctor or nurse | F |
| 6 | -6: do not have a personal doctor or nurse | -6: do not have a personal doctor or nurse | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Coding Table for Note 10B2:
S10V20, S10V21A-S10V21J

| N10B2 | S10V20 <br> is: | S10V21A-S10V21J <br> are: |  | S10V20 <br> is coded as: | S10V21A-S10V21J <br> are coded as: |  | $*$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :---: | :---: |
| 1 | $1-2:$ problem | Any value | Stands as original value | Stand as original value |  |  |  |
| 2 | 3: not a problem | "All are unmarked" | Stands as original value | .N, valid skip | F |  |  |
| 3 | 3: not a problem | "At least one is <br> marked" | ., missing | Stand as original value | B |  |  |
| 4 | Missing response | "All are unmarked" | Stands as original value | ., missing |  |  |  |
| 5 | Missing response | "At least one is <br> marked" | Stands as original value | Stand as original value | F |  |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are unmarked" in Coding Table for Note 10B2:
Responses to S10V21A-S10V21J are all unmarked.
Definition of "at least one is marked" in Coding Table for Note 10B2:
Any pattern of marks outside the definition "all are unmarked".

## Coding Table for Note 10B3:

S10V06, S10V11A-S10V11I

| N10B3 | S10V06 <br> is: |  | S10V11A-S10V11I <br> are: | S10V06 <br> is coded as: | S10V11A-S10V11I <br> are coded as: |  | $*$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :---: | :---: |
| 1 | 1-2: problem | Any value | Stands as original value | Stand as original value |  |  |  |
| 2 | 3: not a problem or <br> -6: did not try to find <br> a doctor from the <br> civilian network | "All are unmarked" | Stands as original value | .N, valid skip | F |  |  |
| 3 | 3: not a problem or <br> -6: did not try to find <br> a doctor from the <br> civilian network | "At least one is <br> marked" | ., missing | Stand as original value | B |  |  |
| 4 | Missing response | "All are unmarked" | Stands as original value | ., missing |  |  |  |
| 5 | Missing response | "At least one is <br> marked" | Stands as original value | Stand as original value |  |  |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are unmarked" in Coding Table for Note 10B3:
Responses to S10V11A-S10V11I are all unmarked.
Definition of "at least one is marked" in Coding Table for Note 10B3:
Any pattern of marks outside the definition "all are unmarked".

## Coding Table for Note 10B4:

S10V23-S10V24

| N10B4 | S10V23 is: | S10V24 is: | S10V23 is coded as: | S10V24 is coded as: | $*$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1: yes | Any value | Stands as original value | Stands as original value |  |
| 2 | 2: no or <br> missing response | 1: yes or <br> 2: no | Missing response | Stands as original value | .N, valid skip |

* Indication of backward coding (B) or forward coding (F).

Coding Table for Note 10B5:
S10V25, S10V26A-S10V26J, S10V27-S10V28, S10V07, S10V12A-S10V12H

| N10B5 | $\begin{aligned} & \text { S10V25 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { S10V26A- } \\ & \text { S10V26J } \\ & \text { are: } \end{aligned}$ | $\begin{aligned} & \text { S10V27-S10V28, } \\ & \text { S10V07, S10V12A- } \\ & \text { S10V12H } \\ & \text { are: } \end{aligned}$ | S10V25 is coded as: | S10V26A-S10V26J <br> are coded as: | $\begin{aligned} & \text { S10V27-S10V28, } \\ & \text { S10V07, S10V12A- } \\ & \text { S10V12H } \\ & \text { are coded as: } \end{aligned}$ | * |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1-2: problem | Any value | Any value | Stands as original value | Stand as original value | Stand as original value |  |
| 2 | 3: not a problem | "All are unmarked" | Any value | Stands as original value | .N, valid skip | Stand as original value | F |
| 3 | 3: not a problem or -6: did not need a civilian specialist | "At least one is marked" | Any value | ., missing | Stand as original value | Stand as original value | B |
| 4 | -6: did not need a civilian specialist | "All are unmarked" | "All are blank or N/A" | Stands as original value | .N, valid skip | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 5 | -6: did not need a civilian specialist | "All are unmarked" | "At least one is marked" | ., missing | Stand as original value | Stand as original value | B |
| 6 | Missing response | "All are unmarked" | Any value | Stands as original value | ., missing | Stand as original value | F |
| 7 | Missing response | "At least one is marked" | Any value | Stands as original value | Stand as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are unmarked" in Column 3 of Coding Table for Note 10B5:
Responses to S10V26A-S10V26J are all unmarked.
Definition of "at least one is marked" in Column 3 of Coding Table for Note 10B5:
Any pattern of marks outside the definition "all are unmarked".
Definition of "all are blank or N/A" in Column 4 of Coding Table for Note 10B5:
Responses to S10V27-S10V28 are missing, response to S10V07 is -6: I did not try to find a specialist in the civilian network, and responses to S10V12A-S10V12H are all unmarked.

Definition of "at least one is marked" in Column 4 of Coding Table for Note 10B5:
Any pattern of marks outside the definition "all are blank or N/A".

| Coding Table for Note 10B6: S10V07, S10V12A-S10V12H |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| N10B6 | $\begin{aligned} & \text { S10V07 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { S10V12A-S10V12H } \\ & \text { are: } \end{aligned}$ | S10V07 is coded as: | S10V12A-S10V12H are coded as: | * |
| 1 | .N, valid skip, or .C, question should be skipped | .N, valid skip, or .C, question should be skipped | Stands as original value | Stands as original value |  |
| 2 | 1-2: problem | Any value | Stands as original value | Stand as original value |  |
| 3 | 3: not a problem or -6 : did not try to find a specialist from the civilian network | "All are unmarked" | Stands as original value | .N, valid skip | F |
| 4 | 3: not a problem or -6 : did not try to find a specialist from the civilian network | "At least one is marked" | ., missing | Stand as original value | B |
| 5 | Missing response | "All are unmarked" | Stands as original value | ., missing | F |
| 6 | Missing response | "At least one is marked" | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are unmarked" in Coding Table for Note 10B6:
Responses to S10V12A-S10V12H are all unmarked.
Definition of "at least one is marked" in Coding Table for Note 10B6:
Any pattern of marks outside the definition "all are unmarked".

## Coding Table for Note 10B7:

S10V01, S10V02, S10V05, S10V09

| N10B7 | S10V01 <br> is: | $\begin{aligned} & \text { S10V02, S10V05, } \\ & \text { S10V09 } \\ & \text { are: } \end{aligned}$ | S10V01 is coded as: | S10V02, S10V05, S10V09 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1-4: how much, or missing response | Any value | Stands as original value | Stand as original value |  |
| 2 | -6: did not need healthcare in last 12 months | "All are blank or N/A" | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 3 | -6: did not need healthcare in last 12 months | "At least one is marked" | ., missing | Stand as original value | B |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank or N/A" in Coding Table for Note 10B7:
Response to S10V02 is either missing or -6: I did not try to get healthcare from the civilian network, response to S10V05 is either missing or -6: I did not try to see any network doctors, and response to S10V09 is missing.

Definition of "at least one is marked" in Coding Table for Note 10B7:
Any pattern of marks outside the definition "all are blank or N/A".

Coding Table for Note 10A1:
S10B02, S10B03-S10B04

| N10A1 | $\begin{aligned} & \text { S10B02 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { S10B03-S10B04 } \\ & \text { are: } \end{aligned}$ | S10B02 is coded as: | S10B03-S10B04 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: yes | Any value | Stands as original value | ., missing if -6; stand as original value otherwise | F |
| 2 | 2: no or missing response | At least one is "marked" | 1: yes | ., missing if -6 ; stand as original value otherwise | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \end{aligned}$ |
| 3 | 2: no | "All are blank" or "Blank or NA" | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 4 | Missing response | "Blank or NA" | 2: No | .N, valid skip if missing; .C, question should be skipped if marked | $\begin{aligned} & \hline \text { B } \\ & \text { F } \end{aligned}$ |
| 5 | Missing response | "All are blank" | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 10A1:
Responses to S10B03-S10B04 are all missing.
Definition of "blank or NA" in Coding Table for Note 10A1:
All of the following are true: S10B03-S10B04 are a combination of not applicable (-6) or missing.
Definition of "marked" in Coding Table for Note 10A1:
Any pattern of marks outside the definition "all are blank".

Coding Table for Note 11:
H10032, H10033

| N11 | H10032 is: | H10032 is coded as: |  | H10033 is coded as: |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1: yes | 1-4: how often or <br> missing response | Stands as original value | Stands as original value |  |
| 2 | 1: yes or missing <br> response | -6: didn't need care, <br> tests, or treatment | 2: no | .C, question should be skipped | B <br> F |
| 3 | 2: no or missing <br> response | 1-4: how often | 1: yes | Stands as original value | B |
| 4 | 2: no | $-6:$ didn't need care, <br> tests, or treatment or <br> missing response | Stands as original value | .N, valid skip if missing; .C, <br> question should be skipped if <br> marked | F |
| 5 | Missing response | Missing response | Stands as original value | Stands as original value |  |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 11B:

H10034B, H10034

| N11B | H10034B is: | H10034 is: | H10034B is coded as: |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1: yes | $1-4:$ how often or missing <br> response | Stands as original value | Stands as original value |  |
| 2 | $1:$ yes or missing <br> response | -6: didn't look for <br> information | 2: no | .C, question should be skipped | B <br> F |
| 3 | 2: no or missing <br> response | $1-4:$ how often | Stands as original value | B |  |
| 4 | 2: no | -6: didn't look for <br> information or missing <br> response | Stands as original value | .N, valid skip if missing; .C, <br> question should be skipped if <br> marked | F <br> 5 |

* Indication of backward coding (B) or forward coding (F).

Coding Table for Note 12:
H10035, H10036

| N12 | H10035 is: | H10036 is: | H10035 is coded as: | H10036 is coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: yes | 1-4: how often, or missing response | Stands as original value | Stands as original value |  |
| 2 | 1: yes or missing response | -6: didn't need service or equipment | 2: no | .C, question should be skipped | B |
| 3 | 2: no or missing response | 1-4: how often | 1: yes | Stands as original value | B |
| 4 | 2: no | -6: didn’t need service or equipment, or missing response | Stands as original value | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 5 | Missing response | Missing response | Stands as original value | Stands as original value |  |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 13:

H10037, H10038

| N13 | H10037 is: | H10038 is: | H10037 is coded as: | H10038 is coded as: | $*$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1: yes | $1-4:$ how often, or <br> missing response | Stands as original value | Stands as original value |  |
| 2 | $1:$ yes or missing <br> response | $-6:$ didn't need <br> prescription meds | 2: no | .C, question should be skipped | B <br> F |
| 3 | 2: no or missing <br> response | 1-4: how often | 1: yes | Stands as original value |  |
| 4 | 2: no | -6: didn't need <br> prescription meds, or <br> missing response | Stands as original value | .N, valid skip if missing; <br> C, question should be skipped <br> if marked | F |
| 5 | Missing response | Missing response | Stands as original value | Stands as original value |  |

[^6]
## Coding Table for Note 14:

 H10039, H10040-H10041| N14 | $\begin{aligned} & \text { H10039 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { H10040-H10041 } \\ & \text { are: } \end{aligned}$ | H10039 is coded as: | H10040-H10041 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: Yes | At least one is "marked" or "all are blank" | Stands as original value | ., missing if -6 ; stand as original value otherwise | F |
| 2 | 1: Yes or missing response | "Blank or NA" | 2: No | .N, valid skip if missing; .C, question should be skipped if marked | $\begin{aligned} & \hline \text { B } \\ & \text { F } \end{aligned}$ |
| 3 | 2: No or missing response | At least one is "marked" | 1: Yes | ., missing if -6 ; stand as original value otherwise | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \end{aligned}$ |
| 4 | 2: No | "All are blank" or "blank or NA" | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 5 | Missing response | "All are blank" | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 14:
Responses to H10040-H10041 are all missing.
Definition of "blank or NA" in Coding Table for Note 14:
All of the following are true: H10040-H10041 are a combination of not applicable (-6) or missing.
Definition of "marked" in Coding Table for Note 14:
Any pattern of marks outside the definitions "all are blank" and "blank or NA".

Coding Table for Note 15:
H10042, H10043

| N15 | H10042 is: | H10043 is: | H10042 is coded as: | H10043 is coded as: |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1: yes | $1-4:$ how often, or <br> missing response | Stands as original value | Stands as original value | . |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 16:

H10044, H10045-H10046

| N16 | H10044 is: | H10045-H10046 are: | H10044 is coded as: | H10045-H10046 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: yes | At least one is "marked", "all are blank" or "blank or don't know" | Stands as original value | ., missing if -6 ; stand as original value otherwise | F |
| 2 | 1: yes, -5 : don't know, missing | "Blank or NA" or "NA or don't know" | 2: no | .N, valid skip if missing; .C, question should be skipped if marked | $\begin{aligned} & \hline \text { B } \\ & \text { F } \end{aligned}$ |
| 3 | 2: no, -5: don’t know, missing | At least one is "marked" | 1: yes | ., missing if -6; stand as original value otherwise | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \\ & \hline \end{aligned}$ |
| 4 | 2: no | None are "marked" | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 5 | -5: don't know | "Blank or don't know" or "all are blank" | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | F |
| 6 | Missing response | "Blank or don't know" or "all are blank" | Stands as original value | Stand as original value |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 16:
Responses to H10045-H10046 are all missing.
Definition of "blank or NA" in Coding Table for Note 16:
Responses to H10045-H10046 are either all not applicable (-6) or a combination of missing and not applicable (-6).
Definition of "blank or don't know" in Coding Table for Note 16:
Responses to H10045-H10046 are either all don't know (-5) or a combination of missing and don't know (-5).
Definition of "NA or don't know" in Coding Table for Note 16:
Responses to H10045-H10046 are a combination of not applicable (-6) and don't know (-5).
Definition of "marked" in Coding Table for Note 16:
Any pattern of marks outside the definitions "all are blank," "blank or NA," "blank or don’t know," or "NA or don’t know".

## Coding Table for Note 17:

H10051--H10055

| N17 | H10051 is: | $\begin{aligned} & \text { H10052 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { H10053- } \\ & \text { H10055 } \\ & \text { are: } \end{aligned}$ | H10051 is coded as: | H10052 is coded as: | H10053- H10055 are coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: ever smoked | 3 or 4: still smoke | Any value | Stands as original value | Stands as original value | Stand as original value |  |
| 2 | 1: ever smoked | 2: quit, -5: don't know | Any value | Stands as original value | Stands as original value | .C, question should be skipped if marked; <br> .N, valid skip if missing | F |
| 3 | 1: ever smoked | Missing response | Any value | Stands as original value | Stands as original value | Stand as original value |  |
| 4 | 2: never, -5: don't know, missing response | 3 or 4: still smoke | Any value | 1: ever smoked | Stands as original value | Stand as original value | B |
| 5 | 2: never <br> or -5: don't know | 2: quit, -5: don't know, or missing response | Any value | Stands as original value | .C, question should be skipped if marked; .N, valid skip if missing | .C, question should be skipped if marked; <br> .N, valid skip if missing | F |
| 6 | Missing response | 2: quit, missing response | $\begin{aligned} & \text { Any = 2- } \\ & \text { 5: some } \\ & \text { visits } \\ & \hline \end{aligned}$ | 1: ever smoked | Stands as original value | Stand as original value | B |
| 7 | Missing response | 2: quit, missing response | All = 1: <br> None, -6: No visits, or missing | Stands as original value | Stands as original value | Stand as original value |  |
| 8 | Missing response | -5: don't know | Any value | Stands as original value | Stands as original value | .C, question should be skipped if marked; <br> .N, valid skip if missing | F |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 18:

 H10053, H10054-H10055| N18 | H10053 <br> is: | H10054 is: | $\begin{aligned} & \text { H10055 } \\ & \text { is: } \end{aligned}$ | H10053 is coded as: | H10054 is coded as: | H10055 is coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | .N: No doctor visits | Any value | Any value | Stands as original value | .C, question should be skipped if marked; .N: No doctor visits, otherwise | .C, question should be skipped if marked; .N: No doctor visits, otherwise | F |
| 2 | .C: Should be skipped | Any value | Any value | Stands as original value | Stands as original value | Stands as original value |  |
| 3 | 1: None | .N: No doctor visits | .N: No doctor visits | Stands as original value | 1: None | 1: None | F |
| 4 | 1: None | .N: No doctor visits | 1-5, missing | Stands as original value | 1: None | Stands as original value | F |
| 5 | 1: None | 1-5, missing | .N: No doctor visits | Stands as original value | Stands as original value | 1: None | F |
| 6 | 2-5: Visits, missing | .N: No doctor visits | .N: No doctor visits | Stands as original value | .:Missing | .:Missing | F |
| 7 | 2-5: Visits, missing | .N: No doctor visits | 1-5, missing | Stands as original value | .:Missing | Stands as original value | F |
| 8 | 2-5: Visits, missing | 1-5, missing | .N: No doctor visits | Stands as original value | Stands as original value | .:Missing | F |
| 9 | 1-5: 0 or more visits | More visits than indicated by H10053 | More visits than indicated by H10053 | Stands as original value | H10053 | H10053 | F |
| 10 | 1-5: 0 or more visits | More visits than indicated by H10053 | Same or fewer visits than indicated by H10053 or missing | Stands as original value | H10053 | Stands as original value | F |
| 11 | 1-5: 0 or more visits | Same or fewer visits than indicated by H10053 or missing | More visits than indicated by H10053 | Stands as original value | Stands as original value | H10053 | F |
| 12 | 1-5: 0 or more visits | Same or fewer visits than indicated by H10053 or missing | Same or fewer visits than indicated by H10053 or missing | Stands as original value | Stands as original value | Stands as original value |  |
| 13 | Missing | 1-5, missing | 1-5, missing | Stands as original value | Stands as original value | Stands as original value |  |

* Indication of backward coding (B) or forward coding (F).

## Coding Table for Note 19:

Note 19 (Part a)
H10056, SEX, XSEXA, H10057-H10062

| N19A | H10056 <br> is : |  | SEX <br> is: | H10057--H10062 <br> are: |
| :--- | :--- | :--- | :--- | :--- |
| 1 | Missing response | F | Any marked | XSEXA <br> is coded as: |
| 2 | Missing response | F | All missing | 2, female |
| 3 | Missing response | M | Any marked | 1, male |
| 4 | Missing response | M | All missing | 1, male |
| 5 | Missing response | Z, missing | Any marked | 2, female |
| 6 | Missing response | Z | All missing | ., missing value |
| 7 | Missing response | Missing | All missing | ., missing value |
| 8 | 1, male | Any value | All missing | 1, male |
| 9 | 1, male | F | Any marked | 2, female |
| 10 | 1, male | M, Z, or <br> missing | Any marked | 1, male |
| 11 | 2, female | Any value | Any marked | 2, female |
| 12 | 2, female | M | All missing | 1, male |
| 13 | 2, female | F, Z, or <br> missing | All missing | 2, female |

SEX (PNSEXCD) is the gender from the DEERS file. This variable is not used to override questionnaire responses, but to clear up any omissions or discrepancies in the responses.

XSEXA is the recoded gender variable after taking into account the self-reported response (H10056), any responses to gender-specific questions, and the gender of the sample beneficiary from DEERS.

Note 19 (Part B):
XSEXA, H10057-H10062

| N19B | XSEXA <br> is: | H10057--H10062 <br> are: | H10057--H10062 <br> are coded as: | $*$ |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1: Male | "All are blank" | .N, valid skip | .N, valid skip if missing; <br> .C, question should be skipped if <br> marked | F |
| 2 | 1: Male | At least one is "marked" |  |  |  |
| 3 | 2: Female | "All are blank" or at least one is "marked" | Stand as original value |  |  |
| 4 | Missing | "All are blank" or at least one is "marked" | Missing value | F |  |

* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 19b: All variables H10057--H10062 are missing.

Definition of "marked" in Coding Table for Note 19b: Any pattern of marks outside the definition "all are blank".

Coding Table for Note 20
XSEXA, AGE, H10058, H10059

| N20 | XSEXA is: | AGE is: | H10058 <br> is: | $\begin{aligned} & \text { H10059 } \\ & \text { is: } \end{aligned}$ | H10058 is coded as: | H10059 is coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: Male | Any value | .C, question should be skipped, or .N, valid skip | C, question should be skipped, or .N, valid skip | Stands as original value | Stands as original value |  |
| 2 | 2: <br> Female | Any value | 2: 40 or over | Any value | Stands as original value | Stands as original value |  |
| 3 | 2: <br> Female | Any value | 1: under 40 | Any value | Stands as original value | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 4 | $\begin{aligned} & \hline 2: \\ & \text { Female } \end{aligned}$ | Any value | Missing | Marked | 2: > $=40$ | Stands as original value | B |
| 5 | $\begin{aligned} & \hline 2: \\ & \text { Female } \end{aligned}$ | < 40 | Missing | Missing | 1: < 40 | .N, valid skip | $\begin{aligned} & \hline \mathrm{F} \\ & \mathrm{~B} \end{aligned}$ |
| 6 | 2: <br> Female | $>=40$ | Missing | Missing | 2: > $=40$ | Stands as original value | B |
| 7 | $2:$ <br> Female | Missing | Missing | Missing | Stands as original value | Stands as original value |  |
| 8 | Missing | Any value | Missing | Missing | Stands as original value | Stands as original value |  |

* Indication of backward coding (B) or forward coding (F).

AGE (DAGEQY) is from the DEERS file. This variable is not used to override questionnaire responses, but to clear up any omissions or discrepancies in the responses.

## Coding Table for Note 21:

XSEXA, H10060, H10061, H10062

| N21 | XSEXA is: | H10060 is: | $\mathrm{H} 10061$ <br> is: | H10062 <br> is: | H10060 is coded as: | H10061 is coded as: | H10062 is coded as: | * |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1: Male | Any value | Any value | Any value | Stands as original value | Stands as original value | Stands as original value |  |
| 2 | $\begin{array}{\|l\|} \hline 2: \\ \text { Female } \end{array}$ | 1: pregnant now | 1: first trimester | Any value | Stands as original value | Stands as original value | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 3 | $\begin{array}{\|l\|} \hline 2: \\ \text { Female } \end{array}$ | 1: pregnant now | 2: second trimester | 2: third trimester | Stands as original value | Stands as original value | .: missing value | F |
| 4 | $\begin{array}{\|l\|} \hline 2: \\ \text { Female } \end{array}$ | 1: pregnant now | 2: second trimester | 4: first trimester, <br> 3: second trimester, 1: Did not receive prenatal care, or missing | Stands as original value | Stands as original value | Stands as original value |  |
| 5 | $\begin{array}{\|l\|} \hline 2: \\ \text { Female } \end{array}$ | 1: pregnant now | 3: third trimester, missing response | Any value | Stands as original value | Stands as original value | Stands as original value |  |
| 6 | $\begin{array}{\|l\|} \hline 2: \\ \text { Female } \end{array}$ | 2: pregnant in last 12 months | Any value | Any value | Stands as original value | .N, valid skip if missing; .C, question should be skipped if marked | Stands as original value | F |
| 7 | $\begin{array}{\|l\|} \hline 2: \\ \text { Female } \end{array}$ | 3: not pregnant in past 12 months | Any value | Any value | Stands as original value | .N, valid skip if missing; <br> .C, question should be skipped if marked | .N, valid skip if missing; <br> .C, question should be skipped if marked | F |
| 8 | $\begin{array}{\|l\|} \hline 2: \\ \text { Female } \end{array}$ | Missing response | 1: first trimester | Any value | 1: pregnant now | Stands as original value | .N, valid skip if missing; <br> .C, question should be skipped if marked | $\begin{aligned} & \hline \mathrm{B} \\ & \mathrm{~F} \end{aligned}$ |

* Indication of backward coding (B) or forward coding (F).

Coding Table for Note 21 continued:

| N21 | XSEXA is: | H10060 is: | $\begin{aligned} & \text { H10061 } \\ & \text { is: } \end{aligned}$ | $\begin{aligned} & \text { H10062 } \\ & \text { is: } \end{aligned}$ | H10060 is coded as: | H10061 is coded as: | H10062 is coded as: | * |

In lst yr:wait btwn try get care, see prv
In lst yr:make appts non-urgnt hlth care
In lst yr:non-urg hlth cre appt whn whtd
In lst yr:days btwn appt \& see prvder
In lst yr:go to emrgncy rm for own care
In lst yr:go to Dr office/clinic for care
Lst yr: how often talk to doctor about illness prvntn
Lst yr: did doctor tell you more than 1 choice for trtmnt
Lst yr: did talk to doctor about pros/cons of trtmnt
Lst yr: did doctor ask which trtmnt option best for you
Rating of all health care in lst yr
Have one person think of as personal Dr
Lst yr: how often visit prsnl doctor for care for yourself
Lst yr: how oftn Drs listen to you
Lst yr: how oftn Drs explain things
Lst yr: how oftn Drs show respect
Lst yr: how oftn Drs spend enough time
Lst yr: did get care from doctor other than prsnl doctor
Lst yr: how often prsnl doctor seemed
infrmd of care from other doctors
Rating of your personal Dr
Lst yr: did make any appointments to see spclst
Lst yr: how often easy to get appointments with spclsts
Lst yr: how many spclsts seen
Rating of specialist seen in lst yr
Lst yr: did try to get care, test,
or trtmnt through health plan
Lst yr: how often easy to get care, test, or trtmnt
Lst yr: did look for info from written material/Internet
Lst yr: how often written material/Internet
provide needed info
Lst yr: did look for info from health
plan on cost of service/equipment
Lst yr: how often able to find
out cost of service/equipment
Lst yr: did look for info from health
plan on cost of prescription meds
Lst yr: how often able to find
out cost of prescription meds
Lst yr: did try to get info/help
from health plan's cstmr service
Lst yr: how often did cstmr service give needed info/help
Lst yr: how often did cstmr service
treat with courtesy/respect
Lst yr: did health plan give any forms to fill out
Lst yr: how often were forms easy to fill out
Lst yr: send in any claims
Lst yr: how often did health plan handle claims quickly
Lst yr: how oftn handle claims correctly
Rating of all experience with hlth plan
Blood pressure: when lst reading
Blood pressure: know if too high or not
When did you lst have a flu shot
Smoked at least 100 cigarettes in life
Smoke everyday, some days or not at all
Lst yr: \# visits advised to quit smoking
\# visits recom medic assist quit smoking
\# vist discu meth/strag asst quit smokng
Are you male or female
Lst have a Pap smear test
Are you under age 40
Lst time: breasts checked mammography
Been pregnant in lst yr or pregnant now
In what trimester is your pregnancy
Trimester first received prenatal care
In gnrl, how would you rate ovrall hlth
Impairment/Hlth prblm limit activities

Lst yr: have seen doctor 3 or more times for same condition
Has condition lasted for at least 3 months
Need to take medicine prescribed by a doctor
Medicine to treat condition that
has lasted for at least 3 months
Height without shoes (feet)
Height without shoes (inches)
Weight without shoes
Highest grade completed
Are you Spanish/Hispanic/Latino
Not Spanish/Hispanic/Latino
Mexican, Mexican American, Chicano
Puerto Rican
Cuban
Other Spanish, Hispanic, or Latino
Race: White
Race: Black or African American
Race: American Indian or Alaska Native
Race: Asian
Race: Native Hawaiian/other Pacific Isl.
What is your age now
Currently Covered Medicare Part A
Currently Covered Medicare Part B
Currently Covered Medicare Supplemental
Same prsnl doctor/nurse before this hlth plan
Prblm getting prsnl doctor/nurse you are happy with
Is prsnl doctor/nurse a civilian
Lst yr: how much problem to find
prsnl doctor to accept TRICARE
Prblm finding Dr to accept TRICARE:
travel distance too long
Prblm finding Dr to accept TRICARE:
communicating with doctor(s)
Prblm finding Dr to accept TRICARE:
doctor(s) not taking new patients
Prblm finding Dr to accept TRICARE: doctor(s)
not taking new TRICARE patients
Prblm finding Dr to accept TRICARE: doctor(s)
not accepting TRICARE payment
Prblm finding Dr to accept TRICARE: could
not find the specialty I wanted
Prblm finding $\operatorname{Dr}$ to accept TRICARE: did not like doctor(s)
Prblm finding Dr to accept TRICARE:
wait for an appointment was too long
Prblm finding Dr to accept TRICARE: could
not find information about doctors
Prblm finding Dr to accept TRICARE: other
Is prsnl doctor/nurse in TRICARE civilian provider network
Lst yr: how much problem to find
doctor from civilian prvdr ntwk
Prblm finding Dr from civilian
ntwk: travel distance too long
Prblm finding Dr from civilian ntwk:
communicating with doctor(s)
Prblm finding Dr from civilian ntwk:
doctor(s) not taking new patients
