1.02.02	02/13/2020	S. Keane	Table 2	Add Number of Orders (ordcount).
1.02.03	06/19/2020	S. Keane	Table 2	Add Certifying Provider Name, Ordering Provider Name, PCM Name, PCM NPI, PCM NPI Type Code, and Service Line Ordering.
1.02.04	12/14/2020	S. Keane	Table 2	Specify Last, First Names for Certifying Provider Name and Ordering Provider Name

## **CADRE Laboratory Enhanced for the MDR**

This functional specification describes the process required to convert the CADRE Laboratory Basic, as described in the specification "Comprehensive Ancillary Data Record Extract (CADRE) Laboratory Basic for the MHS Data Repository (MDR)," into the CADRE Laboratory Enhanced. In time, the dataset(s) developed from this specification will replace current Ancillary dataset(s) as described in the specification "Ancillary Laboratory and Radiology for the MHS Data Repository (MDR)."

### I. SOURCE

The most recent CADRE Laboratory Basic file is the source for the CADRE Laboratory Enhanced file.

### II. Organization and batching

- <u>Time slicing</u>: Organize data into fiscal year files. The Fiscal Year is determined by the Date of Service (SERVDATE) field.
- Frequency of processing and updates:
  - > Current FY: every month after the CADRE Laboratory Basic.
  - Prior FY: semiannually.
  - > All years prior to prior FY: annually (October).
- Archiving (APUB): Use routine archiving rules and procedures of the MDR.

### III. RECEIVING FILTERS

None.

### IV. FIELD TRANSFORMATIONS AND DELETIONS

Table 1 lists the external reference files (and criteria) used to append many fields to the CADRE Laboratory Enhanced file.

TABLE 1: EXTERNAL REFERENCE FILES

MERGE	DATE MATCHING	ADDITIONAL MATCHING
Master Person Index	n/a	See MPI Specification.
Longitudinal VM4	Date of Service (SERVDATE)	Patient EDIPN (EDIPN).
DEERS	Date of Service (SERVDATE)	Patient EDIPN (EDIPN) or SSN
DMISID Index	FY of Date of Service (SERVDATE)	Treatment DMIS ID (TMTDMIS)
Omni-CAD	FY/FM of Date of Service (SERVDATE)	Beneficiary Zip Code (PATZIP) and Sponsor Branch of Service (SVC)
Reservist GWOT	Date of Service (SERVDATE)	Sponsor SSN (SPONSSN)
Enrollment MEPRS	Date of Service (SERVDATE)	Join based on rules in Appendix A, section 1 of the Enrollment MEPRS Code specification
CPT Weight Table	CY of Date of Service (SERVDATE)	CPT Code (CPT) and CPT Code Modifier (CPTMOD)
Cost	FY of Date of Service (SERVDATE)	MEPRS Parent (MEPRDMIS)

### V. UPDATING THE MASTER TABLES

To create the CADRE Laboratory Enhanced Table, join the Accession Table and the Test Table from the MDR CADRE Laboratory Basic Tables/Datasets using the combination of CHCS Host DMIS ID (CHCSDMIS) and Accession Number (ACCESSNO) as the key. All fields (except mod, recno) from the accession table will be populated on every record (of that accession) of CADRE enhanced. MOD will be populated ONLY on the corresponding recno of the CADRE enhanced.

To apply an update: append new ancillary records to the CADRE Laboratory Enhanced Table. The unique identifier or Record Key is defined as the combination of CHCS Host DMIS ID, Accession Number, Order ID, CPT Code, and Record Type Modifier. That is, CHCSDMIS || ACCESSNO || ORDERID || CPT || CPTMOD.

Delete duplicates before updating CADRE Laboratory Enhanced Table. Duplicate records, defined as those with the same unique identifier or Record Key: CHCSDMIS || ACCESSNO || ORDERID || CPT || CPTMOD. In the event of duplicate records, retain the record with the newest Extract File Date (FILEDATE) [extracted from the File Name].

# The CADRE Laboratory Enhanced table should contain only one (1) record per combination of CHCSDMIS, ACCESSNO, ORDERID, CPT.

When there is a record with CHCSDMIS, ACCESSNO, ORDERID, CPT, and CPTMOD = "00", remove any other records with same CHCSDMIS, ACCESSNO, ORDERID, CPT. That is, remove records with same CHCSDMIS, ACCESSNO, ORDERID, CPT, and other CPT Code Modifier (CPTMOD). Remove records with CPT Code Modifier (CPTMOD) in ('26','90') when there is another record with the same CHCSDMIS, ACCESSNO, ORDERID, CPT, and CPTMOD = "32". Remove records with CPT Code Modifier (CPTMOD) = '90' when there is another record with the same CHCSDMIS, ACCESSNO, ORDERID, CPT, and CPTMOD = "26".

### VI. FILE LAYOUT AND CONTENT

MDR CADRE Laboratory Enhanced Table has one core file as described in Table 2. Variables are listed in the following order: Record Key variables and then alphabetically (approximately) by source.

TABLE 2: MDR CADRE LABORATORY ENHANCED TABLE

MDR FIELD NAME	SAS NAME	SAS FORMAT	BUSINESS RULE
	(	CADRE LABORA	ATORY BASIC
CHCS Host Platform DMIS ID	chcsdmis	\$4	No Derivation.
Accession Number	accessno	\$17	No Derivation. A laboratory specimen has a unique accession number. There may be many records per accession number as many laboratory tests may be done on the same specimen.
Order ID	orderid	\$12	No Derivation.
CPT Code	cpt	\$5	No Derivation.
CPT Code Modifier	cptmod	\$2	If CPTMOD in ('00', '26', '32', '90') then CPTMOD= CPTMOD. Else if CPTMOD = ' then CPTMOD = '00'; Else if CPTMOD = 'PC' then CPTMOD = '26'; Else if CPTMOD = 'TC' then CPTMOD = '32'.
Record Type Modifier	mod	\$2	No Derivation.

### VII. DATA MARTS

MHS Mart (M2)

See *M2 Laboratory Ancillary\** functional specification of those respective MDR-to-M2 feeds.

### VIII. QUALITY ASSURANCE

The processor should conduct monthly quality assurance checks to ensure input and output data are valid, complete, and reliable. At a minimum, the processor should:

- Compare monthly raw data row counts to ensure data are consistent with previous monthly raw data feeds.
- Ensure pre-processing data subtotals equal post-processing data subtotals.
- Evaluate post-processing values for data that appear out of the ordinary, or not consistent with SME expected values (face validity).
